Handbook of Globalization and the Environment Khi V. Thai,Dianne Rahm,Jerrell D. Coggburn,2017-09-25 Proponents of globalization argue that it protects the global environment from degradation and promotes worldwide sustainable economic growth while opponents argue the exact opposite. Examining the local, national, and international impacts of globalization, the *Handbook of Globalization and the Environment* explores strategies and solutions that support healthy economic growth, protect the environment, and create a more equitable world. The book sets the stage with coverage of global environmental issues and policies. It explores international sustainable development, the evolution of global warming policy, transborder air pollution, desertification, space and the global environment, and human right to water. Building on this foundation, the editors discuss global environmental organizations and institutions with coverage of the UN's role in globalization, the trade-environment nexus, the emergence of NGOs, and an analysis of the state of global environmental knowledge and awareness from an international and comparative perspective. Emphasizing the effects of increasingly integrated global economy on the environment and society, the book examines environmental management and accountability. It addresses green procurement, provides an overview of U.S. environmental regulation and the current range of voluntary and mandatory pollution prevention mechanisms in use, explores a two-pronged approach to establishing a sustainable procurement model, and examines a collaborative community-based approach to environmental regulatory compliance. The book concludes with an analysis of controversial issues, such as eco-terrorism, North-South disputes, environmental justice, the promotion of economic growth through globalization in less developed countries, and the ability of

scientists to communicate ideas so that policy makers can use science in decision making.

Astronomie spatiale infrarouge, aujourd'hui et demain
Infrared space astronomy, today and tomorrow F. Casoli, J. Lequeux, F. David, 2000-07-19 This book brings together the lectures given at the Les Houches summer school Infrared space astronomy, today and tomorrow. It gives a wide overview of infrared astronomy, a wavelength domain crucial for studies of the solar system, stars at the beginning and end of their lives, interstellar matter and galaxies at all distances. Recent developments in observational techniques have been tremendous. The first contributions give an introduction to the basic physical processes and methods of detection and data processing. They are followed by a series of lectures dealing with the wide variety of astronomical objects that can be seen in the infrared.

Time-Space, Spiking Neural Networks and Brain-Inspired Artificial Intelligence Nikola K. Kasabov, 2018-08-29 Spiking neural networks (SNN) are biologically inspired computational models that represent and process information internally as trains of spikes. This monograph book presents the classical theory and applications of SNN, including original

author's contribution to the area. The book introduces for the first time not only deep learning and deep knowledge representation in the human brain and in brain-inspired SNN, but takes that further to develop new types of AI systems, called in the book brain-inspired AI (BI-AI). BI-AI systems are illustrated on: cognitive brain data, including EEG, fMRI and DTI; audio-visual data; brain-computer interfaces; personalized modelling in bio-neuroinformatics; multisensory streaming data modelling in finance, environment and ecology; data compression; neuromorphic hardware implementation. Future directions, such as the integration of multiple modalities, such as quantum-, molecular- and brain information processing, is presented in the last chapter. The book is a research book for postgraduate students, researchers and practitioners across wider areas, including computer and information sciences, engineering, applied mathematics, bio- and neurosciences.

Balanced Control of Flexible Structures Wodek

Gawronski,2006-04-10 Methods of structural control and dynamics are introduced in this book. These include reduction of large structural models by balanced truncation, placement of actuators and sensors for dynamic testing and control, structural identification of the minimum-order balanced representation, balanced dissipative controller design, balanced LQG and H(controller designs with the closed-form relationships between controller parameters and system performance, and controller reduction methods that preserve the closed-loop performance. The book explores the unique properties of flexible structures to obtain efficient methods of dynamic analysis and controller design. The presented methods of structural dynamics, identification, sensor/actuator placement, and passive, LQG and H(controller design have been checked both with simulations and industrial implementations.

Hunt & Marshall's Clinical Problems in Surgery - eBook

Julian A. Smith, Jane G. Fox, Alan C. Saunders, Ming Kon Yui, 2017-03-25 Is surgery required? Is the patient effectively communicating symptoms to make the correct clinical diagnosis? Clinical Problems in Surgery, 3rd Edition supports medical students in applying clinical reasoning to problems they encounter in a clinical setup. Individual chapters are dedicated to specific regions of the body where surgeons encounter most of the problems. The content structure follows the logical step-by-step process of introducing a clinical problem; seeking history and conducting physical examination; diagnosing the patient and devising a treatment plan based on this informed diagnosis. Each chapter discusses the clinical presentations with which surgeons are most commonly faced. Each chapter is dedicated to a range of such problems within a particular region of the body. Incorporation of the latest RACS guidelines on surgery A new Chapter 14, titled Ophthalmological Problems, expands the latest advancements in surgical treatments of such problems. Many line drawings from the previous edition have been replaced with clinical photos to emphasise real-life clinical scenarios which surgeons encounter on a daily basis. This edition will be available as a Student Consult eBook along with the print book. The eBook will include enhancements to the images within the book, as enabled by the Inkling platform.

Head, Neck, and Orofacial Infections James R. Hupp, Elie M. Ferneini, 2015-11-02 Use best practices in effectively treating infections of the head, neck, and orofacial complex! *Head, Neck, and Orofacial Infections: An Interdisciplinary Approach* is the only resource on the market with in-depth guidelines to the diagnosis and management of pathology due to severe infections. No longer do you have to search through journal articles and websites, as this comprehensive, full-color reference covers both cutting-edge and time-tested approaches to recognizing and handling infections. From well-known OMS educator James Hupp and oral surgeon Elie Ferneini, and with chapters written by expert contributors, this book is ideal for use in the classroom, as preparation for the NBDE and specialty exams, and as a clinical resource for patient care. **UNIQUE!** Comprehensive coverage of head, neck, and orofacial infections addresses the diagnosis and management of pathology due to infections of the head and neck and orofacial complex. Expert contributors are drawn from the disciplines of oral and maxillofacial surgery, head and neck surgery, plastic surgery, and otolaryngology, and they provide state-of-the-art guidance based on extensive experience with current techniques as well as technological advances in managing head, neck, and orofacial infections. Over 500 photographs, radiographs, and illustrations demonstrate pathologies, procedures, and outcomes. A logical organization addresses these topics: 1) issues that are common to all infections of the head and neck region, 2) infections of specific parts of the region, and 3) infections related to certain procedures, types of patients, unusual organisms, and medical-legal implications. Key chapters include: *Odontogenic Infections of the Fascial Spaces* chapter focuses on the etiology, clinical manifestations, anatomic

considerations, and treatment of odontogenic infections. Nasal and Para-Nasal Sinus Infections chapter discusses the pathophysiology and management of nasal and paranasal sinus infections. Microbiologic Considerations with Dental Implants chapter reviews the issues associated with the prevention of infection with surgical implant placement, including the factors that are known to cause infection, the putative bacteria involved and means to control infection once it occurs.

Neural Information Processing Haiqin Yang,Kitsuchart Pasupa,Andrew Chi-Sing Leung,James T. Kwok,Jonathan H. Chan,Irwin King,2020-11-18 The three-volume set of LNCS 12532, 12533, and 12534 constitutes the proceedings of the 27th International Conference on Neural Information Processing, ICONIP 2020, held in Bangkok, Thailand, in November 2020. Due to COVID-19 pandemic the conference was held virtually. The 187 full papers presented were carefully reviewed and selected from 618 submissions. The papers address the emerging topics of theoretical research, empirical studies, and applications of neural information processing techniques across different domains. The third volume, LNCS 12534, is organized in topical sections on biomedical information; neural data analysis; neural network models; recommender systems; time series analysis.
