The House that Roone Built Marc Gunther, 1994 A behind-the-scenes account of how Roone Arledge transformed ABC's news division draws on hundreds of interviews with top network personnel to examine Arledge's willingness to experiment and to spend money on talent. 25,000 first printing. \$25,000 ad/promo.

Exit Interview David Westin, 2012-05-22 When David Westin became president of ABC News in March 1997, the division was treading water. It looked like all the really important news was behind us, he writes. Hardly. For the next thirteen years, Westin would preside over ABC News during some of the most important and perplexing events in its history: • President Clinton's

impeachment • The tied 2000 presidential election • The 9/11 attacks • Conflicts in Iraq and Afghanistan • The swift boat smear campaign against Senator John Kerry Exit Interview is a behind-the-scenes look at Westin's tenure and the major news that marked it. He takes us inside the chaos of the newsroom—alongside major players such as Peter Jennings, Barbara Walters, Diane Sawyer, and Bob Woodruff—where what looks clear and certain from the outside is often mired in conflict and urgency. Neither an apologia nor a critique, the book charts the ups and downs of fourteen formative years in network news, addressing basic questions about how our news is reported, from the point of view of someone who was there. With milestones from the recent past, Westin explores the uncertainty inherent in his job, and its central question: Is it possible for journalists to be both good at their jobs and people of good moral character?

Ginger grew up in small-town Michigan where she developed an obsession with weather as a young girl. Ginger opens up about her lifelong battle with crippling depression, her romances that range from misguided to dangerous, and her tumultuous professional path. This cyclone of stories may sound familiar to some—it's just that Ginger's personal tempests happened while she was covering some of the most devastating storms in recent history, including a ferocious tornado that killed a legend in the meteorology field. This book is for all the mistake makers who have learned to forgive others and themselves—even in the aftermath of man-made, or in this case Zee-made, disasters. It's a story that every young woman should read, a story about finding love and finding it in yourself. Beloved by Good Morning America's audience, Ginger is a daily

presence for millions. Zee's gained fame for her social media presence which is as unfiltered as Natural Disaster—from baby barf to doggy doo-doo. She's shattered the glass ceiling for women in meteorology, but admits here first, she's the one natural disaster she couldn't have forecast.

**Buckley Vs. Vidal** William F. Buckley, Gore Vidal, 2015-07-31 Conservative icon William F. Buckley Jr. and liberal author Gore Vidal exploded onto the political scene during the presidential conventions of 1968 when they debated 11 times on ABC News as a part of the network's unconventional convention coverage. The debates were fiery and combative and they infamously blew up at each other during their penultimate debate in Chicago. The debates, the subject of the new documentary film *Best of Enemies*, have not been shown or transcribed in their entirety since the original airings in 1968. The Devault-Graves Agency -- the publisher that made world news in 2014 by publishing *Three Early Stories*, the first J.D. Salinger book in 50 years -- exclusively brings you the complete, uncensored Buckley-Vidal transcripts in all their highly readable glory. The book also features an eloquent and informative introduction by one of the directors of *Best of Enemies*, author Robert Gordon. This book will appeal to the legion of fans and readers of both Buckley and Vidal. Students of debate will find no better guide to the art of verbal fencing than Buckley vs. Vidal. Libraries throughout the U.S. will want *Buckley vs. Vidal* as the official record of the most infamous debates of the last half-century by two of the most important social arbiters

of the era. Buckley vs. Vidal will be a textbook of style and substance to any aspiring debater, or those already in the fray.

**Digital Journalism, Drones, and Automation** Cate Dowd,2020 The next generation of systems and practices in journalism will require knowledge beyond online editing techniques, aggregation, social media flow and

assumptions about fake news. The profession may also want to aim for ethical practices in journalism to be embedded in algorithms for new systems. Engagement in an early design phase may also be useful for scoping reforms for online and social media legislation. However, these pursuits require higher levels of understanding about backend data and online systems, and development of formal vocabulary for journalism concepts and practices. This new domain knowledge should also be expressed in ontological models, informed by participatory approaches. Some problems to be addressed include editorial control issues and fair distribution of news stories and other challenges of data and online systems. Problematic issues should also include the lack of transparency in corporate data sharing arrangements. The semantic language for future systems for journalism will be distinctly different from the vocabulary and classifications used for online news tags. It will also need to distinguish the vocabulary for social media things in context of journalism. Most importantly, the design of new systems will need participatory and semantic design methods that can support the need for high-level knowledge of data and semantic search methods. The influence of social media partnerships in news and backend data sharing are other problem areas. Data via integrated media systems in news organisations flows onto cloud servers where it is processed with a myriad of methods. These hubs are for the new generation of data sharing, where large volumes of data are sorted and processed at accelerated speeds, for a range of purposes. Cloud servers

are now literally the highest levels of digital convergence, other than legislation, and the latter is lagging. This is where data is shared for advertising, social media benefits and other domain purposes. Integrated media systems bring benefits for global networked news media organisations, but they also enable more monetisation of data via cloud servers. --

*The Routledge Handbook of Developments in Digital Journalism Studies* Scott Eldridge II, Bob Franklin, 2018-09-03 The Routledge Handbook of Developments in Digital Journalism Studies offers a unique and authoritative collection of essays that report on and address the significant issues and focal debates shaping the innovative field of digital journalism studies. In the short time this field has grown, aspects of journalism have moved from the digital niche to the digital mainstay, and digital innovations have been 'normalized' into everyday journalistic practice. These cycles of disruption and normalization support this book's central claim that we are witnessing the emergence of digital journalism studies as a discrete academic field. Essays bring together the research and reflections of internationally distinguished academics, journalists, teachers, and researchers to help make sense of a reconceptualized journalism and its effects on journalism's products, processes, resources, and the relationship between journalists and their audiences. The handbook also discusses the complexities and challenges in studying digital journalism and shines light on previously unexplored areas of inquiry such as aspects of digital resistance, protest, and minority

voices. The Routledge Handbook of Developments in Digital Journalism Studies is a carefully curated overview of the range of diverse but interrelated original research that is helping to define this emerging discipline. It will be of particular interest to undergraduate and postgraduate students studying digital, online, computational, and multimedia journalism.
