The Book of Formation Ross Simonini,2017 This debut novel--told in interviews--spans 20 years in the rise and fall of the charismatic leader of a seductive self-help movement. In the 1990s, a talk show host leads the personality movement, an integrative approach to radical self-transformation. Mayah, the movement's architect and celebrity advocate, adopts a curious, wild child named Masha Isle. A guinea-pig for the movement, and the key to its future, Isle is the subject of the eight interviews that comprise this book. As the

interviewer's objectivity disintegrates--even as the movement's legitimacy becomes increasingly suspect--he becomes obsessed with Masha. And all of that is thrown into question when tragedy strikes. The stunning debut of a new literary talent, and a fascinating take on the cult of personality: about celebrities need to destroy and recreate themselves to stay relevant, public personalities coming to belong to everyone, and about our need to see everyone as a kind of celebrity.

Maelstrom Peter Watts, 2009-01-06 Second in the Rifiers Trilogy, Hugo Award-winning author Peter Watts' Maelstrom is a terrifying explosion of cyberpunk noir. This is the way the world ends: A nuclear strike on a deep sea vent. The target was an ancient microbe—voracious enough to drive the whole biosphere to extinction—and a handful of amphibious humans called rifiers who'd inadvertently released it from three billion years of solitary confinement. The resulting tsunami killed millions. It's not as though there was a choice: saving the world excuses almost any degree of collateral damage. Unless, of course, you miss the target. Now North America's west coast lies in ruins. Millions of refugees rally around a mythical figure mysteriously risen from the deep sea. A world already wobbling towards collapse barely notices the spread of one more blight along its shores. And buried in the seething fast-forward jungle that use to be called Internet, something vast and inhuman reaches out to a woman with empty white eyes and machinery in her chest. A woman driven by rage, and incubating Armageddon. Her name is Lenie Clarke. She's a rifier. She's not nearly as dead as everyone thinks. And the whole damn world is collateral damage as far as she's concerned. . . . At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Understanding GIS David Smith, Nathan Strout, Christian Harder, Steven D. Moore, Tim Ormsby, Thomas Balstrøm, 2018 In this fourth edition of *Understanding GIS* -- the only book teaching how to conceive, develop, finish, and present a GIS project -- all exercises have been updated to use Esri's ArcGIS Pro software with revamped data. The book guides readers with explanations of project development concepts and exercises that foster critical thinking.

Unequal Affections Lara S. Ormiston, 2014-01-07 When Elizabeth Bennet first knew Mr. Darcy, she despised him and was sure he felt the same. Angered by his pride and reserve, influenced by the lies of the charming Mr. Wickham, she never troubled herself to believe he was anything other than the worst of men—until, one day, he unexpectedly proposed. Mr. Darcy's passionate avowal of love causes Elizabeth to reevaluate everything she thought she knew about him. What she knows is that he is rich, handsome, clever, and very much in love with her. She, on the other hand, is poor, and can expect a future of increasing poverty if she does not marry. The incentives for her to accept him are strong, but she is honest enough to tell him that she does not return his affections. He says he can accept that—but will either of them ever be truly happy in a relationship of unequal affection? Diverging from Jane Austen's classic novel *Pride and Prejudice* at the proposal in the Hunsford parsonage, this story explores the kind of man Darcy is, even before his "proper humbling," and how such a man, so full of pride, so much in love, might have behaved had Elizabeth chosen to accept his original proposal.

The Zones of Regulation Leah M. Kuypers, 2011 ... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called zones, with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD.--Publisher's website.
