*Online Game Pioneers at Work* Morgan Ramsay,2015-06-03 In this groundbreaking collection of 15 interviews, successful founders of entertainment software companies reflect on their challenges and how they survived. You will learn of the strategies, the sacrifices, the long hours, the commitment, and the dedication to quality that led to their successes but also of the toll that this incredibly competitive market has on even its most brilliant minds. For the hundreds of thousands of game developers out there, this is a must read survival guide. For those who simply enjoy games and know of some of these founders, this will be a most interesting read. Sales of video games, hardware, and accessories reach upwards of \$20 billion every year in the United States alone, and more than two-thirds of American households include video games in their daily lives. In a world that seems to be overflowing with fortune and success, the vicious truth of this booming industry is easily

forgotten: failure is tradition. Video games define a cultural crossroad where business, entertainment, and technology converge, where the risks are great, cutting edge technology is vitally important and competition is intense. Here are the stories of survival from many of the industries luminaries who founded companies, created industries in their home countries, took amazing risks, innovated technologies, and invented new ways to sell. Among this outstanding group of pioneers are Richard Garriott, founder of Origin, astronaut, and the producer of the revolutionary Ultima Online, John Romero of Doom, Wolfenstein and Quake fame, and Victor Kislyi whose World of Tanks set the Guinness world record for the most people online at once with over 1.1 million people playing). You will read their stories and you will gain an understanding of how they managed in such a demanding business. There are a few game development companies that have withstood the test of time; most startups exit as quickly as they enter the scene. Many firms are outpaced by the explosive worldwide growth and economic realities of the sector. Here are enlightening the stories of entrepreneurs who found success and many who subsequently could not repeat it. They walk you through their incredible journeys of success and failure while expressing their views on development, design, hiring, finance, business models, selling their organization, the business life cycle, their frustrations and mistakes, while showing their intensity and their passion for the business along the way. Online Game Pioneers at Work: Explores the formation of entertainment software companies from the perspectives of successful founders who defied the odds Provides insight into why experienced professionals sacrifice the comfort of gainful employment for the uncertainty and risk of the startup Shares the experiences and lessons that shape the lives, decisions, and struggles of entrepreneurs in this volatile business Other books in the Apress At Work Series: Gamers at Work, Ramsay. 978-1-4302-3351-0 Coders at Work, Seibel, 978-1-4302-1948-4

**The Media and Communications in Australia** Stuart Cunningham, Sue Turnbull, 2020-07-16 Traditional media are being reshaped by digital technologies. The funding model for quality journalism has been undermined by the drift of advertising online, demarcations between different forms of media are rapidly fading, and audiences have fragmented. We can catch up with our favourite TV show on a tablet, social media can be more important than mainstream radio in a crisis, and organisations large and small have become publishers in their own right on apps. Nevertheless mainstream media remain powerful. The Media and Communications in Australia offers a systematic introduction to this dynamic field. Fully updated and revised to take account of recent developments, this fourth edition outlines the key media industries and explains how communications technologies are impacting on them. It provides a thorough overview of the main approaches taken in studying the media, and includes an expanded 'issues' section with new chapters on social media, gaming, apps, the environment, media regulation, ethics and privacy. With contributions from some of

Australia's best researchers and teachers in the field, *The Media and Communications in Australia* remains the most comprehensive and reliable introduction to media and communications available. It is an ideal student text, and a reference for teachers of media and anyone interested in this influential industry.

**Communication and Technology** Lorenzo Cantoni, James A. Danowski, 2015-08-31 The primary goal of the *Communication and Technology* volume (5th within the series *Handbooks of Communication Science*) is to provide the reader with a comprehensive compilation of key scholarly literature, identifying theoretical issues, emerging concepts, current research, specialized methods, and directions for future investigations. The internet and web have become the backbone of many new communication technologies, often transforming older communication media, through digitization, to make them compatible with the net. Accordingly, this volume focuses on internet/web technologies. The essays cover various infrastructure technologies, ranging from different kinds of hard-wired elements to a range of wireless technologies such as WiFi, mobile telephony, and satellite technologies. Audio/visual communication is discussed with reference to large-format motion pictures, medium-sized television and video formats, and the small-screen mobile smartphone. There is also coverage of audio-only media, such as radio, music, and voice telephony; text media, in such venues as online newspapers, blogs, discussion forums and mobile texting; and multi-media technologies, such as games and virtual reality.

**Connecting Disciplinary Literacy and Digital Storytelling in K-12 Education** Haas,  
Leslie, Tussey, Jill, 2021-01-15 The idea of storytelling goes beyond the borders of language, culture,  
or traditional education, and has historically been a tie that bonds families, communities, and  
nations. Digital storytelling offers opportunities for authentic academic and non-academic literacy  
learning across a multitude of genres. It is easily accessible to most members of society and has the  
potential to transform the boundaries of traditional education. As concepts around traditional  
literacy education evolve and become more culturally and linguistically relevant and responsive, the  
connections between digital storytelling and disciplinary literacy warrant considered exploration.  
Connecting Disciplinary Literacy and Digital Storytelling in K-12 Education develops a conceptual  
framework around pedagogical connections to digital storytelling within K-12 disciplinary literacy  
practices. This essential reference book supports student success through the integration of digital

storytelling across content areas and grade levels. Covering topics that include immersive storytelling, multiliteracies, social justice, and pedagogical storytelling, it is intended for stakeholders interested in innovative K-12 disciplinary literacy skill development, research, and practices including but not limited to curriculum directors, education faculty, educational researchers, instructional facilitators, literacy professionals, teachers, pre-service teachers, professional development coordinators, teacher preparation programs, and students.

*Managing the Paralympics* Simon Darcy, Stephen Frawley, Daryl Adair, 2017-02-08 This book critically examines the planning, management, and operations of the world's premier event for Para sport athletes. Noting a lack of research into how these games are planned and managed, the authors of this contributed volume discuss how the Paralympics are essentially different to the Olympics and what this means for their management. Managing the Paralympics explores how the organizers and connected stakeholders effectively organize and deliver the Paralympics, taking into account what has been learned from previous events. Including emergent models of best practice from event management, project management and sport management literature, the book gives an insight into the planning of one of the world's biggest sporting events that encompasses ten impairment types and multiple sport classes within sports.
