Factors Determining the Price of Mobile Phones in the UK Market Caroline Mutuku,2018-07-04 Seminar paper from the year 2018 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: 1, , language: English, abstract: The UK mobile phone market is one of the most competitive markets in the world. This sector has developed and also expanded over the years and the increasing competition has resulted into falling consumer prices of the mobile phones. The increased competition in the UK mobile phone market has underpinned decline in their prices despite the increasing demand from the mobile users (Ofcom, 2014). New investments and innovations have been witnessed in the mobile market in the UK which has resulted into new products and network services hence increasing the choice by the consumers. The consumers view on the mobile market in the UK is that the prices of these products are favorable, and the prices are competitive because of the increasing number of players in the market (Ofcom, 2014). Research in the UK market, therefore, shows that the mobile phones prices have continued to fall despite the increasing demand from the mobile phones users. This forms the basis of this research to explain the factors that determine the prices of mobile phones in the UK an also examine why the prices have continued to fall despite the increasing demand from the users in the UK.

*The African Mobile Story* Knud Erik Skouby,Williams Idongesit,2022-09-01 Africa and especially Sub-Saharan Africa has during the past decade witnessed one of the fastest growing markets in mobile communication. This growth is recognized to have played a pivotal role in Africa's socio-economic development. It has had a huge impact on residential living patterns; on business networks and models; and on government services and income sources. The mobile industry has contributed more to economic growth than in any other comparable region globally introducing innovative, broadly used applications. Technical topics discussed in the book include:• Mobile Development in Sub-Saharan Africa;• Telecom Liberalization in Africa;• Role of Mobile in Socio-economic Development;• Mobile Applications in specific sectors;• Security in African Mobile;• Role of Prepaid in Africa

*Principles of Mobile Computing and Communications* Mazliza Othman,2007-11-30 Mobile computing technology has come a long way in recent years—providing anytime, anywhere communication and access to information. Bringing students up to date on important technological and industry developments, Principles of Mobile Computing and Communications examines mobile networks and relevant standards, highlighting issues unique to the mobile computing environment and exploring the differences between conventional and mobile applications. Going beyond discussions on wireless network infrastructure and how to develop enterprise mobile applications, this textbook considers pervasive computing and smart environments, the complexity of designing and developing such applications, and how issues are dependent on the context of the applications. Following an overview of what mobile computing has to offer and how its applications affect both our professional and personal lives, it focuses on the technologies and the infrastructure of all mobile and wireless networks, cellular networks, WLANs, WPANs, and sensor and mobile ad hoc networks. The textbook then discusses the Mobile IP, adaptive behavior, power management, resource constraints, interface design, seamless mobility support, and locating sensing techniques and systems. It also discusses important security issues that concern all users regardless of applications employed.

**Ringtone** Yves Doz,Keeley Wilson,2018-01-26 In less than three decades, Nokia emerged from Finland to lead the mobile phone revolution. It grew to have one of the most recognizable and valuable brands in the world and then fell into decline, leading to the sale of its mobile phone business to Microsoft. This book explores and analyzes that journey and distils observations and learning points for anyone keen to understand what drove Nokia's amazing success and sudden downfall. With privileged access to Nokia's senior managers over the last twenty years followed by a more concerted research agenda from 2015, the authors describe and analyze, the various stages in Nokia's journey. The book describes leaders making strategic and organizational decisions, their behavior and interactions, and how they succeeded and failed to inspire and engage their employees. Perhaps most intriguingly, it opens the proverbial 'black box' of why and how things actually happen at the top of organizations. Why did things fall apart? To what extent were avoidable mistakes made? Did the world around Nokia change too fast for it to adapt? And, did Nokia's success contain the seeds of its failure?

**Mobile Minded** Geert Lovink,2002 Another thought provoking collection of biting visual commentary on a 21st century social and business phenomenon: the mobile phone. Is the body becoming our interface? Are there mobile borders? Does the notion that we are linked to virtually every communications medium through handheld technology mean that no place is sacred? All these questions and more are posed in Mobile Minded, a brilliant new manifesto in which Mieke Gerritzen (Everyone is a Designer and Catalogue of Strategies) and friends express their varied and sometimes diametrically opposed opinions in short, sharp maxims, questions and declarations. The mobile phone is one of the most powerful communications media ever to have emerged. It has changed the face of business throughout the developed world and changed the way in which hundreds of millions of people socially interact.

Factors Affecting Mobile Phone Brand Preference. Empirical Study on Sri Lankan University Students Mohamed Ismail Mohamed Riyath,Sulaima Lebbe Musthafa,2015-10-27 Research Paper from the year 2014 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, course: Management, language: English, abstract: This study gives an insight into the mobile market

industry in Sri Lanka. Mobile phone manufactures and marketers are facing hyper competition in Sri Lanka as well as in the world mobile market. Mobile phone marketers should have a clear idea about the factors which are affecting the choice of mobile phones. In order to get more market share and win whole hard of the potential consumers and stakeholders they have to design, produce, communicate and promote the mobile phone in the best possible manner. This study aims to find out the factors which are affecting the choice of a particular mobile brand when a purchase decision is made with reference to Sri Lankan university students. The primary data was collected through an online-based questionnaire sent to randomly selected students who are following any program of study in universities island-wide. Descriptive statistics; mean and standard deviation are used to identify the factors which are affecting the mobile brand preference. Price, stylish appearances and perceived quality are found as very important factors on purchase decision when selecting a mobile phone brand.
