GAIN WISDOM S. V. Subramanyam (Prof.), 2010-12
Presents all the 195 Yoga Sutras professed by the
legendary Maharishi PATANJALI. He affirmed that
Yoga is not only limited to Āsanas, but also
aims at outer and inner purification; control and
balance of the self; meditation and complete
absorption. And finally union with the Self.
Contains 4 Chapters: Samadhi; Sadhana; Vibhuti and
Kaivalya. Comprises of all the 8 limbs of Ashtanga
Yoga: 5 external and 3 internal, Yama; Niyama;
Asana; Pranayama; Pratyahara; Dharana; Dhyana; and
Samadhi. The book fully utilizes available
technology to aid elaboration of the commentary on
Yoga Sutras which are admittedly terse. Charts and
tables as well as graphs and pictures adorn the
book practically on every page so that the reader
finds it helpful to enhance his understanding.
Stories and quotations from the spiritual greats
are added to widen comprehension. This then is a
book that is truly unique in its presentation that
would find ready acceptance by Yoga teachers and
students alike all over the world. All those
students and teachers of Yogasanas who wish to go
beyond Asanas and aim at avoidance of mental
modifications and the resultant stressful life
would find this book a boon.

Stats To Go John Buglear, 2012-09-10 'Stats to Go' is a user-friendly guide for hospitality, leisure and tourism students who need to learn statistics and statistical techniques. 'Stats to go' is an ideal companion to hospitality, leisure and tourism studies as the breadth of coverage supports all taught numerical aspects of these types of course. Examples from hospitality, leisure and tourism organizations: * licensed premises * fast food outlets * hotels * theme parks and their environments are used to illustrate key issues of the text. The area of quantitative methods is one which many students

find unapproachable or daunting. With the use of a clear learning structure, and a user friendly, non-theoretical approach, Buglear has created a text which students and lecturers alike will find indispensable.

Rendering Techniques '97 Julie Dorsey, Philipp Slusallek, 2012-12-06 The book contains the proceedings of the 8th Eurographics Rendering Workshop, which took place from 16th to 18th June, 1997, in Saint Etienne, France. After a series of seven successful events the workshop is now well established as the major international forum in the field of rendering and illumination techniques. It brought together the experts of this field. Their recent research results are compiled in this proceedings together with many color images that demonstrate new ideas and techniques. This year we received a total of 63 submissions of which 28 were selected for the workshop after a period of careful reviewing and evaluation by the 27 members of the international program committee. The quality of the submissions was again very high and, unfortunately, many interesting papers had to be rejected. In addition to regular papers the program also contains two invited lectures by Shenchang Eric Chen (Live Picture) and Per Christensen (Mental Images). The papers in this proceedings contain new research results in the areas of Finite-Element and Monte-Carlo illumination algorithms, image-based rendering, outdoor and natural illumination, error metrics, perception, texture and color handling,

data acquisition for rendering, and efficient use of hardware. While some contributions report results from more efficient or elegant algorithms, others pursue new and experimental approaches to find better solutions to the open problems in rendering.
