**Paramedics On and Off the Streets** Michael K.

Corman,2017-01-01 In *Paramedics On and Off the Streets*, Michael K. Corman embarks on an institutional ethnography of the complex, mundane, intricate, and exhilarating work of paramedics in Calgary, Alberta. Corman's comprehensive research includes more than 200 hours of participant observation ride-alongs with paramedics over a period of eleven months, more than one hundred first hand interviews with paramedics, and thirty-six interviews with other emergency medical personnel including administrators, call-takers and dispatchers, nurses, and doctors. At the heart of this ethnography are questions about the role of paramedics in urban environments, the role of information and communication technologies in contemporary health care governance, and the organization and accountability of pre-hospital medical services. *Paramedics On and Off the Streets* is the first institutional ethnography to explore the role and increasing importance of paramedics in our healthcare system. It takes readers on a journey into the everyday lives of EMS personnel and provides an in-depth sociological analysis of the work of pre-hospital health care professionals in the twenty-first century.

**Under New Public Management** Alison I. Griffith,Dorothy E.

Smith,2014-09-17 The institutional ethnographies collected in *Under New Public Management* explore how new managerial governance practices coordinate the work of people doing front-line work in public sectors such as health, education, social services, and international development, and people management in the private sector. In these fields, organizations have increasingly adopted private-sector management techniques, such as standardized and quantitative measures of performance and an obsession with cost reductions and efficiency. These practices of "new public management" are changing the ways in which front-line workers engage with their clients, students, or patients. Using research drawn from Canada, the United States, Australia, and

Denmark, the contributors expose how standardized managerial requirements are created and applied, and how they affect the practicalities of working with people whose lives and experiences are complex and unique.

**A History of Haematology** Shaun R. McCann, 2016-03-03

Blood has long been an object of intrigue for many of the world's philosophers and physicians, and references to it have existed since the earliest studies of human anatomy. Herodotus of Halicarnassus, whose writings 500 years before the birth of Christ drew on stories collected during his widespread travels, was amongst the first to identify the ritualistic and medical significance of blood. However, despite this long established history, haematology as a medical specialty is relatively new. *A History of Haematology: From Herodotus to HIV* traces the history of haematology from biblical times to the present, discussing the major defining discoveries in the specialty, ranging from war as a catalyst for the development of new techniques in blood transfusion, to the medical response to the HIV/AIDS epidemic. In this beautifully illustrated and passionately rendered history of the field of haematology, Professor Shaun McCann traces the remarkable developments within haematology and the work of the scientists and pioneers central to these advances. This engaging and authoritative history will appeal to a wide audience including haematologists, nurses and other health care workers in haematology, as well as medical students, and general physicians with an interest in haematology.

**Rhetorical Work in Emergency Medical Services** Elizabeth

L. Angeli, 2018-08-30 *Rhetorical Work in Emergency Medical Services: Communicating in the Unpredictable Workplace* details how communicators harness the power of rhetoric to make decisions and communicate in unpredictable contexts. Grounded in a 16-month study in the emergency medical services (EMS) workplace, this text contributes to our theoretical, methodological, and practical understandings of the situation-specific processes

that communicators and researchers engage in to respond to the urgencies and constraints of high-stakes workplaces. This book presents these intricate processes and skills—learned and innate—that workplace communicators use to accomplish goal-directed activity, collaborate with other communicators, and complete and teach workplace writing.

**Wir verschenken Milliarden** Jörg Alt, 2016-10-01 Nationaler und internationaler Steuerwettbewerb beeinträchtigt die gleichmäßige und gerechte Besteuerung - mit fatalen Folgen für die Umsetzung von Staatsaufgaben. Erschwert wird die Lage durch (politisch gewollte?) Überlastung der Steuerverwaltungen sowie unterschiedlich gute rechtliche und institutionelle Grundlagen für grenzübergreifende Zusammenarbeit. Davon profitieren vor allem große Vermögen, deren Konzentration und Einfluss wächst, während jene, die ihre Gelder nicht verschieben können, eine zunehmende Steuer- und Abgabenlast tragen. Zu diesem Ergebnis kommt das Forschungsprojekt Steuergerechtigkeit und Armut, welches die Situation in Deutschland sowie Kenia und Sambia untersuchte. Das Buch fasst die Ergebnisse des auf Deutschland bezogenen Teils zusammen. Es enthält darüber hinaus eine ethische Bewertung der Situation sowie Veränderungsvorschläge.

Historische Bildkunde Brigitte Tolkemitt, Rainer Wohlfeil, 1991

Die Historische Bildkunde beansprucht den Rang einer historischen Grundwissenschaft; sie will nicht in Konkurrenz zur Kunstwissenschaft treten, auf deren Forschungsergebnisse sie mit angewiesen bleibt, sondern sie will interdisziplinäre Verrittlungsarbeit leisten. Um Bilder als Quellen für historische Fragestellungen zu erschließen, braucht der Historiker neben seinem üblichen Handwerkszeug Spezialkenntnisse: kunsthistorische Informationen und eine Arbeitsmethodik. Beides zu vermitteln und auf eine systematische Erschließung bildlichen Quellenmaterials für die historische Forschung hinzuwirken, ist Aufgabe der Historischen Bildkunde. Ihre spezifische Leistung ist die Orientierung an der Perspektive des Historikers, der in den Bildern nach Antworten auf heutige Fragen an die Geschichte sucht. Den Beitrag eines Bildes zur Beantwortung einer geschichtswissenschaftlichen Fragestellung nennt Rainer Wohlfeil den historischen Dokumentensinn, im Unterschied zu Panofskys Dokumentsinn. Hinter dieser Begrifflichkeit steht die Abgrenzung der Historischen Bildkunde von der Ikonologie. Entscheidend ist, daß die Ikonologie nach dem Ansatz Panofskys bestrebt ist, dem Kunstwerk in seiner Gesamtheit gerecht zu werden und es als Ganzes, in allen Facetten zu interpretieren. Dagegen gibt die Historische Bildkunde den Anspruch auf, das Kunstwerk in seiner Gesamtheit zu erfassen. Sein Ansatz für die Arbeit mit Bildern kommt aus der Sozial- und Mentalitätengeschichte. Bilder können jenseits von real- oder personenkundlichen Zwecken als historische Quellen genutzt werden. Statuen, Bilder und Bauten können propagandistische und ideologische Botschaften verkünden. Sie haben eine Funktion bei der Legitimation von Herrschaft und Sozialdisziplinierung von Untertanen. Auf der anderen Seite spielen Bilder auch eine Rolle bei der Erhebung und Begründung sozialer, politischer, ökonomischer oder religiöser Forderungen. Kunstwerke können zur Erforschung von Machtstrukturen und sozialen Beziehungen herangezogen werden,

sie bereichern damit die Mentalitätengeschichte um interessante Aspekte. Bildliche Quellen können auch auf Tendenzen hin untersucht werden, die in der Entstehungszeit der Bilder verbal noch nicht oder nicht mehr thematisiert wurden, die der spätere Wissenschaftler jedoch aufgrund seiner Kenntnisse über die historische Entwicklung und seiner Methodik möglicherweise erschließen und in Worte fassen kann.

**Community Management of Opioid Overdose** World Health Organization, 2015-09-08 An estimated 69000 people die each year from opioid overdose. Opioid overdose is easily reversed with the opioid antidote naloxone and with basic life support. Such care is generally only available in medical settings, however. These guidelines recommend that people who are likely to witness an opioid overdose, including people who use opioids, and their family and friends should be given access to naloxone and training in its use so that they can respond to opioid overdose in an emergency if a medical response is not available. Naloxone can be injected or administered intra-nasally and has minimal effects in people who have not used opioids. While naloxone administered by bystanders is a potentially life-saving emergency interim response to opioid overdose, it should not be seen as a replacement for comprehensive medical care.

## *Atherosclerosis: Diet and Drugs* Arnold von

Eckardstein, 2014-11-28 Cardiovascular diseases continue to be

the leading cause of death in the majority of industrialized countries. The most frequent underlying pathology, namely atherosclerosis, and its clinical sequelae, namely coronary heart disease, cerebrovascular disease and peripheral artery disease, remain common although for a long time we have been made aware of avoidable or modifiable etiological factors such as smoking, fat-rich diet or lack of exercise, and although these adverse lifestyle factors have been extensively addressed by population-wide primary prevention programs. Cardiovascular morbidity and mortality also remain high despite successful anti-hypertensive and lipid lowering drug therapies which help to reduce cardiovascular morbidity and mortality by about 30% in both secondary and tertiary prevention settings. This can partly be explained by the increasing life expectancy and growing proportion of elderly people, especially in Europe and North America. In addition, the World Health Organization makes the alarming prediction that probably in response to the spreading of western dietary behavior and lack of exercise resulting in an increasing prevalence of diabetes, dyslipidemia and hypertension, cardiovascular diseases rather than infectious diseases will become the most frequent cause of death worldwide. This volume of the Handbook of Experimental Pharmacology entitled "Atherosclerosis" is divided into four parts and intends to give an overview on the pathogenesis of atherosclerosis, established treatment and prevention regimen, and of perspectives for the development of new treatment modalities.
