Andrew Hesketh

Teardrops in the Blue Room Vidwath Shetty, 2023-05-13 Edward Cole desperately wants to be normal like everyone else. Instead, he finds himself on a rollercoaster ride of shockingly unexpected turmoil until a surprise Asperger's diagnosis brings his chaotic existence into perspective and teaches him the true meaning of his life. The main protagonist Edward Cole is desperate to find his way forward in life and eventually does so despite the many obstacles against him. Going through life feeling different and an outsider, Edward Cole inevitably finds self-understanding and self-forgiveness. The Story ends with clarity and closure on the subject's battle with mental health through a diagnosis of Asperger's syndrome (Autism Spectrum Disorder) as opposed to many mental health books where the fate of the lead is unclear. The protagonist ultimately succeeds in a battle against all his various addictions in a successful conclusion to the Story The ultimate visual depiction of redemption with a protagonist who uses a mental health diagnosis to rescue himself from the absolute bottom of despair to a place of self-forgiveness, self-understanding, and a climax victory. A highly commercialized portrayal of mental health and addiction. A unique story that deals with multiple areas of mental health and addiction as opposed to other such stories that deal with just one, thereby boosting the reader's relatability. One of the first novels to discuss multiple topical issues from recent times including The Black Lives Matter movement and The Me Too movement. The Novel is educational, inspirational, and life-affirming in its tone and climax

The ADI Model Problem Eugene Wachspress,2014-07-08 The ADI Model Problem presents the theoretical foundations of Alternating Direction Implicit (ADI) iteration for

systems with both real and complex spectra and extends early work for real spectra into the complex plane with methods for computing optimum iteration parameters for both one and two variable problems. This book provides application of theory to the solution of boundary value problems and description of stable similarity reduction of a full matrix to low-band upper Hessenberg form, with application to computation of eigenvalues and solution of Lyapunov and Sylvester equations. Also included are MATLAB programs and numerical verification of theory and applications.

You will: Explore machine learning, including distributed computing concepts and terminology Manage the ML lifecycle with MLflow Ingest data and perform basic preprocessing with Spark Explore feature engineering, and use Spark to extract features Train a model with MLlib and build a pipeline to reproduce it Build a data system to combine the power of Spark with deep learning Get a step-by-step example of working with distributed TensorFlow Use PyTorch to scale machine learning and its internal architecture

Escape to Gwrych Castle Andrew Hesketh, 2023-06-22 In 2020 and 2021, at the height of the Covid pandemic, Gwrych Castle was familiar to the British public as the setting of I'm A Celebrity... Get Me Out Of Here! Lesser known is that, at the beginning of the Second World War, this once-grand country house in North Wales became home to around two hundred Jewish refugee children who had been rescued from Europe on the Kindertransport. Under trying conditions, while the families they had been separated from faced the gravest of dangers, these children and their adult guardians established a

Hachshara at Gwrych Castle: a training centre intended to prepare them for the dream of establishing a Jewish homeland in Palestine (Eretz Yisrael), where they hoped one day to be reunited with the families they left behind. In this fascinating debut, historian Andrew Hesketh tells the story of these refugees and the community they built, shining a light on a chapter of Jewish history that deserves to be far more widely known. He recounts moving moments of friendship, respect, tension and humour as the new arrivals and local residents came to know each other, while the shadows of war loomed ever closer, and the Hachshara project found itself facing an uncertain future.

Social, Cultural, and Behavioral Modeling Kevin S. Xu, David Reitter, Dongwon Lee, Nathaniel Osgood, 2016-06-16 This book constitutes the refereed proceedings of the 9th International Conference on Social, Cultural, and Behavioral Modeling & Prediction and Behavior Representation in Modeling and Simulation, SBP-BRiMS 2016, held in Washington, DC, USA, in June/July 2016. The 38 full papers presented were carefully reviewed and selected from 78 submissions. The goal of this conference was to build a new community of social cyber scholars by bringing together and fostering interaction between members of the scientific, corporate, government and military communities interested in understanding, forecasting and impacting human socio-cultural behavior. For this three challenges have to be met: deep understanding, socio-cognitive reasoning, and re-usable computational technology. Thus papers come from a wide number of disciplines: computer science, psychology, sociology, communication science, public health, bioinformatics, political science, and organizational science.

You Never Existed (A Poem #2.5) Adi K.,2022-10-19 Everyone, at some point in their life, wants the person who hurt them to disappear from the face of the earth, or at least, doesn't want to know them anymore. This is a book of broken heart poetry. About people who have been hurt. About regret knowing the wrong person. About the raw emotions of

anger and disappointment. About wanting to let go of the past. But of all the feelings of resentment that arise, there is only one feeling that matters the most: You never existed in my life.

Chasing Shadows Adi Dasgupta, Kishan Baskaran, Jamil Shamji, 2022-02-24 In *Chasing Shadows*, Toronto writers Adi Dasgupta, Kishan Baskaran, and Jamil Shamji invite you to explore dark places through verse and rhyme. This poetry anthology attempts to break down walls and find safe spaces in forgotten communities to be vulnerable, to be accountable, and perhaps, to heal. Compiled within this collection are narratives of violence, community, poverty, relationships, loss, sickness, and men's mental health. Inspired by lived experience on the fringes, and professional backgrounds supporting marginalized populations in Toronto, the writers endeavor to shed light on uncomfortable truths. Generous and defiant, these contemporary poems encourage honest and critical self-reflection. Reconciling with the mess. Finding rhythm to the chaos. Letting go with words. Chasing shadows.

Er erlebt Schwitzhütten und Astralreisen und er entdeckt einfache Formen der Magie und alte Rituale und noch vieles anderes - doch das ist erst der Anfang der langen Geschichte eines Zauberers ...

Israeli and Palestinian Collective Narratives in Conflict Adi Mana, Anan Srour, 2020-09-16 Examining the "social laboratory" of the Israeli and Palestinian societies

to better understand social conflicts and the construction of diverse and conflicting collective narratives, this book gives readers a window into Professor Shifra Sagy's unique approach to intergroup conflicts and peace education. With a focus on both theory and practice, it describes the model of perceptions of collective narratives that she developed with her colleagues. The contributions here offer insight into the intergroup conflicts between Israelis and Palestinians, Palestinian Muslims and Christians, Jewish 'National Religious' and people of ultra-Orthodox faith, and Palestinians living in Israel and those living in the West Bank. Perceptions of collective narratives help crystallize social identity, a sense of community and national coherence, and a culture of conflict. Often this creates obstacles to peace and conflict resolution. This book instead looks at how we can use these constructions to promote reconciliation.
