The Personalization Paradox Val Swisher, Regina Lynn Preciado, 2021-03-08 According to Infosys, 86% of consumers surveyed indicated that personalized content has some impact on what they purchase and 25% said that personalization plays a large role in their purchases. And yet, looking at the data, two things stand out: Most companies say that personalizing the customer experience is a critical must have, and they have the statistics to back it up. Very few companies believe they are delivering enough personalized content, or deliver it well. What's holding these companies back from their personalization goals? And how can you avoid the pitfalls and make personalization possible with your own enterprise content? In this book, global content strategy expert Val Swisher and senior content strategist Regina Lynn Preciado show you exactly what it takes to deliver personalized experiences at scale. You'll learn: Why personalized content is imperative to the enterprise Why so many companies fail to deliver - and how to avoid the pitfalls The five dimensions of content standardization How to bring people, technology, and process together The impact of big data and artificial intelligence The only way to deliver personalized content at scale is to automate the process at the point of delivery. And for that to work, you've got to change how you do content. The Personalization Paradox: Why Companies Fail (and How to Succeed) at Delivering Personalized Experiences at Scale shows you how.

Personalized Machine Learning Julian McAuley,2022-01-31 Every day we interact with machine learning systems offering individualized predictions for our entertainment, social connections, purchases, or health. These involve several modalities of data, from sequences of clicks to text, images, and social interactions. This book introduces common principles and methods that underpin the design of personalized predictive models for a variety of settings and modalities. The book begins by revising 'traditional' machine learning models, focusing on adapting them to settings involving user data, then presents techniques based on advanced principles such as matrix factorization, deep learning, and generative modeling, and concludes with a detailed study of the consequences and risks of deploying personalized predictive systems. A series of case studies in domains ranging from e-commerce to health plus hands-on projects and code examples will give readers understanding and experience with large-scale real-world datasets and the ability to design models and systems for a wide range of applications.

The Personalization of the Museum Visit Seph Rodney,2019-05-13 The Personalization of the Museum Visit examines a fundamental shift in institutional behavior in museums located in the United States and the United Kingdom. Contending that art museums have moved toward a new paradigm of public engagement, it posits that modern museum visitors are treated as self-directed clients, with the agency to make meaning for themselves. The book then considers how this change has come about, examining factors such as the onset of a new museology, an experience economy, and a marketing revolution. Drawing on extensive research undertaken at Britain's Tate Modern, the book

examines a range of issues, including visitor engagement, curatorial practice, and museum management. A visit experience that is customizable to the individual visitor, in which curators and marketers work together with visitor-clients to create an experience of personalized meaning, is, Rodney argues, rising in prevalence in the art museum field, but it is also being stymied by certain structural impediments. This book examines such obstacles, including institutional division of labor, long-standing conceptions, or misconceptions, of the museum's mission, and the orientation of museums toward a certain conceptual model of their visitors. The Personalization of the Museum Visit is essential reading for scholars and students engaging with issues of visitor engagement, curatorial practice, and museum management. With a particular focus on the role of business interests and public policy, the book should also be of interest to those undertaking research in fields outside of museum and visitor studies.

Hayduke Lives! Edward Abbey, 2011-08-21 “Abbey’s latter-day Luddites, introduced in his novel *The Monkey Wrench Gang*, are back—and not a moment too soon” (The New York Times). George Washington Hayduke, ex-Green Beret, was last seen clinging to a rock face in the wilds of Utah as an armed posse hunted him down for his eco-radical crimes. Now he’s back, with a fiery need for vengeance . . . This sequel to Edward Abbey’s cult classic brings back the old gang of environmental warriors, as they battle a fundamentalist preacher intent on turning the Grand Canyon into a uranium mine—in “a fine novel, combative and comic, anarchistic and ultimately redemptive” (Albuquerque Journal). “I laughed out loud reading this book.” —Los Angeles Times Book Review

Web Personalization in Intelligent Environments

Giovanna Castellano, Anna Maria Fanelli, 2009-09-14 At first sight, the concept of web personalization looks deceptively simple. A web personalization system is a software component that collects information on visitors to a web site and leverages this knowledge to deliver them the right content, tailoring presentation to the user's needs. All over the world, web designers and web content managers rely on web personalization solutions to improve the effectiveness and - ability of their web-based applications. Still, the scientific foundation of web personalization remains a controversial issue. Practitioners know very well that when properly implemented, personalization delivers a much better user

experience; but when it is poorly implemented, personalization may backfire and even distract the user's attention away from some useful (and co- ly-to-develop) enriched content. In other words, tailoring content, and varying it routinely, may make a site more attractive; but an unstable site look can have a negative impact on the overall m- sage. Everybody seems to agree that this is a real danger; but there are specific qu- tions that are much harder to answer convincingly.

I Ruff You (Made with Love) Sandra Magsamen,2016-11-29 Using colorful images and rhyming text, describes how a mother dog loves everything about her puppy, from its ears to the tips of its toes.
