Film Noir William Luhr, 2012-03-05 *Film Noir* offers new perspectives on this highly popular and influential film genre, providing a useful overview of its historical evolution and the many critical debates over its stylistic elements. Brings together a range of perspectives on a topic that has been much discussed but remains notoriously ill-defined. Traces the historical development of the genre, usefully exploring the relations between the films of the 1940s and 1950s that established the noir universe and the more recent films in which it has been frequently revived. Employs a clear and intelligent writing style that makes this the perfect introduction to the genre. Offers a thorough and engaging analysis of this popular area of film studies for students and scholars. Presents an in-depth analysis of six key films, each exemplifying important trends of film noir: *Murder, My Sweet*; *Out of the Past*; *Kiss Me Deadly*; *The Long Goodbye*; *Chinatown*; and *Seven*

The Book of Formation Ross Simonini, 2017 This debut novel--told in interviews--spans 20 years in the rise and fall of the charismatic leader of a seductive self-help movement. In the 1990s, a talk show host leads the personality movement, an integrative approach to radical self-transformation. Mayah, the movement's architect and celebrity advocate, adopts a curious, wild child named Masha Isle. A guinea-pig for the movement, and the

key to its future, Isle is the subject of the eight interviews that comprise this book. As the interviewer's objectivity disintegrates--even as the movement's legitimacy becomes increasingly suspect--he becomes obsessed with Masha. And all of that is thrown into question when tragedy strikes. The stunning debut of a new literary talent, and a fascinating take on the cult of personality: about celebrities need to destroy and recreate themselves to stay relevant, public personalities coming to belong to everyone, and about our need to see everyone as a kind of celebrity.

Maelstrom Peter Watts, 2009-01-06 Second in the Rifiers Trilogy, Hugo Award-winning author Peter Watts' *Maelstrom* is a terrifying explosion of cyberpunk noir. This is the way the world ends: A nuclear strike on a deep sea vent. The target was an ancient microbe—voracious enough to drive the whole biosphere to extinction—and a handful of amphibious humans called rifiers who'd inadvertently released it from three billion years of solitary confinement. The resulting tsunami killed millions. It's not as though there was a choice: saving the world excuses almost any degree of collateral damage. Unless, of course, you miss the target. Now North America's west coast lies in ruins. Millions of refugees rally around a mythical figure mysteriously risen from the deep sea. A world already wobbling towards collapse barely notices the spread of one more blight along its shores. And buried in the seething fast-forward jungle that use to be called Internet, something vast and inhuman reaches out to a woman with empty white eyes and machinery in her chest. A woman driven by rage, and incubating Armageddon. Her name is Lenie Clarke. She's a rifier. She's not nearly as dead as everyone thinks. And the whole damn world is collateral damage as far as she's concerned. . . . At the Publisher's request,
