Making Australian Foreign Policy on Israel-Palestine Eulalia Han, Halim Rane, 2013-02-01 Based on extensive research of Australian media coverage, public opinion, interest groups as well as in-depth interviews with current and former diplomats and politicians, this book provides a unique insight into the policy making process in regards to one of the world's most enduring and volatile dilemmas. Making Australian Foreign Policy on Israel-Palestine is a must read for anyone concerned about how social forces influence policy making and the impact this has on Australia's response to world affairs. American Foreign Policy, Current Documents , 1966

Australian Foreign Policy in Asia Allan Patience, 2017-12-12 This book sets out to discuss what kind of 'middle power' Australia is, and whether its identity as a middle power negatively influences its relationship with Asia. It looks at the history of the middle power concept, develops three concepts of middle power status and examines Australia's relationships with China, Japan and Indonesia as a focus. It argues that Australia is an 'awkward partner' in its relations with Asia due to both its historical colonial and discriminatory past, as well its current dependence upon the United States for a security alliance. It argues this should be changed by adopting a new middle power concept in Australian foreign policy.

Supplement to the American Journal of International Law, 1927

(section VI) International law, public law and jurisprudence. J.B. Scott, chairman ,1917

International News in the Digital Age Judith Clarke, Michael Bromley, 2012-01-25
The new research presented in this volume suggests that general perceptions (cultural, psychological, geographical), allied to the customs and values of journalism, and underpinned by the uses of technology, significantly shape international news. This gives rise to a blend of the old and the new; traditions of cultural centredness and innovative practices; anchorages of place and the

rootlessness of globalization. Technology per se has not swept all before it. On the other hand, its uses have altered the means and methods of international news sourcing, construction and dissemination. Consequently, the uptake of technology has contributed to fundamental changes in style and form, and has greatly facilitated cross-cultural exchanges. The category 'international news' is now more of a hybrid, as recognized by the BBC and others. The chapters in this book demonstrate that this hybridity is unevenly distributed across geo-political domains, and often across time. Nevertheless, as the contributors to this volume show, the concept of 'international news' relies on tightly interwoven elements of orthodox journalism, social media, civic expression and public assembly.

Australia-China Relations post 1949 Yi

Wang, 2016-04-08 This book challenges the common perceptions of Australian dependence upon great-power allies in the conduct of its foreign relations through a critical examination of Australia's relations with the People's Republic of China. The author focuses on the economic and political dimensions of the policy-making process from the founding of the PRC in 1949 to the present era, against an analytical framework that takes into account both internal and external factors in the formulation and implementation of

Australian foreign policy. Informed by political science and international relations, the book differs from the conventional literature on Sino-Australian relations, which has either focused on pure economic analysis or concentrated on chronicling historical events. The author weaves theoretical insights from political science and international relations into the historical analysis while seeking to examine the interplay between political and economic factors over time in shaping policy outcomes. The book draws not only on primary and secondary sources but also on information and insights obtained from interviews with a vast array of direct participants in the policy process, including almost all the former ambassadors from both China and Australia, covering the entire period of the diplomatic relationship. As a result, the book breaks new ground, especially from the Hawke era onwards, revealing hitherto overlooked details of interest in the policy process.

Australian-Latin American Relations E.

Kath, 2016-06-14 Until recently, Australia and Latin America were considered irrelevant to one another. The prevailing perception in Australia had been that Latin America was too remote, disconnected, and politically irrelevant to warrant serious scholarly or public attention. In recent years, this perception has rapidly changed, with Australian universities seeking to attract Latin American students, new diplomatic relations emerging, investment in mining and other business sectors expanding, and a growing fascination in Australia with Latin American food, music, dance

and other forms of popular culture. These rapid developments can only properly be understood within the context of broader global transformations underway, including shifts in power relations between the 'Global North' and 'Global South', the rise of key Latin American economies, major technological developments, and ever-increasing global interconnectivity. This pioneering interdisciplinary book ventures into the new space of Australian-Latin American relations, exploring multiple dimensions of the rapidly changing landscape within a global context.

Australian Foreign Policy in the Age of Terror Carl Ungerer, 2008 This textbook examines changes to Australian foreign policy since 9/11 and the rise of global Islamic terrorism. It covers each of the main areas of Australian foreign policy – security, trade, development assistance, multilateral institutions and bilateral relations. The first section deals with the strategic dimensions of foreign policy, the second with global dimensions, and the final section deals with regional or geographic dimensions. It is a critical examination of the transnational forces that are influencing the future conduct of Australian policy.

Asian Yearbook of International Law, Volume 27 (2021) , 2023-11-20 Launched in 1991, the Asian Yearbook of International Law is a major internationally-refereed yearbook dedicated to international legal issues as seen primarily from an Asian perspective. It is published under the auspices of the Foundation for the Development of International Law in Asia (DILA) in collaboration with DILA-Korea, the Secretariat of DILA, in South Korea. When it was launched, the Yearbook was the first publication of its kind, edited by a team of leading international law scholars from across Asia. It provides a forum for the publication of articles in the field of international law and other Asian international legal topics. The objectives of the Yearbook are two-fold: First, to

promote research, study and writing in the field of international law in Asia; and second, to provide an intellectual platform for the discussion and dissemination of Asian views and practices on contemporary international legal issues. Each volume of the Yearbook contains articles and shorter notes; a section on Asian state practice; an overview of the Asian states' participation in multilateral treaties and succinct analysis of recent international legal developments in Asia; a bibliography that provides information on books, articles, notes, and other materials dealing with international law in Asia; as well as book reviews. This publication is important for anyone working on international law and international relations.

Multiple Nationality and International Law

Alfred M. Boll, 2006-11-14 This book is a comprehensive overview of multiple nationality in international law, and contains a survey of current State practice covering over 75 countries. It examines the topic in light of the historical treatment of multiple nationality by States, international bodies and commentators, setting out the general trends in international law and relations that have influenced nationality. While the book's purpose is not to debate the merits of multiple nationality, but to present actual state practice, it does survey arguments for and against multiple nationality, and considers States' motivations in adopting a particular attitude toward the topic. As a reference work, the volume includes a detailed examination of the nature of nationality under international law and the

concepts of nationality and citizenship under municipal law. The survey of State practice also constitutes a valuable resource for practitioners.
