Does the identification number 1035 indicate ethane or butane? What is the difference between natural gas transmission pipelines and natural gas distribution pipelines? Computer Networking James F. Kurose,Keith W. Ross,2005 Computer Networkingprovides a top-down approach to this study by beginning with applications-level protocols and then working down the protocol stack. Focuses on a specific motivating example of a network-the Internet-as well as introducing students to protocols in a more theoretical context. New short interlude on putting it all together that follows the coverage of application, transport, network, and datalink layers ties together the various components of the Internet architecture and identifying aspects of the architecture that have made the Internet so successful. A new chapter covers wireless and mobile networking, including in-depth coverage of Wi-Fi, Mobile IP and GSM. Also included is expanded coverage on BGP, wireless security and DNS. This book is designed for readers who need to learn the fundamentals of computer networking. It also has extensive material, on the very latest technology, making it of great interest to networking professionals.

[Film Noir](#) William Luhr,2012-03-05 Film Noir offers new perspectives on this highly popular and influential film genre, providing a useful overview of its historical evolution and the many critical debates over its stylistic elements. Brings together a range of perspectives on a topic that has been much discussed but remains notoriously ill-defined Traces the historical development of the genre, usefully exploring the relations between the films of the 1940s and 1950s that established the noir universe and the more recent films in which it has been frequently revived Employs a clear and intelligent writing style that makes this the perfect introduction to the genre Offers a thorough and engaging analysis of this popular area of film studies for students and scholars Presents an in-depth analysis of six key films, each exemplifying important trends of film noir: Murder, My Sweet; Out of the Past; Kiss Me Deadly; The Long Goodbye; Chinatown; and Seven

[Maelstrom](#) Peter Watts,2009-01-06 Second in the Rifters Trilogy, Hugo Award-winning author Peter Watts' Maelstrom is a terrifying explosion of cyberpunk noir. This is the way the world ends: A nuclear strike on a deep sea vent. The target was an ancient microbe—voracious enough to drive the whole biosphere to extinction—and a handful of amphibious humans called rifters who'd inadvertently released it from three billion years of solitary confinement. The resulting tsunami killed millions. It's not as though there was a choice: saving the world excuses almost any degree of collateral damage. Unless, of course, you miss the target. Now North America's west coast lies in ruins. Millions of refugees rally around a mythical figure mysteriously risen from the deep sea. A world already wobbling towards collapse barely notices the spread of one more blight along its shores. And buried in the seething fast-forward jungle that used to be called Internet, something vast and inhuman reaches out to a woman with empty white eyes and machinery in her chest. A woman driven by rage, and incubating Armageddon. Her name is Lenie Clarke. She's a rifter. She's not nearly as dead as everyone thinks. And the whole damn world is collateral damage as far as she's concerned. . . . At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Though she becomes deeply bonded to her new family, Lavinia is also slowly accepted into the world of the big house, where the master is absent and the mistress battles opium addiction. As time passes she finds herself perilously straddling two very different worlds and when loyalties are brought into question, dangerous truths are laid bare and lives are at risk.--Publisher's description.
