Women in Management in Central and Eastern European Countries Irma Rybnikova, Anna Soulsby, Susanne Blazejewski, 2020-07-22 In Bezug auf die Gleichstellung im Management gehören die mittel- und osteuropäischen Länder zu den Vorzeigebispielen. Dieser Umstand wird oft dem sozialistischen Erbe dieser Länder zugeschrieben, die die Einbindung aller Geschlechter in den Arbeitsprozess propagierten. Inzwischen ist bekannt, dass diese vordergründige Gleichstellung gleichzeitig von konservativen Rollenverteilungen konterkariert wurde. Wie sich das Erbe des Sozialismus in der heutigen Wirtschafts- und Organisationswelt Mittel- und Osteuropas darstellt, ist jedoch nur selten Gegenstand von Wissenschaft und Forschung. Dieser Band präsentiert sieben Studien und eine Forschungsnotiz zu diesem Thema. Die darin enthaltenen Forschungsergebnisse basieren sowohl auf quantitativem als auch auf qualitativem empirischem Material und liefern länderbezogene Fallstudien sowie Ländervergleiche aus der Region. Das Buch enthält Beiträge zu Themen wie Die Existenz von Geschlechterstereotypen Auswirkungen des Frauenanteils in Aufsichtsräten Gründe und Folgen des Unternehmertums durch Frauen Zeitpraktiken von Frauen in Führungspositionen Frauen in der kommunalen Politik. Cross-Disciplinary Approaches to the English Language Crina Herteg, Rodica Pioariu, Teodora Popescu, 2011-09-22 Cross-Disciplinary Approaches to the English Language: Theory and Practice provides an overview of a less tackled field of research, namely the main issues at stake when teaching English Language and Culture in Romania. The approach is an interdisciplinary and cross-cultural one, as the authors investigate problems, offering and probing solutions from a cross-curricular perspective. The book is a collection of 10 contributions by teachers and researchers from Romania which draw on theoretical and applied methodological explorations into the challenges posed by teaching/learning English in a globalised context. Organised into three main chapters, the volume addresses the multifacetedness of language education as a cross-discipline. The complexity and universality of the research enquiries and practical insights make the topics addressed valid across the contemporary globalising educational context. Cross-Disciplinary Approaches to the English Language: Theory and Practice will be a useful tool to specialists and practitioners from ESP and CLIL domains alike, as well as graduate and postgraduate students in foreign language teaching.

The Romanian Journal of European Studies no.5-6/2007 ,

Blind Spots in the Spotlight Raluca Iacob, 2022-06-17 This book brings under a magnifying glass a little explored, but significant topic - the communications changes of the National Bank of Romania after 2008. Given the similarities and differences between central banks' mechanisms and practices adopted, its applicability and impact for other actors are incontestable. The research incorporates valuable details on how the National Bank of Romania's communication changed during the Great Recession of 2008, as well as insightful data about the way in which different categories of public and media perceived this change. The timeliness and significance of this research are noticeable as the central banks already entered a new era of communication challenges triggered by the Covid-19 pandemic and recently by the Russia - Ukraine war. Lessons from the past can contribute to what researchers name the second revolution in communication, focusing on opening the central banks to the public and regaining trust, especially in such a difficult period.

Sustainable Finance and Financial Crime Michel Dion, 2023-06-27 Sustainable finance is a holistic approach to the sustainability development goals (SDG), so that the interdependence between environmental, social, and governance issues is unveiled. Sustainable finance takes into account the various challenges following from social change and sustainability, the evolution of capital markets, and the development of efficient risk management practices. Governance issues are an integral part of sustainable finance. However, academic literature has generally neglected to consider strategies to prevent and fight financial crimes as a crucial component of sustainable finance. The aim of this book is to focus on the interconnectedness between sustainable finance and preventing/fighting financial crime, not only as a crucial governance issue, but also as a deep challenge for social and even environmental issues. There is no really sustainable finance without developing strong and efficient means to fight financial crimes.

Controlling Corruption in Europe Alina Mungiu-Pippidi, 2013-09-18 Corruption has an impact. It is about time that anticorruption starts having an impact, too. This is the first annual policy report of the European Seventh Framework Research Project ANTICORRP, which has started in 2012 and will continue until 2018. Based on the work of 21 different research centers and universities gathering original data, ANTICORRP offers yearly updates on the latest from corruption research, analyzing both the consequences of corruption and the impact of policies attempting to curb it. This first report offers a methodology to evaluate corruption risk and quality of government at country, region and sector level by means of corruption indicators that are sensitive to change and policy intervention. The aim of the project is to offer testable, easy to handle policies which reduce corruption risk. Corruption distorts market competition, bolsters deficits on behalf of discretionary spending, hurts real investment in public health and education, reduces tax collection, detracts the absorption rate of EU funds, and generates vulnerable employment and brain drain. This study estimates that if EU member states would all manage to control corruption at the Danish level, tax collection in Europe would increase by 323 billion Euro per year - double of the EU budget for 2013.

It describes specific cases, the court investigations and various mechanisms. It addresses issues of money laundering and international fraud on capital markets, such as stock manipulation, by exploring the financial mechanisms of the fraud, their impact on the market behaviour and the consequences on their econometric features. Researchers and students in climate change policy, environmental finance, financial law, organised crime, forensic statistics, financial regulation and risk management as well as financial regulators and policy makers will find this book of great interest.

The Leap of Faith Sven H. Steinmo, 2018-08-14 This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. Why are citizens in some countries more willing to pay taxes than in other countries? This book examines the history of the relationship between citizens and their states in five countries, (Sweden, Britain, Italy, Romania, and the United States), and demonstrates how and why people in some countries have come to trust the government with their money while in other countries they do not. The book explores the evolution of this relationship in detail, in each case showing how some governments developed the fiscal and technical capacity to tax their citizens fairly and deliver public services efficiently. In short, how and why some countries became more trustworthy than others. The volume concludes by examining the implications of these five cases for developing countries today and the lessons that can be learned.

No Rule of Law, No Democracy Cristina Nicolescu-Waggonner, 2016-11-10 Argues that new democracies face consolidation challenges due to campaign finance corruption and the unwillingness of politicians to reform rule of law enforcement. Mainstream theories assert that democracy cures corruption. In market economies, however, elections are expensive and parties, with ever-thinning memberships, cannot legally acquire the necessary campaign funds. In order to secure electoral funds, a large number of politicians misappropriate public funds. Due to the illicit character of these transactions, high officials with conflicts of interest prefer to leave anticorruption enforcement mechanisms unreformed and reserve the right to intervene in the judicial process, with dire consequences for the rule of law. In *No Rule of Law, No Democracy*, Cristina Nicolescu-Waggonner demonstrates that when corrupt politicians are in power—true of nearly all new democracies—they will protect their office and fail to implement rule of law reforms. Consequently, these polities never reach a point where democracy could and would cure corruption. This dysfunction is tested in one hundred cases over sixteen years with significant results. In the case of the Czech Republic, for example, which is regarded as a consolidated democracy, there is systematic corruption, misappropriation of state funds, an unreformed judiciary, and arbitrary application of law. The only solution is a powerful, independent, well-funded anticorruption agency. Romania, one of the most corrupt countries in Europe, established, at the European Union's request, powerful anticorruption bodies and punished corrupt leaders, which created the predictability of enforcement. It is the certainty of punishment that curtails corruption and establishes true rule of law. Cristina Nicolescu-Waggonner is Visiting Assistant Professor of Political Science at Pomona College.

Exploring Discourse Practices in Romanian Andra Vasilescu, Mihaela-Viorica Constantinescu, Gabriela Stoica, Jonathan Russell White, 2020-04-02 Exploring Discourse Practices in Romanian is a glimpse into Romanians' style of interaction, which has developed eclectically at the crossroads of Eastern and Western cultures. It is oriented towards modern literacy while being deeply rooted in a long oral tradition, and paradoxically displays both attachment to local specifics and commitment to mimetic speech and act(ion)s imported from various cultural spaces. The book presents a characterisation of the Romanian cultural space in terms of various discourse practices, drawing on recent challenging theoretical proposals, and concluding with in-depth corpus-based analyses. The chapters focus on five main topics (the co-construction of discursive identities, discursive polyphony, textualisation of attitudes and emotions, conceptual metaphors, and grammaticalisation of context) explored in various discourse genres (political discourse, media discourse, professional discourse, face-to-face conversation, literature of memoirs, and the usage of Romanian by non-natives). The theoretical framework utilised here is discourse analysis, defined in a broad sense (with regards to discourse patterns, pragmatic phenomena, conversation analysis, and rhetoric). The volume, having both a theoretical and an applied dimension, will appeal to an international readership, including researchers interested in current developments of pragmatics and discourse analysis.

Ruling Ideas Cornel Ban, 2016 Why do some countries governed by moderate neoliberalism while others by a radical one? Looking at Spain and Romania, the book points to the role of local intellectual traditions, the strength of international alternatives, the resources of the local advocates of neoliberalism and their vulnerability to external coercion--
