Computer Networking James F. Kurose, Keith W. Ross, 2005 *Computer Networking* provides a top-down approach to this study by beginning with applications-level protocols and then working down the protocol stack. Focuses on a specific motivating example of a network-the Internet-as well as introducing students to protocols in a more theoretical context. New short interlude on putting it all together that follows the coverage of application, transport, network, and datalink layers ties together the various components of the Internet architecture and identifying aspects of the architecture that have made the Internet so successful. A new chapter covers wireless and mobile networking, including in-depth coverage of Wi-Fi, Mobile IP and GSM. Also included is expanded coverage on BGP, wireless security and DNS. This book is designed for readers who need to learn the fundamentals of computer networking. It also has extensive material, on the very latest technology, making it of great interest to networking professionals.

Film Noir William Luhr, 2012-03-05 *Film Noir* offers new perspectives on this highly popular and influential film genre, providing a useful overview of its historical evolution and the many critical debates over its stylistic elements. Brings together a range of perspectives on a topic that has been much discussed but remains notoriously ill-defined Traces the historical development of the genre, usefully exploring the relations between the films of the 1940s and 1950s that established the noir

universe and the more recent films in which it has been frequently revived Employs a clear and intelligent writing style that makes this the perfect introduction to the genre Offers a thorough and engaging analysis of this popular area of film studies for students and scholars Presents an in-depth analysis of six key films, each exemplifying important trends of film noir: *Murder, My Sweet*; *Out of the Past*; *Kiss Me Deadly*; *The Long Goodbye*; *Chinatown*; and *Seven*

Maelstrom Peter Watts, 2009-01-06 Second in the *Rifters* Trilogy, Hugo Award-winning author Peter Watts' *Maelstrom* is a terrifying explosion of cyberpunk noir. This is the way the world ends: A nuclear strike on a deep sea vent. The target was an ancient microbe—voracious enough to drive the whole biosphere to extinction—and a handful of amphibious humans called *rifters* who'd inadvertently released it from three billion years of solitary confinement. The resulting tsunami killed millions. It's not as though there was a choice: saving the world excuses almost any degree of collateral damage. Unless, of course, you miss the target. Now North America's west coast lies in ruins. Millions of refugees rally around a mythical figure mysteriously risen from the deep sea. A world already wobbling towards collapse barely notices the spread of one more blight along its shores. And buried in the seething fast-forward jungle that use to be called Internet, something vast and inhuman reaches out to a woman with empty white eyes and machinery in her chest. A woman driven by rage, and

incubating Armageddon. Her name is Lenie Clarke. She's a rifter. She's not nearly as dead as everyone thinks. And the whole damn world is collateral damage as far as she's concerned. . . . Unequal Affections Lara S. Ormiston, 2014-01-07 When Elizabeth Bennet first knew Mr. Darcy, she despised him and was sure he felt the same. Angered by his pride and reserve, influenced by the lies of the charming Mr. Wickham, she never troubled herself to believe he was anything other than the worst of men—until, one day, he unexpectedly proposed. Mr. Darcy's passionate avowal of love causes Elizabeth to reevaluate everything she thought she knew about him. What she knows is that he is rich, handsome, clever, and very much in love with her. She, on the other hand, is poor, and can expect a future of increasing poverty if she does not marry. The incentives for her to accept him are strong, but she is honest enough to tell him that she does not return his affections. He says he can accept that—but will either of them ever be truly happy in a relationship of unequal affection? Diverging from Jane Austen's classic novel Pride and Prejudice at the proposal in the Hunsford parsonage, this story explores the kind of man Darcy is, even before his "proper humbling," and how such a man, so full of pride, so much in love, might have behaved had Elizabeth chosen to accept his original proposal.

Today's children live in a culturally diverse and constantly changing digital world. New digital media is created every day but librarians and other educators need help in evaluating cultural content in digital apps, determining whether they send appropriate social messages to children, and learning how to use them in library programs that promote cultural competence. Diversity Programming for Digital Youth: Promoting Cultural Competence in the Children's Library provides just the help that is needed. This resource is the only one to examine the role of culturally diverse digital media and how it can be used with children's books to promote cultural competence in the library. It provides annotated lists of digital media paired with culturally diverse literature to offer librarians and educators a springboard for creating enriching, engaging, and culturally relevant programs for children from diverse backgrounds. The Zones of Regulation Leah M. Kuypers, 2011 ... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called zones, with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD.--Publisher's website.
