Digital Energetics Anne Pasek,Cindy Kaiying Lin,Zane Griffin Talley Cooper,Jordan B. Kinder,2023-05-23 Exploring the connections between energy and media—and what those connections mean for our current moment Energy and media are the entangled middles of social life—and also of each other. This volume traces the contours of both a media analytic of energy and an energy analytic of media across the cultural, environmental, and economic relations they undergird. Digital Energetics argues that media and energy require joint theorization—not only in their potential to universalize but also in the many contingent and intermeshed relations that they bind together across contemporary informational and fossil regimes. Focusing specifically on digital operations, the coauthors analyze how data and energy have jointly modulated the character of the materiality and labor of digital systems in a warming world. Anne Pasek provides a brief energy history of the bit, tracing how the electrification and digitization of American computing propelled a turn toward efficiency as both a solution and instigator of parallel crises in the workforce and the climate. Zane Griffin Talley Cooper traces these concerns within cryptographic proof-of-work systems and the heat they necessarily produce and seek to manage. Following heat through the twinned histories of thermodynamics and information theory, he argues that such systems are best approached as a paradigmatic, rather than exceptional, example of computing infrastructures. Cindy Kaiying Lin focuses on the practical and political frictions created as database and management designs move from the Global North to South, illustrating how the energy constraints and software cultures of Indonesia open new spaces of autonomy within environmental governance. Finally, Jordan B. Kinder offers a theorization of “platform energetics,” demonstrating how public energy discourses and settler land claims are entangled in the digital infrastructures of data colonialism in Canada.

12th Eurographics Symposium on Virtual Environments, Lisbon, Portugal, May 8th-10th, 2006 Roger Hubbard,Ming C. Lin,2006-08-15 This book contains the papers presented at the 12th Eurographics Symposium on Virtual Environments, organized by the Eurographics Association in co-operation with ACM SIGGRAPH, which took place from May 8 - 10, 2006 in Lisbon, Portugal. These proceedings contain the fifteen full papers presented at the Eurographics Symposium on Virtual Environments, selected from nearly forty submissions. Each paper was reviewed by four members of the program committee and external reviewers. The selected papers cover a variety of topics ranging from augmented and mixed reality, novel 3D interface design, proximity detection and interaction, tracking technology, to view management and data annotation.

Novel Anticancer Agents Alex A. Adjei,John K. Buolamwini,2011-04-28 This book offers pertinent basic science information on strategies used for the rational design and discovery of novel anticancer agents, and, in addition, translational studies involving clinical trial design and execution with these novel, mostly cytostatic agents. This book covers basic science strategies that are being used in drug discovery and preclinical evaluation focused on novel molecular targets, as well as clinical trial methodology including clinical pharmacokinetics and imaging to address issues of efficacy evaluation of the new, relatively non-cytotoxic anticancer agents. At present, there is no book that provides such an integration of basic and clinical studies of novel anticancer agents, covering both drug discovery and translational research extensively. * Addresses the critical issues involved in the development of novel agents for cancer therapy by experts in the field * Presents drug discovery strategies * Discusses regulatory issues surrounding drug development *

International Complete Collection of R&D Information about Traditional Chinese Materia Medica and Biotechnology Enterprises Zhengsong Zhan,2010-04-01 The International Complete Collection of R&D Information about Traditional Chinese Materia Medica (TCMM) and Biotechnology (BT) Enterprises is designed as an informative medicinal reference directory listing of up-to-date R&D information about TCMM, medical biotechnology, and related medical equipment companies. The focus of this valuable and practical directory is on providing a comprehensive coverage of the most recent developments in scientific research, patents and major products of about 3,000 companies from 50 countries covering the five continents: Asia, Europe, America, Africa and the Oceania. The resource material and information are relevant and compulsory to practitioners and professionals in the fields of TCMM, medical biotechnology, biochemical industry and related medical instrumentation/equipment, as well as to organizational departments of the medicinal information management, intelligence, logistics and trade. The directory also opens up and serves as an important window through which biotech professionals master product information of their counterparts across the world. The directory will benefit professionals of medical health, TCMM, biotechnology and related fields, as well as academics and students, executives of research, information media staffs and translators.

DNA Microarrays, Part A: Array Platforms and Wet-Bench Protocols ,2011-08-19 Modern DNA microarray technologies have evolved over the past 25 years to the point where it is now possible to take many million measurements from a single experiment. These two volumes, Parts A & B in the Methods in Enzymology series provide methods that will shepherd any molecular biologist through the process of planning, performing, and publishing microarray results. Part A starts with an overview of a number of microarray platforms, both commercial and academically produced and includes wet bench protocols for performing traditional expression analysis and derivative techniques such as detection of transcription factor occupancy and chromatin status. Wet-bench protocols and troubleshooting techniques continue into Part B. These techniques are well rooted in traditional molecular biology and while they require traditional care, a researcher that can reproducibly generate beautiful Northern or Southern blots should have no difficulty generating beautiful array hybridizations. Data management is a more recent problem for most biologists. The bulk of Part B provides a range of techniques for data handling. This includes critical issues, from normalization within and between arrays, to uploading your results to the public repositories for array data, and how to integrate data from multiple sources. There are chapters in Part B for both the debutant and the expert bioinformatician. Provides an overview of platforms Includes experimental design and wet bench protocols Presents

statistical and data analysis methods, array databases, data visualization and meta-analysis

LabCorp Don Bolden,2019-09-17 It began as an idea in the mind of a medical student at Duke University. Later in 1969 that idea became a reality. In that year, Dr. Jim Powell - - with Ernie Knesel as the laboratory manager and Powell's brothers, Ed and John, as coinvestors - - started a medical testing laboratory in Burlington, a small North Carolina town.As time passed, the company and its successors revolutionized medical treatment and assured millions of patients faster and more thorough testing to determine their health problems and how they should be treated. In the past it might have taken two weeks to get test results, often delaying treatment necessary for the patient's well-being. This new company, however, soon made it possible - - even in rural areas - - to get sophisticated, state-of-the-art labe testing with twenty-four-hour turnaround, resulting in better medicine.Today, that company, after internal growth and many mergers and acquisitions, is the largest of its kind in the world, serving millions of people not only in the United States but in several foreign countries as well. It is one of the few S&P 500 companies headquartered in North Carolina, and those facilities remain in Burlington. We now know it as LabCorp.
