Quest for Economic Empire Volker Berghahn,1996 German unification evoked ambivalent reactions outside its borders: it revived disquieting memories of attempts by German big business during the two world wars to build an economic empire in Europe in conjunction with the military and the government bureaucracy. But there are also high hopes that German finance and industry will serve as the engine of reconstruction in eastern Europe, just as it played this role in the postwar unification of western Europe.

Das ZVEI- und das RL-Kennzahlensystem. Erläuterung und Beurteilung Philipp Orth,2015-12-29 Studienarbeit aus dem Jahr 2015 im Fachbereich BWL - Controlling, Note: 1,7, Fachhochschule Bielefeld, Sprache: Deutsch, Abstract: Die vorliegende Arbeit wurde im Modul „Operatives Controlling“ der FH Bielefeld angefertigt und beschreibt das ZVEI-Kennzahlensystem sowie das RL-Kennzahlensystem. Das zweite Kapitel thematisiert das RL-Kennzahlensystem. Einführend wird der Aufbau dieses Kennzahlensystems beschrieben, anschließend werden der allgemeine und der Sonderteil erläutert. Beide Beschreibungen schließen mit einer kritischen Würdigung des jeweiligen Kennzahlensystems. Im abschließenden dritten Kapitel werden die in der Arbeit beschriebenen Kennzahlensysteme einander synoptisch gegenübergestellt.

Wiring Europe Giorgio Natalicchi,2001 Involving both integration and liberalization, the state of telecommunications in Europe has undergone radical change in the past few years. Natalicchi (political science, U. of Florence, Italy) examines the external and internal forces of change originating from international, national, and European Union levels. He argues that the EU is a polycentric and multilayered polity and that multiple mechanisms determine integrative steps and policy outcomes. Annotation copyrighted by Book News, Inc., Portland, OR

Electrical Systems and Equipment D.J. Littler,2014-03-14 Electrical Systems and Equipment is the work of some 50 electrical design specialists in the power engineering field based largely on the work and experience of GDCD's (Generation Development and Constructor Division of the CEGB) Electrical Branch. The volume describes the design philosophies and techniques of power engineering, the solutions to the large number of design problems encountered

and the plant which has been chosen and developed to equip electrical systems both within the different types of new power station, and modification tasks at existing stations.

How Computers Entered the Classroom, 1960–2000 Carmen Flury, Michael Geiss, 2023-06-19 In the history of education, the question of how computers were introduced into European classrooms has so far been largely neglected. This edited volume strives to address this gap. The contributions shed light on the computerization of education from a historical perspective, by attending closely to the different actors involved – such as politicians, computer manufacturers, teachers, and students –, political rationales and ideologies, as well as financial, political, or organizational structures and relations. The case studies highlight differences in political and economic power, as well as in ideological reasoning and the priorities set by different stakeholders in the process of introducing computers into education. However, the contributions also demonstrate that simple cold war narratives fail to capture the complex dynamics and entanglements in the history of computers as an educational technology and a subject taught in schools. The edited volume thus provides a comprehensive historical understanding of the role of education in an emerging digital society.

ECODESIGN -- The Competitive Advantage Wolfgang Wimmer, Kun Mo LEE, John Polak, Ferdinand Quella, 2010-09-11 Dealing with environmental issues should no longer be considered simply as a cost of doing business. Effective environmental improvements to a company's products and services can be turned into business opportunities. This book was written with the express purpose of helping managers of companies, in particular of Small to Medium sized Enterprises (SMEs), to better deal with environmental challenges and address customer requirements, all in order to turn their environmental investments into competitive market advantages. Several examples are provided throughout the book, but also warning signs (Alert Boxes). These "Alerts" are posted to help managers avoid typical traps when working with environmental considerations in business processes. The authors have many years of experience in the various aspects of implementing Ecodesign. This experience includes working in industry for many years; leading the environmental departments in a multinational company; managing research projects in eco-product development; Life Cycle Assessment; and national and international environmental communication and marketing. This book is the latest in a series. The 2002 "Ecodesign Pilot" introduced a tool and software to help design more environmentally compatible products. It was directed specifically at designers. The 2004 book, "Ecodesign Implementation", was written to help project managers optimize product development processes from an environmental perspective.

Controlling and Berlin Balanced Scorecard Approach Wilhelm Schmeisser, Lydia Clausen, Rebecca Popp, Carsten Ennemann, Olaf Drewicke, 2012-09-17 The "Harvard Balanced Scorecard model" by Kaplan and Norton wishes to make strategies communicable and more manageable for companies across all management levels within the company. To this effect, the balanced scorecard is a qualitative controlling or performance management instrument.

States and Firms Razeen Sally, 2013-08-21 States and Firms is a study in the political economy of the multinational enterprise. It looks at the internationalisation in the 1980s of the twelve leading French and German-owned multinational enterprises in chemicals and electronics, who form part of a European Challenge in international competition in technology-intensive sectors. The book examines how and why the internationalisation of these MNEs has

interacted with their embeddedness in the domestic structures of their home countries (France and Germany) particularly in terms of their power relationships with home governments and financial institutions. The primary themes are the MNEs' roles as political actors; domestic government policy vis-a-vis the MNEs; MNEs' financial relationships with banks in France and Germany; MNE political activity at the level of the European Union, especially evident in technology policy. The primary contribution of this book is an inclusion of a firm-level approach to put the spotlight on fundamental questions of political economy and international business.

Energy Efficiency in Industry Markus Blesl, Alois Kessler, 2022-01-01 This book quantifies the potential for greater energy efficiency in industry on the basis of technology- and sector-related analyses. Starting from the methodological fundamentals, the first part discusses the electricity- and heat-based basic technologies and cross-sectional processes on the basis of numerous application examples. In addition to classic topics such as lighting and heat recovery, the study also covers processes that have received less attention to date, such as drying and painting. The second part is devoted to energy-intensive industries, in particular metal production and processing, the manufacture of the non-metallic materials cement and glass, and the chemical, paper, plastics and food industries. Both parts are concluded by placing them in a larger energy and economic context. The findings are condensed into checklists at many points and summarized

in the overall view at the end to form generally applicable recommendations. This book is a translation of the original German 2nd edition *Energieeffizienz in der Industrie* by Markus Blesl and Alois Kessler, published by Springer-Verlag GmbH Germany, part of Springer Nature in 2017. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation. Springer Nature works continuously to further the development of tools for the production of books and on the related technologies to support the authors.
