Official Summary of Security Transactions and Holdings ,

The Drag of Airplane Radiators with Special Reference to Air Heating (comparison of Theory and Experiment) B. Göthert,1939 This report contains a survey of past radiator research. This report also is intended as a systematic comparison of theoretical and experimental radiator drag, with the object of ascertaining the most important loss sources and their interaction in different cases of installation, and to separate the radiator systems which are amenable to calculation, both as regards axial flow and drag. The sources of loss due to the diffuser are to be looked into closely as in many cases they can be of preeminent magnitude and their customary appraisal, according to Fliegner's formula, does not meet actual conditions. Besides, generally applicable equations and charts are developed for the rapid determination of the heating effect of radiators as regards flow and drag, and then checked by routine tests on hot radiators.

Dictionary of European Proverbs Emanuel Strauss, 2012-11-12 This Dictionary
contains over 50,000 proverbs, in some 70 European languages and dialects, arranged in
2,500 sets. It is the fruits of over 40 years of collection and research, the only collection of
proverbs on anything like this scale ever to be published anywhere in the world. Emanuel
Strauss has trawled through innumerable collections of proverbs in all languages, from
early printed books and rare items to the latest theses and journals, and grouped together
many thousands of proverbs in sets of equivalent meaning. Comprehensive indexes for
each language provide access to any proverb by way of its key words. A critical
bibliography musters some 500 items, from incunabula to the current decade.

The Chain of Being and Having in Slavic Steven J. Clancy, 2010 The complex diachronic

and synchronic status of the concepts be and have can be understood only with consideration of their full range of constructions and functions. Data from modern Slavic languages (Russian, Czech, Polish, Bulgarian) provides a window into zero copulas, non-verbal have expressions, and verbal constructions. From the perspective of cognitive linguistics, be and have are analyzed in terms of a blended prototype model, wherein existence/copula for be and possession/relationship for have are inseparably combined. These concepts are related to each other in their functions and meanings and serve as organizing principles in a conceptual network of semantic neighbors, including give, take, get, become, make, and verbs of position and motion. Renewal and replacement of be and have occur through processes of polysemization and suppletization involving lexical items in this network. Topics include polysemy, suppletion, tense/mood auxiliaries, modality, causatives, evidentiality, function words, contact phenomena, syntactic calques, and idiomatic constructions.
