Zoom App: Security on Zoom Cloud Meeting Dr. Timothy Zahar, Bs. Lê Trọng Đại, These days, the COVID-19 pandemic has completely changed the lives of every citizen and every organization in society. Many cities, many countries implement social distance. Our class and meetings are done online. Many technology companies have joined hands, making it easy to study and meet, such as Zoom Cloud Meeting, Microsoft Teams, Google Meeting ... I myself have used all these 3 services. And I appreciate the simplicity and ease of use of the Zoom Cloud Meeting. Microsoft Teams and Google Meeting really took me a lot of time, and it was tiring to invite members to the online meeting. Especially when it was a brand new person, I had never known or connected to them before. Despite these days, the community is raising doubts about the security and honesty of Zoom. There have been reports of teachers saying their online lessons have been disturbed. There are strangers and bad guys taking part in online lessons, making noise, making graffiti, sending erotic materials, even sharing sex video screens to the whole class. That made the lesson pause. Even the Singaporean government has issued a regulation banning the use of the Zoom Cloud Meeting in online teaching for students. Upon digging in, I realized that all of these incidents were caused by the teacher - who organized the online lesson - not really taking full advantage of Zoom's security options. Those customizations are very simple and you can do it in less than 3 minutes. And then, your online teaching with Zoom is really simple and effective. So in this book, I will guide you: 1. How to sign up for a new Zoom account, to ensure maximum privacy. Completely separate Zoom from your other accounts, such as Email, Facebook, Twitter, Paypal... 2. How to set customizations so that when you - a teacher - organize an online lesson, it will be impossible for strangers to scribble, send sex photos, send sex files, share sex screens in your online classroom. 3. The outstanding benefits of the Zoom help your business grow faster on the Internet. I believe that, after my tutorial, you will confidently use Zoom and really loved it. Let's get started! Dr. Timothy Zahar

Zoom's functionality and host of built-in collaboration tools are examined from the perspective of schoolmen and teachers alike, acknowledging both those working for an institution such as a college or high school, as well as the more entrepreneurial educators who prefer to tutor privately. Zoom is an increasingly-popular piece of video-conferencing software that helps millions of people come together worldwide. From small businesses to grand organizations, Zoom is there to enable face-to-face communication across any distance. As a teacher, you likely understand the importance of body language and facial expression when trying to ensure that a lesson sinks into a student's brain; even more so if you've ever had to grade an oral presentation. You are likely painfully aware that emails or phone calls just do not cut it when trying to give assignments to students remotely, as several of the tools required to make an engaging and impactful session simply do not transfer through. Even if you're the best transactional writer in the world, how do you reinforce the right tone for all of your students? How do you ensure that an academic atmosphere will manifest in a student's home or apartment when you're trying to communicate from many miles away? Some learn better through reading, some through listening, and some through observing. Through Zoom's high-quality video rendering, screen-sharing, and annotation features you will give your students the opportunity to learn through observation. Zoom's crisp audio and ability to let you interface with hundreds of students at once will ensure that you can give your classes the opportunity to learn through listening. And for those who prefer reading, or those who were ill or lost connectivity? Through this book, you can learn how to record your Zoom meetings, letting you send audio and video files containing your lesson to students, so that they may write down their own notes on them. As a teacher, this book will show you: How to set up your very own virtual classrooms using Zoom How you can use Zoom's tools to ensure class discipline, much like if you were there yourself How to use Zoom's Breakout Rooms to facilitate group projects How to keep your online meetings safe and secure for your students How easy it can be for anyone to join a Zoom meeting, even if they've never used the application before How to get the most out of Zoom's extensive list of ensuite tools How to easily share Powerpoints, PDFs, Word documents ... and more!
