Zurich, Switzerland Liam Richards, 2019-12-05 Zurich, Switzerland. Tourism Information. Zurich has a unique position in Switzerland. It is the country's largest city and home to an internationally reputed financial centre as well as being the focus of an economic region which acts as the motor of Switzerland, and along with Geneva is the most important gateway to the country. The wide variety of cultural activities and educational institutions define Zurich's character as a diverse, open city with a passion for life. Zurich is the capital of the canton of the same name and the centre of a number of regions which together have some 1.9 million inhabitants. It is famous for its lakeside location and green, densely wooded chain of hills which run through the city from north to south. Zurich's place on the world stage does not come down to its size but to its strong international networks. The high standards of living, working and accommodation are regularly confirmed in surveys of the local residents, and Zurich consistently finds itself at the top of international rankings of cities in terms of quality of life. The City of Zürich regularly occupies the top spots in rankings of cities based on quality of life, and with good reason. It has attractive working and residential areas that are filled with greenery and have good access to the lake, rivers, hills and forests. Additionally noticeable progress has been made over the past two decades in terms of environmental quality. The current variety and quality of the cultural offer in Zürich is most impressive. The city's cultural spectrum was marked in the 1970s by the opera house, theatre, art gallery, concert hall and various cinemas, but over the past 25 years it has taken on an almost unbelievable life of its own. Zürich has centres and niches for the avant-garde and the

unconventional from every sector of culture.

Sport, Events, Tourism and Regeneration Nicholas Wise, John Harris, 2017-02-17 Investments in sport, events and tourism in cities and wider regions are part of nascent regeneration strategies linked to transitioning economic bases and place images. While it is important to consider physical regeneration, there is a range of subsequent benefits and opportunities brought about through regeneration that considers social impacts, communities and how investments and developments influence how people interact in transformed spaces. This book brings together a collection focusing on the diverse range of approaches and perspectives of regeneration.

Twelve chapters outline and bring together critical perspectives of regeneration from scholars in different parts of the world. This collection critically assesses some of the key factors impacting upon regeneration initiatives in relation to sport, events and tourism. By doing so, this book assesses if new opportunities have arisen from developments, increasing the demands and needs of locals and tourists, or if transformations result in exclusion – thus challenging who regeneration is for. This book will be valuable reading for students and academics interested in tourism studies, events planning, sport and leisure studies or development studies, as well as the wider social sciences.

Health Tourism in Switzerland Laura Klöpping, 2012 Studienarbeit aus dem Jahr 2012 im Fachbereich Touristik / Tourismus, Note: 1,3, Fachhochschule Stralsund, Veranstaltung: Health Tourism, Sprache: Deutsch, Abstract: Since the 1980s, the European health tourism is in a phase of complete change. Starting with cures, we are nowadays confronted with a wide range of wellness tourism offers. Today not only health resorts, spas or wellness hotels can be found on the market. Also theme parks, hotel chains and club destinations draw closer to health oriented tourism. Switzerland does really have huge possibilities within the health tourism sector and the tourism sector in general. Its most important strengths are landscape, alpine and Mediterranean climate, a great range of offers (summer/winter), manageable cities with attractive cultural offers, cleanliness, a good infrastructure and a central position within Europe. But there are also some considerable market weaknesses, that have to be regarded: high-priced image, unfavorable foreign exchange rates, treacherous weather, high investment needs and missing hospitality and openness. However, the very positive image as a holiday country, a sound nature and high reputation in the medical and also political sector (medical infrastructure, security, stability, protected privacy) give Switzerland ideal assumptions for the international competition.

Tourism and Nature Conservation in Malaysian National Parks Norman

Backhaus,2006 Malaysia features some of the most spectacular national parks in the world. The parks - most are hotspots of biodiversity - have become a major attraction for foreign and increasingly domestic tourists. Nature tourism is at the same time a source of revenues and a threat to the environmental integrity of conservation areas. This study - based on the theory of structuration and using a triangulation of methods - analyses (eco)tourism in Malaysian national parks from different angles by asking different groups of tourists and experts about their opinions, experiences and needs. In order to learn more about the often neglected group of domestic tourists a large survey was conducted in Kuala Lumpur. The needs of foreign individual and group travellers were analysed with a questionnaire in Gunung Mulu National Park. And experts of conservation and tourism (i.e. scientists, park managers, tour operators, exponents of NGOs) were asked to assess the state and potential of ecotourism in Malaysian national parks. Results show that the increasing heterogeneity and number of visitors and their different needs can put a strain on the environmental integrity of conservation areas. This study makes recommendations to mitigate such strains and to further sustainable tourism.
