Social Housing in Europe Kathleen Scanlon, Christine Whitehead, Melissa Fernández Arrigoitia, 2014-09-29 All countries aim to improve housing conditions for their citizens but many have been forced by the financial crisis to reduce government expenditure. Social housing is at the crux of this tension. Policy-makers, practitioners and academics want to know how other systems work and are looking for something written in clear English, where there is a depth of understanding of the literature in other languages and direct contributions from country experts across the continent. Social Housing in Europe combines a comparative overview of European social housing written by scholars with in-depth chapters written by international housing experts. The countries covered include Austria, Denmark, England, France, Germany, Hungary, Ireland, The Netherlands and Sweden, with a further chapter devoted to CEE countries other than Hungary. The book provides an up-to-date international comparison of social housing policy and practice. It offers an analysis of how the social housing system currently works in each country, supported by relevant statistics. It identifies European trends in the sector, and opportunities for innovation and improvement. These country-specific chapters are accompanied by topical thematic chapters dealing with subjects such as the role of social housing in urban regeneration, the privatisation of social housing, financing models, and the impact of European Union state aid regulations on the definitions and financing of social housing.

Migration and (Im)Mobility Anna Xymena Wieczorek, 2018-03-31 In her endeavour to overcome the established methodological, conceptual, and empirical dualism of mobility and migration, Anna Xymena Wieczorek develops a

mobilities perspective by combining migration studies theories with approaches of the mobility studies. With the help of rich empirical data gathered among young adults of Polish heritage in Germany and Canada, Wieczorek conceptualizes three patterns of (im)mobility which illustrate the diversity of immigrants' geographical movements after their initial migration. She thus reveals the different social configurations promoting or hindering the development, maintenance or shifting of each pattern in migrants' biographical trajectories.

DAS SOZIALE LEBEN RUND UM UNBEWEGLICHE SACHEN Manfred Wasner, 2021-08-03 In der Wirklichkeit entwickeln sich die Dinge meist ganz anders, als unsere Schulweisheit das voraussetzt. In kurzen chronologisch geordneten Erinnerungen berichtet der Verfasser vom Menschlichen, - oft Erheiterndem, - ohne das es zu den geschilderten sozial bedeutenden Entwicklungen nicht gekommen wäre, - wie zur geförderten Sockelsanierung bewohnter Häuser und zu den vielen Wohnparks des Wohnen und Arbeiten in Wien. Dies soll dazu beitragen, sich den täglichen Aufgaben mit einer gewissen Lockerheit zu stellen, - im Privaten ebenso wie im im Beruflichen der unterschiedlichen Sparten.

Letters across Borders B. Elliot, D. Gerber, S. Sinke, 2006-09-02 This

collection addresses the recent rebirth of interest in immigrant letters. As these letters are increasingly seen as key, rather than incidental, documents in the interpretations of gender, age, social class, and ethnicity/nationality, the scholars gathered here demonstrate a diversity of new approaches to their interpretation.

Social Housing in Transition Countries Jozsef Hegedus, Martin Lux, Nóra Teller, 2013 This book examines the large-scale social housing programs begun in Eastern and Central Europe after 2000 as an attempt to mitigate the inequality and declining standards of living that took hold in the region after the wave of privatizations that accompanied the political turn of the 1990s. It provides both case studies and theoretical frameworks for evaluating their successes and failures.

Expanding Membership of the European Union Richard E. Baldwin, Pertti Haaparanta, Jaakko Kiander, 1995-10-27 This compelling volume, from the Centre for Economic Policy Research, examines the discussion surrounding expansion of the European Union (EU). The contributors address the key issues in the debate, including the implications of expansion for the global trading

system, enlargement-related pressures to reform EU decision-making, and the economic consequences of membership for entrants. Using theoretical techniques to report results and insights, this book not only sheds light on the consequences of Austria, Finland and Sweden joining the EU, but also discusses and evaluates the possible membership of Central European ex-socialist countries. This is an important book for students and scholars interested in regional integration, and also for policy-makers in the new EU member countries and in applicant countries.

Living Together Knut Stene-Johansen, Christian Refsum, Johan Schimanski, 2018-10 This volume contains new essays which investigate and actualize the concepts that Roland Barthes discussed in his 1977 lecture series, *How to Live Together*, at the Collège de France. The anthology presents original and thought-provoking approaches to questions of conviviality and idiorrhythmic life forms in literature, arts, and other media.

International Migration Law, 2004 Migration is increasingly being acknowledged as an issue that needs a global approach and coordinated responses. States are not only discussing migration issues at the bilateral level, but also regionally and lately in global arenas. A commonly understood language is indispensable for such coordination and international cooperation to be successful. This glossary attempts to serve as a guide to the mire of terms and concepts in the migration field, in an effort to provide a useful tool to the furtherance of such international cooperation and the common understanding of migration issues.

Re-Configurations Rachid Ouaisa, Friederike Pannewick, Alena Strohmaier, 2020-10-13 This edited volume is an open access title and

assembles both the historical consciousness and transformation of the MENA region in various disciplinary and topical facets. At the same time, it aims to go beyond the MENA region, contributing to critical debates on area studies while pointing out transregional and cultural references in a broad and comparative manner.

Inequality and the State John Hills, 2004-10-28 This book is about inequality, how the State affects distribution through its spending programmes and through taxation, and what the public thinks of these three issues. It describes and analyses one of the biggest social changes in Britain since the Second World War: the dramatic widening of the income distribution since the end of the 1970s, the growth of poverty, and the factors that have driven them. And it examines how government social spending and the taxes that pay for it affect this distribution, and why they take the forms they do. Each part of the discussion is set in the context of public attitudes as revealed by the rigorous and long-running British Social Attitudes survey, and of Britain's position by comparison with other countries. Against this background, the book analyses changes in policy since New Labour came to government in 1997, discusses the impacts of these changes, and looks at the constraints and pressures on future policies, before concluding with a discussion of the dilemmas facing policy-makers as they try to meet competing aims in reducing poverty and inequality, growing demands on social spending, and the constraints and opportunities created by public attitudes.

Writing on the Wall Philip Van Notten, 2005 Although the significance of '9/11' is subject to debate, it is symbolic of a general sentiment of discontinuity whereby society is vulnerable to undefined and highly

disruptive events. Recent catalysts of this sentiment are eye-catching developments such as the SARS (Severe Acute Respiratory Syndrome) and bird flu outbreaks, the Enron and Parmalat scandals, political assassinations in Sweden and the Netherlands, regime changes in Iraq and Afghanistan, and terrorist attacks in Bali, Istanbul, Madrid, and various parts of the Middle East. However, recent discontinuities should not be seen as evidence that discontinuities occur more frequently now than they did before. Looking back in history we see that disruptive processes are common. For example, 25 years ago few Europeans would have predicted the upcoming upheavals on their own continent: the collapse of communism, Berlin as the capital of a reunited Germany, the wars in the former Yugoslavia, the single European currency, and the near doubling of the number of European Union member states. Changes elsewhere have been no less discontinuous and unforeseen: the fall of the Asian tigers, the emergence of the Internet and mobile telecommunication, and the presidency of Nelson Mandela. Societal discontinuity is a relatively new area of concern in policy development. Since the 1970s the consideration of change and discontinuity has gained some ground over predictive forecasting, which tended to reason from continuous developments and linear processes. Rather than making forecasting the future, it has become popular to use scenarios as a manner to consider several possible futures. Scenarios are coherent descriptions of alternative hypothetical futures that reflect different perspectives on past, present, and future developments, which can serve as a basis for action. Scenario development aims to combine analytical knowledge with creative thinking in an effort to capture a wide range of possible future developments in a limited number of outlooks. Scenario development assumes that the future is uncertain and the directions in which

current developments might range from the conventional to the revolutionary. In theory, scenario development is a way to consider future discontinuity. However, there are indications that the theoretical promise is not reflected in scenario practice. Research has shown that scenarios do not consider the idea of discontinuity as a matter of course. In our research, we found that a scenario study would benefit from efforts to create and foster a 'culture of curiosity' for exploring the future and the possible discontinuities rather than simply commissioning a scenario study to provide insights about the future. Only then can one read the writing on the wall of future developments.

How to Live Together Roland Barthes, 2013-01-08 Notes for a lecture course and seminar at Collaage de France (1976-1977)-- T.p

Sociable Cities Peter Hall, Colin Ward, 2014-06-05 Peter Hall and Colin Ward wrote Sociable Cities to celebrate the centenary of publication of Ebenezer Howard's To-morrow: A Peaceful Path to Real Reform in 1998 - an event they then marked by co-editing (with Dennis Hardy) the magnificent annotated facsimile edition of Howard's original, long lost and very scarce, in 2003. In this revised edition of Sociable Cities, sadly now without Colin Ward, Peter Hall writes: 'the sixteen years separating the two editions of this book seem almost like geological time. Revisiting the 1998 edition is like going back deep into ancient history'. The glad confident morning following Tony Blair's election has been followed by political disillusionment, the fiscal crash, widespread austerity and a marked anti-planning stance on the part of the Coalition government. But - closely following the argument of Good Cities, Better Lives: How Europe discovered the Lost Art of Urbanism (Routledge 2013), to which this book is designed as a companion - Hall argues

that the central message is now even stronger: we need more planning, not less. And this planning needs to be driven by broad, high-level strategic visions – national, regional – of the kind of country we want to see. Above all, Hall shows in the concluding chapters, Britain's escalating housing crisis can be resolved only by a massive programme of planned decentralization from London, at least equal in scale to the great Abercrombie plan seventy years ago. He sets out a picture of great new city clusters at the periphery of South East England, sustainably self-sufficient in their daily patterns of living and working, but linked to the capital by new high-speed rail services. This is a book that every planner, and every serious student of policy-making, will want to read. Published at a time when the political parties are preparing their policy manifestos, it is designed to make a major contribution to a major national debate.

Migration and Islamic Ethics , 2019-11-11 Migration and Islamic Ethics, Issues of Residence, Naturalization and Citizenship addresses how Islamic ethical and legal traditions can contribute to current global debates on migration and displacement; how Islamic ethics of mu'akha, qiyāfa, ijāra, amān, jiwār, sutra, kafāla, among others, may provide common ethical grounds for a new paradigm of social and political virtues applicable to all humanity, not only Muslims. The present volume more broadly defines the Islamic tradition to cover not only theology but also to encompass ethics, customs and social norms, as well as modern political, humanitarian and rights discourses. The first section addresses theorizations and conceptualizations using contemporary Islamic examples, mainly in the treatment of asylum-seekers and refugees; the second, contains empirical analyses of contemporary case studies; the third provides historical accounts

of Muslim migratory experiences. Contributors are: Abbas Barzegar, Abdul Jaleel, Dina Taha, Khalid Abou El Fadl, Mettursun Beydulla, Radhika Kanchana, Ray Jureidini, Rebecca Gould, Said Fares Hassan, Sari Hanafi, Tahir Zaman.

Stories of the "Boring Border" Anke Strüver, 2005 This book examines the 'open' Dutch-German border and people's everyday practices in relation to this border within the context of Dutch-German relations and the process of European integration. It concentrates on people's perceptions of the 'open' Dutch-German border and people's practices of crossing it - or not. The work also introduces new methodologies and forms of border research, e.g. on borders in people's minds, which are concerned with the construction of bordered spaces and the performed manners of nationalised daily routines. In this context, borders are framed as constructed by narratives and images, but also as representations themselves - as part of popular imaginations.

The Hanoverian Dimension in British History, 1714-1837 Brendan Simms, Torsten Rott, 2010-06-24 For more than 120 years (1714-1837) Great Britain was linked to the German Electorate, later Kingdom, of Hanover through Personal Union. This made Britain a continental European state in many respects, and diluted her sense of insular apartness. The geopolitical focus of Britain was now as much on Germany, on the Elbe and the Weser as it was on the Channel or overseas. At the same time, the Hanoverian connection was a major and highly controversial factor in British high politics and popular political debate. This volume was the first systematically to explore the subject by a team of experts drawn from the UK, US and Germany. They integrate the burgeoning specialist literature on aspects of the Personal Union into the broader history of eighteenth- and early nineteenth-century Britain. Never before had the impact of the Hanoverian connection on British

politics, monarchy and the public sphere, been so thoroughly investigated.
