Takelma Texts and Grammar Victor Golla,2010-12-14 The works of Edward Sapir (1884 - 1939) continue to provide inspiration to all interested in the study of human language. Since most of his published works are relatively inaccessible, and valuable unpublished material has been found, the preparation of a complete edition of all his published and unpublished works was long overdue. The wide range of Sapir's scholarship as well as the amount of work necessary to put the unpublished manuscripts into publishable form pose unique challenges for the editors. Many scholars from a variety of fields as well as American Indian language specialists are providing significant assistance in the making of this multi-volume series.

**Naval Anti-Aircraft Guns & Gunnery** Norman Friedman,2014-01-21 A winner of the Samuel Eliot Morison Award for Naval Literature gives "an excellent overview of the problems involved in shooting at airplanes from ships." (Coast Defense Journal). This book does for naval anti-aircraft defense what the author's Naval Firepower did for surface gunnery—it makes a highly complex but historically crucial subject accessible to the layman. It chronicles the growing aerial threat from its inception in the First World War, and the response of each of the major navies down to the end of the Second, highlighting in particular the widely underestimated danger from dive-bombing. Central to this discussion is an analysis of what effective AA fire-control required, and how well each navy's systems actually worked. It also takes in the weapons themselves, how they were placed on ships, and how this reflected the tactical concepts of naval AA defense. Renowned military historian Norman Friedman offers striking insights he argues, for example, that the Royal Navy, so often criticized for lack of "air-mindedness," was actually the most alert to the threat, but that its systems were inadequate—not because they were too primitive but because they tried to achieve too much. The book summarizes the experience of WW2, particularly in theaters where the aerial danger was greatest, and a concluding chapter looks at post-1945 developments that drew on wartime lessons. All important guns, directors and electronics are represented in close-up photos and drawings, and lengthy appendices detail their technical data. It is, simply, another superb contribution to naval technical history by its leading exponent.

**Un-Limited - Oltre ogni limite** Sara Castelli,2019-12-19 2052, America. Nel più famoso dei continenti scoppia un'epidemia mortale che trasforma gli esseri umani in Limits, orribili mostri incapaci di ragionare. Allison e i suoi amici si ritrovano a dover

affrontare tutto ciò solo con le proprie forze. Ma cosa succederà nel momento in cui, da un giorno all'altro, le loro vite verranno stravolte da morti sconvolgenti e nuovi amori?

**Minimizing and Exploiting Leakage in VLSI Design** Nikhil Jayakumar,Suganth Paul,Rajesh Garg,2009-12-02 Power consumption of VLSI (Very Large Scale Integrated) circuits has been growing at an alarmingly rapid rate. This increase in power consumption, coupled with the increasing demand for portable/hand-held electronics, has made power consumption a dominant concern in the design of VLSI circuits today. Traditionally, dynamic (switching) power has dominated the total power consumption of an IC. However, due to current scaling trends, leakage power has now become a major component of the total power consumption in VLSI circuits. Leakage power reduction is especially important in portable/hand-held electronics such as cell-phones and PDAs. This book presents two techniques aimed at reducing leakage power in digital VLSI ICs. The first technique reduces leakage through the selective use of high threshold voltage sleep transistors. The second technique reduces leakage by applying the optimal Reverse Body Bias (RBB) voltage. This book also shows readers how to turn the leakage problem into an opportunity, through the use of sub-threshold logic.

Suhrawardi and the School of Illumination Mehdi Amin Razavi Aminrazavi,2014-03-18 Shihab al-Din Yahya Suhrawardi, also known as Shaikh al-ishraq or the Master of Illumination, lived in the sixth century AH / twelfth century CE. His thoughts form a consistent and coherent philosophical system, and a close study of his writings in Persian reveals a theory of knowledge generally called 'Knowledge by Presence'. The elaborate web of myth and symbolism in Suhrawardi's philosophy articulates his theory of knowledge, an important subject in the ishraqi school of thought. Suhrawardi, who claims first to have discovered the truth and then embarked on a path to find the rational basis of his experiential wisdom, represents a thinker who tried to reconcile rational discourse and inner purification.

**Short Treks on Corsica** Gillian Price,2021-08-25 With spectacular mountain landscapes, beautiful rugged coast, forests, maquis and striking river gorges, Corsica is a walker's paradise. This guidebook details five of the island's most popular shorter treks: the 2-day coastal Sentier du Douanier (Customs Officer's Path) around Cap Corse; two coast-to-coast routes through the central mountains, the 11-day Mare a Mare Nord and the 5-day Mare a Mare Sud; and two 'coast and mountains' routes, the 10-day Mare e Monti and the 5-day Mare e Monti Sud. (Corsica's famous 190km GR20 trail is described in a separate Cicerone guide.) The routes can be linked to create longer excursions and accommodation is provided by a mixture of walkers' hostels, B&Bs and hotels; camping is also an option. The guide presents each of the waymarked trails in daily stages averaging around 12-13km per day, with route description, mapping and notes on accommodation options. There is advice on how to get to Corsica, when to go and what to take, plus accommodation listings, useful contacts and a French/Corsican-English glossary. The guide also offers a wealth of information about the island's rich plant and wildlife. Considerably easier than the challenging GR20, these trails offer a more accessible option for trekkers wishing to

experience the 'real' Corsica, away from the bustling coastal resorts. You'll find enchanting scenery - towering forests, gushing cascades, turquoise coves, aromatic maquis, rugged mountains and quiet villages nestling on hillsides of chestnut woods - not to mention a favourable climate and delicious local cuisine. Don't be surprised if you fall under the island's spell!
