Film Noir William Luhr, 2012-03-05 Film Noir offers new perspectives on this highly popular and influential film genre, providing a useful overview of its historical evolution and the many critical debates over its stylistic elements. Brings together a range of perspectives on a topic that has been much discussed but remains notoriously ill-defined Traces the historical development of the genre, usefully exploring the relations between the films of the 1940s and 1950s that established the noir universe and the more recent films in which it has been frequently revived Employs a clear and intelligent writing style that makes this the perfect introduction to the genre Offers a thorough and engaging analysis of this popular area of film studies for students and scholars Presents an in-depth analysis of six key films, each exemplifying important trends of film noir: Murder, My Sweet; Out of the Past; Kiss Me Deadly; The Long Goodbye; Chinatown; and Seven

Maelstrom Peter Watts, 2009-01-06 Second in the Rifters Trilogy, Hugo Award-winning author Peter Watts' Maelstrom is a terrifying explosion of cyberpunk noir. This is the way the world ends: A nuclear strike on a deep sea vent. The target was an ancient microbe—voracious enough to drive the whole biosphere to extinction—and a handful of amphibious humans called rifters who'd inadvertently released it from three billion years of solitary confinement. The resulting tsunami killed millions. It's not as though there was a choice: saving the world excuses almost any

degree of collateral damage. Unless, of course, you miss the target. Now North America's west coast lies in ruins. Millions of refugees rally around a mythical figure mysteriously risen from the deep sea. A world already wobbling towards collapse barely notices the spread of one more blight along its shores. And buried in the seething fast-forward jungle that used to be called Internet, something vast and inhuman reaches out to a woman with empty white eyes and machinery in her chest. A woman driven by rage, and incubating Armageddon. Her name is Lenie Clarke. She's a rifter. She's not nearly as dead as everyone thinks. And the whole damn world is collateral damage as far as she's concerned. . . . At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Doing Magic Genevieve Davis, 2014-04-29 Doing Magic is book two of a complete course in becoming creator of your own exceptional life. In these two books, I outline the exact steps which enabled me to move my own life from one of poverty and drudgery, to one of previously unimaginable wealth, love, purpose and joy. 'But Magic? I do hope you are joking!' That's what I would have said, five or ten years ago. I once despised all things 'New-Age', all these spiritual types and their airy-fairy views, their bad science and their irrational beliefs. I read all the great Law of Attraction writers, Wallace Wattles, Anthony Robbins, Rhonda Byrne, Napoleon Hill, Esther Hicks and Wayne Dyer. But no matter how closely I followed their instructions for manifesting love, money or happiness, I couldn't make it work. It was only when I recognised, accepted and finally embraced that what I was doing was actually some kind of Magic that suddenly things began to fall into place. Once I realised that the power came from within me, it was as if the light had suddenly been switched on. I learned how to manifest money and love, but I also learned how to be happy, truly happy. If you're jaded by the whole New-Age idea of The Laws of Attraction, and have become bored by their failure to deliver... these books are for you. It is my intention to lead you by the hand through a marvellous journey of wonder and adventure. Part one of this course, Becoming Magic, laid the groundwork for becoming a magical person, while this second book, Doing Magic, offers concrete techniques and instructions for bringing wonderful things into your life. The plan is to build your knowledge slowly, gradually, building on what has gone before, moving on to more complex techniques only once the basics are mastered. So many people fail with Magic and the Law of Attraction because they rush headlong into using

techniques, trying to create enormous manifestations, making very simple but crucial mistakes. When they are disappointed, they imagine they have been duped. The sceptics are right. This is all a load of scammy nonsense. And they give up, declaring it just doesn't work. I am telling you that it does work. And you can make it work. And these books will show you how. My intention is that these books will allow you to become a true creator of your own life, reawakening and rekindling your belief and interest in The Laws of Attraction, Cosmic Ordering, Manifesting Reality or whatever you wish to call it. I prefer simply to call it Magic.

Mobile Wireless Middleware, Operating Systems and Applications - Workshops Cristian Hesselman, 2009-07-31
Software systems for wireless and mobile communications are a key component in pervasive computing and are crucial for the materialization of easy-to-use and intelligent services that people can use ubiquitously. As indicated by its acronym (MOBILe Wireless MiddleWARE, Operating Systems, and Applications), these are the type of systems that form the topic of the MOBILWARE conferencing series. In particular, the goal of MOBILWARE is to provide a forum for researchers and practitioners to disseminate and discuss recent advances in software systems for wireless and mobile communications, ranging from work on communication middleware and operating systems to networking protocols and applications. For its second edition, held in Berlin in April 2009, the MOBILWARE Organizing Committee decided to add a full day of workshops on topics related to the main conference. Our goals were threefold: 1. Put together a high-quality workshop program consisting of a few focused workshops that would provide ample time for discussion, thus enabling presenters to quickly advance their work and workshop attendees to quickly get an idea of ongoing work in selected research areas. 2. Provide a more complete picture of ongoing work by not only including technical workshops, but also workshops on business and user aspects. We expected that this multi-viewpoint approach would be an added value as technology, business models, and user experiences are usually interrelated. 3. Create a breeding ground for submissions for MOBILWARE 2010 and beyond.

Let the Dog Drive David Bowman, 1994 A New York Times Notable Book, this madcap odyssey tells of a hitchhiker of strange origin and a frenetic red-headed Detroit housewife as they experience it all--from tainted hallucinatory cacti in Texas to gunplay with Iranian terrorists in Coney Island. A freewheeling tale with sharp-edged wit and brilliantly chaotic style.

Diversity Programming for Digital Youth Jamie Campbell Naidoo, 2014-06-24 Combining information about outreach to diverse populations, selection of culturally diverse children's print and digital media, and library programming, this book is the tool librarians need to promote cultural understanding through engaging children's programs designed for today's culturally diverse youth. Today's children live in a culturally diverse and constantly changing digital world. New digital media is created every day but librarians and other educators need help in evaluating cultural content in digital apps, determining whether they send appropriate social messages to children, and learning how to use them in library programs that promote cultural competence. Diversity Programming for Digital Youth: Promoting Cultural Competence in the Children's Library provides just the help that is needed. This resource is the only one to examine the role of culturally diverse digital media and how it can be used with

children's books to promote cultural competence in the library. It provides annotated lists of digital media paired with culturally diverse literature to offer librarians and educators a springboard for creating enriching, engaging, and culturally relevant programs for children from diverse backgrounds. The sample digital storytime programs celebrating diverse cultures will benefit busy librarians looking for ways to engage reluctant readers in library storytimes.

Chapters from My Autobiography Mark Twain, 2009-12-01 Renowned American humorist Mark Twain turns his incisive wit loose on his own life story in this unique take on the nineteenth-century memoir. Originally composed in a format that studiously ignored the careful chronological structure that most autobiographies follow, these essays were first published in book form ten years after the author's death. Twain fans will love the author's account of his quintessentially American upbringing, wildly zig-zagging career path, and gradual transition into the writing life.
