Apps for Librarians Nicole Hennig,2014-09-24 How can your library—and your patrons—benefit from mobile apps? This guidebook offers a solid foundation in app-literacy, supplying librarians with the knowledge to review and recommend apps, offer workshops, and become the app expert for their communities. Smartphones and other mobile devices that support downloadable applications—universally referred to as apps—can be used to foster productivity, conduct research, or read and study. Additionally, savvy librarians can better serve their communities by gaining expertise in mobile technologies and being qualified to make app recommendations to patrons. This book introduces you to the apps that can help you save time and increase your own productivity as well as serve as a curator and reviewer of apps and resident expert to benefit your patrons. Apps for Librarians: Using the Best Mobile Technology to Educate, Create, and Engage will save you from wading through and learning about the millions of apps available today and direct you to the very best apps in areas important to education, the workplace, and professional development. Organized by function—reading, writing, reference, multi-media, and productivity—apps are profiled with the following information: title, developer, price, platforms, general description, examples of use, and key features that make it worthwhile for learning and creative work.

The Artificial Pancreas Ricardo S. Sánchez-Peña,Daniel R. Chernavvsky,2019-04-15 The Artificial Pancreas: Current Situation and Future Directions presents research on the top issues relating to the artificial pancreas (AP) and its application to diabetes. AP is a newer form of treatment to accurately and efficiently inject insulin, thereby significantly improving the patient's quality of life. By connecting a continuous glucose monitor (CGM) to a continuous subcutaneous insulin infusion using a control algorithm, AP delivers and regulates the most accurate amount of insulin to maintain normal glycemic values. Featured chapters in this book are written by world leaders in AP research, thus providing readers with the latest studies and results. Focuses on Type 1 Diabetes Mellitus (T1DM) that is primarily found in children and typically treated by means of a syringe or insulin pump Features research and results from top academic experimental groups, and from universities such as Harvard (USA), the University of Virginia (USA), the University of Padova (Italy), the University of Montpellier (France), and the Buenos Aires Institute of Technology (Argentina) Discusses clinical trials of AP from around the world, including the United States, the EU, Latin America, and Israel
