Bonus Options in Health Insurance Peter Zweifel, 2012-12-06 Confronted with the continuing cost expansion in the health care sector, policy makers face a dilemma: limiting moral hazard in medical care requires that consumers participate in the cost, yet copayment is strongly resisted by today's socially insured. Thus, the experiences of three private German health insurers will be of interest to physicians, social scientists, and policy makers. Insurer A writes conventional plans with deductibles and coinsurance; B pays back three-monthly premiums as a fixed rebate for no claims; while C runs an experience-rated bonus system starting with a rebate of three-monthly premiums for the first year without a claim, reaching a maximum of five after three years. While both rebates and bonuses are quite popular among insureds, this study shows that bonus options are particularly effective in limiting the demand for ambulatory and even hospital care. But what about adverse effects on health caused by the desire to save one's bonus? On this issue, there is some surprising evidence.

Groupon's Biggest Deal Ever Frank Sennett, 2012-06-05 The inside story of the meteoric rise of Groupon from startup to \$30 billion online giant and the audacious genius behind it, founder Andrew Mason In late 2010, Groupon made an incredible gamble. Rather than take Google's \$6 billion buyout offer, founder Andrew Mason turned the search giant down and decided to go it alone.

The experts thought he was insane. Groupon was little more than two years old and staffed from top to bottom with twenty-somethings. The wild ride couldn't last, but Mason thought otherwise, and with knowledge of a possible IPO he liked his odds. A discount service that offers a deal a day at local merchants in countless cities in more than forty-three countries, Groupon is the fastest-growing company in Internet history and is as committed to innovating a new model for commerce as it is to creating an office culture and editorial voice based on radical transparency and absurd humor. Groupon's Biggest Deal Ever is the exclusive and unparalleled account of the incredible rise of discount giant Groupon and the compelling story of its offbeat founder Andrew Mason as he created a juggernaut of online commerce and ignited a consumer revolution.

The Debt Buying Industry and Changes in Collection of Consumer Debts Paul B. Davis, Kenneth C. White, 2013 In a 2009 study of the debt collection industry, the Federal Trade Commission (FTC) concluded that the most significant change in the debt collection business in recent years has been the advent and growth of debt buying. Debt buying refers to the sale of debt by creditors or other debt owners to buyers that then attempt to collect the debt or sell it to other buyers. Debt buying can reduce the losses that creditors incur in providing credit, thereby allowing creditors to provide more credit at lower prices. Debt buying, however, also many raise significant consumer protection concerns. The FTC receives more consumer complaints about debt collectors, including debt buyers, than about any other single industry. Many of these complaints appear to have their origins in the quantity and quality of information that collectors have about debts. This book provides an overview of the debt buying market and the process of buying and selling debt; and the nature and extent of the relationship between the practice of debt buying and the types of information that the FTC has found can occur when debt collectors seek to recover and verify debts.

Integrated Couponing Axel Winkelmann, 2006 Couponing is a well-known and old promotional instrument. Coupon-vouchers are used in various countries all over the world for different objectives such as customer retention, market share increase, price discrimination, or market research. Nevertheless, the efficiency of traditional coupon processing is doubted. Many objectives can only be achieved to a limited extent. Most problems of traditional couponing result from the way of coupon treatment. Inefficient ways of distribution and various media discontinuities during the processing lead to negative side-effects such as fraud and redemption by wrong consumers. Axel Winkelmann especially contributes to the body of knowledge in the information systems discipline by outlining an efficient framework for integrated coupon processing without media discontinuities. He proposes a conceptualization with special regard to the inefficiency of traditional couponing. His work can be used to facilitate and improve the coupon promotion handling. This book is directed at practitioners and academics in the field of information systems and marketing promotions.

Intelligentes Couponing am Point of Sale Burkhard Friedrichsen, 2008 Diplomarbeit aus dem Jahr 2008 im Fachbereich BWL - Marketing, Unternehmenskommunikation, CRM, Marktforschung, Note: 1,7, Duale Hochschule Baden-Württemberg, Ravensburg, früher: Berufsakademie Ravensburg, 57 Quellen im Literaturverzeichnis, Sprache: Deutsch, Abstract: Die zentrale Problemstellung der Diplomarbeit befasst sich mit der Einführung eines zusätzlichen Marketinginstrumentes - dem Couponing - am Praxisbeispiel des Discounters LIDL. Im Rahmen der Arbeit ist außerdem zu klären, ob diese Implementierung zur langfristigen Sicherung des Wettbewerbsvorteils der Kundenbindung und -akquisition auf der Handels- und Herstellerebene beiträgt. Des Weiteren ist zu klären, ob der Nutzen von Imagegewinn, Kunden- sowie Umsatzzuwächse in einem angemessenen Verhältnis zu den anfallenden Kosten und den entstehenden Risiken steht. Begleitende Fragestellungen zu dieser

Diplomarbeit sind die Anwendungsvoraussetzungen auf Handels- und Herstellerebene sowie Probleme, die bei der praktischen Implementierung des Couponing auftauchen, und deren Lösungsansätze.

An Antitrust Analysis of Bundled Loyalty Discounts Patrick Greenlee, David S. Reitman, David S. Sibley, 2006 Consider a monopolist in one market that faces competition in a second market. Bundled loyalty discounts, in which customers receive a price break on the monopoly good in exchange for making all purchases from the monopolist, have ambiguous welfare effects. To analyze such discounts as predatory pricing is incorrect. In some settings, they act as tie-in sales. Existing tests for whether such discounts violate Section 2 of the Sherman Act do not track changes in consumer surplus or total surplus. We present a new test and use it in an illustrative example based on SmithKline that assumes the tied market is a homogeneous good. If the tied market is characterized by Hotelling competition, bundling by the monopolist causes the rival firm to reduce its price. In numerical examples, we find that this can deter entry or induce exit.

The Logic of Microspace Rick Fleeter, 2000 Changing the focus of the multibillion-dollar global aerospace business toward smaller, lower-cost spacecraft is not happening solely due to technical, managerial, financial or market motivations. Rick Fleeter's second book on the small, low-cost space programmes which are the fastest-growing segment of aerospace activity, gives the reader a keen understanding of the full spectrum of factors driving this profound change. The text then goes beyond engineering technologies and management techniques to envision the tantalizing prospects microspace has in store for the industry, its present markets and those of the future.
