A Media Epigraphy of Video Compression Marek Jancovic, 2023-07-29 This book explores the historical interrelationships between mathematics, medicine and media, and offers a unique perspective on how video compression has shaped our relationship with moving images and the world. It situates compression in a network of technological, visual and epistemic practices spanning from late 18th-century computational methods to the standardization of electrical infrastructure and the development of neurology throughout the 1900s. Bringing into conversation media archaeology, science and technology studies, disability studies and queer theory, each chapter offers an in-depth look at a different trace of compression, such as interlacing, macroblocking or flicker. This is a story of forgotten technologies, unusual media practices, strange images on the margins of visual culture and inventive ways of looking at the world. Readers will find illuminating discussions of the formation of complex scientific and medical systems, and of the violent and pleasurable interactions between our bodies and media infrastructure.

Video Theory Andreas Treske, 2015-04-30 Video is a part of everyday life, comparable to driving a car or taking a shower. It is nearly omnipresent, available on demand and attached to nearby anything, anywhere. Online Video became something vital and independent. With all the video created by the cameras around us, constantly uploading, sharing, linking, and relating, a blue ocean is covering our planet, an ocean of video. What might look as bluish noise and dust from the far outside, might embed beautiful and fascinating living scapes of moving images, objects constantly changing, re-arranging, assembling, evolving, collapsing, but never disappearing, a real cinema. Andreas Treske describes and theorizes these objects formerly named video, their forms, behaviours and properties.

Drawing on his twenty years of experience working with inner-city youth at the acclaimed Educational Video Center (EVC) in New York City, Steven Goodman looks closely at both the problems and possibilities of this model of media education. Responding to our national concern about adolescents, literacy, media, and violence, *Teaching Youth Media*: Describes the changes schools and after-school programs need to make in order to create a media education that empowers students to change their world; Explores the intersection of literacy and culture as youth learn to analyze information from a variety of sources, including television, newspapers, books, films, school, church, and lives outside of school; Features case studies of students and teachers engaged in making video documentaries at EVC and in an alternative high school; Illuminates the practical day-to-day challenges faced by professional developers and teachers working to change the way education is practiced in their classes and schools.

Writing on the Wall Tom Standage, 2013-10-10 Today we are endlessly connected: constantly tweeting, texting or e-mailing. This may seem unprecedented, yet it is not. Throughout history, information has been spread through social networks, with far-reaching social and political effects. *Writing on the Wall* reveals how an elaborate network of letter exchanges forewarned of power shifts in Cicero's Rome, while the torrent of tracts circulating in sixteenth-century Germany triggered the Reformation. Standage traces the story of the rise, fall and rebirth of social media over the past 2,000 years offering an illuminating perspective on the history of media, and revealing that social networks do not merely connect us today – they also link us to the past.

The methodology presented will provide insights beneficial to students and current practitioners of media server technology, screens producers, and video content developers. Using real world examples of internationally recognized productions, a foundation is laid for best practices in Media Operations. Music Video After MTV Mathias Bonde Korsgaard, 2017-05-18 Since the 1980s, music videos have been everywhere, and today almost all of the most-viewed clips on YouTube are music videos. However, in academia, music videos do not currently share this popularity. *Music Video After MTV* gives music video its due academic credit by exploring the changing landscapes surrounding post-millennial music video. Across seven chapters, the book addresses core issues relating to the study of music videos, including the history, analysis, and audiovisual aesthetics of music videos. Moreover, the book is the first of its kind to truly address the recent changes following the digitization of music video, including its changing cycles of production, distribution and reception, the influence of music videos on other media, and the rise of new types of online music video. Approaching music videos from a composite theoretical framework, *Music Video After MTV* brings music video research up to speed in several areas: it offers the first account of the research history of music videos, the first truly audiovisual approach to music video studies and it presents numerous inspiring case studies, ranging from classics by Michel Gondry and Chris Cunningham to recent experimental and interactive videos that interrogate the very limits of music video.
