*The Reality of Being, Decoded* Mitzi DeWhitt,2013-09 To be one, whole in the face of life, is all that matters. So long as I remain conscious of this, I feel a life within me and a peace that nothing else can give. The words are Madame de Salzmann's, from the final page of her book *The Reality of Being*. I read them and feel good. For a moment I experience the peace that passeth understanding. At that same moment I realize my incapacity and my non-comprehension and I feel bad. Stabbed in the heart by the sword of gnosis I want to run away, fall back into complacency. I see how I am, divided. Do I care? So long as I remain trapped in passivity, nothing new can appear: no Newness, no New Man, no New World. Do I really wish to explore the Unknown? Or am I only an armchair adventurer, a dreamer vicariously gaining the experience from another's travels? How can I know myself? My journey to inaccessible places begins with seeing that I am two: I wish, I do not wish. The act of seeing itself is the appearance of I. Not the ordinary I that is deeply afraid and wishes only for security, but the real I, pure, uncontaminated by fear, grounded in love. Without it I will never know what is true, never enter a world entirely new. Her words convey deep meaning, far deeper than we ordinarily realize. To discover the New World requires knowing how to measure. Without the science of measures I cannot go far. It is my measure, the measure both of my capacity and of the quality of my moment of work. Knowing the code of measures, I can decipher the reality of who I am. This book provides the keys to the code.

**Coming Home to Math** Irving P. Herman,2020 We use numbers here, there and everywhere -- Numbers are some of my favorite things -- Linking numbers : operations on numbers -- Words and numbers : being careful -- Writing really big and really small numbers, and those in-between -- Touching all bases, at times with logs -- Numbers need to be exact, but it ain't necessarily so -- The different types of numbers have not evolved, but our understanding of them has -- Really, really big and really, really small numbers -- The whole truth of whole numbers -- The math of the digital world : modular arithmetic (or using number leftovers) -- The math of what will be : progressions of growth and decay -- Untangling the worlds of probability and statistics -- The math of what might be : probability - what are the odds? -- The math of what was : statistics - the good, the bad, and the evil -- The math of big data -- The math of optimization, ranking, voting, and allocation -- The math of gaming -- The math of risk.

The True Science of Music D. C. Hewitt,2011-12 First published in 1864, this work discusses aspects of the physics of music, in particular the mathematics of musical intervals.

**A Nonlinear Dynamics Perspective of Wolfram's New Kind of Science** Leon O. Chua,2012 This penultimate volume contains numerous original, elegant, and surprising results in 1-dimensional cellular automata. Perhaps the most exciting, if not shocking, new result is the discovery that only 82 local rules, out of 256, suffice to predict the time evolution of any of the remaining 174 local rules from an arbitrary initial bit-string configuration. This is contrary to the well-known folklore that 256 local rules are necessary, leading to the new concept of quasi-global equivalence . Another surprising result is the introduction of a simple, yet explicit, infinite bit string called the super string S, which contains all random bit strings of finite length as sub-strings. As an illustration of the mathematical subtlety of this amazing discrete testing signal, the super string S is used to prove mathematically, in a trivial and transparent way, that rule 170 is as chaotic as a coin toss . Yet another unexpected new result, among many others, is the derivation of an explicit basin tree generation formula which provides an analytical relationship between the basin trees of globally-equivalent local rules. This formula allows the symbolic, rather than numerical, generation of the time evolution of any local rule corresponding to any initial bit-string configuration, from one of the 88 globally-equivalent local rules. But perhaps the most provocative idea is the proposal for adopting rule 137, over its three globally-equivalent siblings, including the heretofore more well-known rule 110, as the prototypical universal Turing machine .

**Behold, I AM** Joyce Lynn Wulf,2023-11-13 It was a childlike question, but the answer was as stunning as it was profound. If God is light, what do the primary colors of the rainbow's spectrum signify? The Gospel of John declares in eight mysterious signs that God is light and Jesus Christ in the flesh was God sent to bring the light of true life to us. These enigmatic signs of light, semeion, imply the eight signs' significance pointed to something other than what they appeared. The themes of John's eight signs match the themes of the Feasts given to ancient Israel at Mount Sinai and a sequence of YHWH's covenant names. Behold, I AM is a rich, in-depth study into God's Holyday appointed times, His eight Festivals of Light, what they meant then, what they mean today, and how they are fulfilling prophecy.

**Inside the Hawke-Keating Government** Gareth Evans,2014-09-01 As good as it gets in Australian politics. That's how the Hawke-Keating Government is now widely regarded. But how did this highly able, ambitious, strong-willed group work through its crises and rivalries, and achieve what it did? Gareth Evans' diary, written in the mid-1980s and published now for the first time, is the consummate insider's account. It not only adds much new material to the historical record, but is perceptive, sharp and unvarnished in its judgments, lucidly written, and often highly entertaining.

**Political Conservatism and Religious Reformation in Iran (1905-1979)** Amir Yahya Ayatollahi,2022-03-19 This book is a theoretical inquiry on the relation of the body politic with the religious movements in the time between the Constitutional Revolution and the Islamic Revolution in Iran; it illustrates speculative and historical analyses on the relationship of state, religion, and socio-political status in the late Qajar dynasty (1905-1925) and the whole Pahlavi monarchy. Particularly, it examines the applicability of “liberal conservatism” to the era of the last Shah of Iran. The thesis defines the term political conservatism in accord with Edmund Burke’s philosophy. It deals next with the definition of religious reformation, the peculiar characteristics of Islam, the Shi'ite political theology, and the contradictory usages of “Islamic reformation” in the literature. The text gives an overview of the two antagonist sides of nationalism. It provides also an analysis of the Islamic Republic as a new political phenomenon in Iranian history and the transformation of all concepts after 1979. Ayatollahi aims to assess the Iranian conservatism, the possibility of conciliation between politics and religion before the collapse of the Pahlavi, and “the conditions of possibility” for any restoration of the monarchy.

**Journey to Albania; Land of Besa** Kalman Dubov,2024-02-18 Although tiny in comparison with other European countries, Albania looms large in terms of its people, culture and history. Blessed by an abundance of

natural resources, together with the resourcefulness of its people, it stands strong in the face of much larger countries that have tried to control it and subjugate its people. In the face of overwhelming odds, Albania stood firm, refusing to be subdued to others despite that dominant country remaining on its soil for centuries. Descendants from the ancient Illyrians, a relatively unknown group, together with an obscure language unlike any other in Europe, its people are a mystery and a conundrum in the face of larger and more powerful countries. The Ottoman Empire, for example, dominated Albania and the Balkans for five centuries, but were unable to subjugate these people. Albanian embers for independence were nurtured and kept alive until, in the end, it achieved its national aspirations. Its core identity remained unchanged and strong in the face of such challenge. Perhaps the most remarkable aspect of Albanian is the concept of besa, a term denoting a code of honor. Once given to another, whether an Albanian or a stranger, the Albanian would rather forfeit his life than violate this code and promise. It was due to this concept and code that Jews in Albania, were protected and every manner of succor was extended to them. Albania remains the only country in Nazi-occupied Europe when at the end of that world war there was an increase in its Jewish population rather than the reverse. The Nazis considered the Jewish population in Albania to be about 200 persons. In fact, by war's end, 2,000 people emerged, relating tales of the extraordinary courage and heroism extended to them by either Muslim or Christian Albanians. To date the State of Israel's Yad Vashem has recognized 75 Albanians for its prestigious award of Righteous Among the Nations. Ironically, the very same code of honor that protected Jews during World War Two is now used by Albanians to perpetrate criminality across the world. The Albanian Mafia controls a vast international enterprise, overseeing every form of crime. At its basest element, the clannish hallmark of its membership is based on familial connections, with the code of besa given to its leadership and other members. Thereby, all in the clan are considered family for whom the code connects and protects, demanding total unquestioned obedience. Efforts to infiltrate these clans has proven an impossible task because of the interconnected webs of duty and control exerted on all in that organization. Betrayal of the clan is a violation of family and community so that total obedience is a given at all times. Hence, the same nobility of besa is also used negatively, against society and normative social frameworks. In addition, Albania still retains the cultural phenomenon of the 'third sex' where women become 'sworn virgins.' They are released from their traditional feminine role and become a 'man,' doing so by a formal oath given to twelve elders in the community. Afterwards, none may remind this 'man' of a previous life as a woman. Though the number of sworn virgins in Albania is small, it is still present and any woman may assume this transformation despite modernity and its claims of equality. The Albanian diet reflects its Mediterranean culture, using olive oil and an array of vegetables that provides an abundance of health to its people. There is much to learn from this ancient society. I hope this book does justice to the many traditions and culture of this unique people.

**Stars on the Earth** Richard Leviton, 2006-08 Discover the wonderful secret the Earth holds for us-that the stars of the galaxy live on our planet. Holograms of high-magnitude stars over holy mountains. Physical travel to other planets through stargates on the Earth's surface. Near instantaneous transportation across the planet through quick-way portals. Outrageous science fiction or sober geomantic fact? Earth Mysteries researcher Richard Leviton takes you on a wild tour of three geomantic features of our planet and reveals that what science fiction has dreamed the Earth in fact offers us. Stars on the Earth combines scholarship, clairvoyance, and field experience with the latest discoveries of geology and astrophysics and the timeless insights of the world's myths to open the planetary door to the stars. It's all part of the Earth's unsuspected but staggeringly rich endowment as a designer planet. Our planet was precisely designed and implemented for us, and it's equipped with a visionary geography that mirrors features of the galaxy and Heavens. Why are so many of the Earth's mountains said to be holy, producing visions and encounters with the gods? They all have canopies of light called domes, each transmitting the presence of a galactic star. What is the geomantic origin of the Bermuda Triangle? Two dysfunctional stargates. If working properly, they and the Earth's other two million stargates could transport us rapidly to other planets. Is there a way to travel quickly across the planet without using cars, airplanes, boats, or trains? Yes, and it's called a traversable wormhole, and the Earth has thousands of them awaiting our discovery and use. Come join the tour of a planet you've never seen before: our own star-infused Earth.

**The Magdalene Complex** Andrew David Doyle, 2013-03-21 Biblical research investigator Kemp Hastings sits quietly in the back of a classroom and absorbs the lecture from Dr. Darlene Gammay, her first public session since walking out of the university two weeks ago in a cloud of mystery. As the biblical scholar wraps up her lecture and watches Hastings approach her, Dr. Gammay has no idea that he is about to change her life forever. Hastings has been tasked to authenticate a holy parchment recently found in the tomb of a Cistercian monk, hidden away for nearly five hundred years. After he engages help from Dr. Gammay, she inadvertently touches the ancient manuscript with her bare fingers, setting off a chain of holy, unnatural events that leads to the eventual discovery of a strange tattoo emblazoned across her shoulders. Now embroiled in an ancient mystery, the couple travels to Cairo to consult with a madcap museum curator who, unbeknownst to them, has already devised his own twisted plan. In this intriguing biblical tale, chosen guardians of some of the most treasured items in the universe embark on an intrepid journey from a university classroom to Egypt and finally to Northern Scotland, where they are forced to battle underworld forces determined to remove one of them from existence forever.
