Aerial Robotic Manipulation Anibal Ollero,Bruno Siciliano,2019-06-27 Aerial robotic manipulation integrates concepts and technologies coming from unmanned aerial systems and robotics manipulation. It includes not only kinematic, dynamics, aerodynamics and control but also perception, planning, design aspects, mechatronics and cooperation between several aerial robotics manipulators. All these topics are considered in this book in which the main research and development approaches in aerial robotic manipulation are presented, including the description of relevant systems. In addition of the research aspects, the book also includes the deployment of real systems both indoors and outdoors, which is a relevant characteristic of the book because most results of aerial robotic manipulation have been validated only indoor using motion tracking systems. Moreover, the book presents two relevant applications: structure assembly and inspection and maintenance, which has started to be applied in the industry. The Chapters of the book will present results of two main European Robotics Projects in aerial robotics manipulation: FP7 ARCAS and H2020 AEROARMS. FP7 ARCAS defined the basic concepts on aerial robotic manipulation, including cooperative manipulation. The H2020 AEROARMS on aerial robot with multiple arms and advanced manipulation capabilities for inspection and maintenance has two general objectives: (1) development of advanced aerial robotic manipulation methods and technologies, including manipulation with dual arms and multi-directional thrusters aerial platforms; and (2) application to the inspection and maintenance.

A Curated Guide: SEOUL Robert Koehler ,Hahna Yoon, 2019-01-30 Real Places. Real Life. Real Seoul. A Local Guide to the Hottest City in Asia What's the best way to tour around a foreign city? Unless you want to pilgrim through the obvious landmarks and take typical vacation shots at tourist restaurants, the best and the safest way would be to get help from a reliable local friend, especially if you plan to explore a newly emerging city in constant change like Seoul. But what if you don't have a reliable friend in Seoul? A Curated Guide: SEOUL, put together by a local editor and expat authors, will gladly be your friend. There's more to Seoul than palaces, bibimbap, K-pop, and soju Authors Robert Koehler, former editor-in-chief of SEOUL magazine, and Hahna Yoon, former editor of Time Out Seoul, have long been introducing Seoul's kaleidoscopic aspects to readers around the globe. Their insights in identifying the hidden gems of the city as well as their social, cultural, historical, and artistic knowledge have already been verified by the readers of their magazines, and Robert Koehler's last book, Seoul Selection Guides: SEOUL, even topped Amazon's Seoul tour guides category. Through this book, the two authors sought to present a selective curation distinguished from the humdrum travel information galore on and offline. Deviating from the beaten paths suggested by every previous Seoul guidebook, they curate lesser known enchantments: time-forsaken back alleys and exclusive local shops. While they don't avoid famous sites altogether, they recommend spots according to their personal experiences rather than popularity, catering to various tastes. From elegantly aged hanok to the hippest clubs in town, the book covers a wide spectrum of interests and preferences. Locals share the very best Asia's hottest metropolis has to offer A Curated Guide: SEOUL is comprised of 10 sections: Neighborhoods, Historic Architecture, Arts & Culture, Dining, Cafés & Teashops, Nightlife, Nature, Shopping, Experiences, and Accommodations. Want to get a rough idea of the huge metropolis and its layout? Warm up with the “Neighborhoods” section exploring the nine trendiest neighborhoods of Seoul. The authors' favorites are Euljiro, where the atmosphere shifts dramatically from day to night, and Seongsu-dong, known as the “Brooklyn of Seoul.” If you want more in-depth stories about life and culture in Seoul, check out the essays and interviews of a local architect, indie musician, chef, coffee expert, and DJ featured in the book. With more than 400 photos of vivid moments in the city, the guide offers a fresh perspective on Seoul for travelers, expatriates, or anyone who is simply curious about the city.

The Use of Consumer Neuroscience in Aroma Marketing J. Berčík, J. Gálová, A. Pavelka, 2021-12-21

Smell is one of the most sensitive senses and is closely connected with emotions. Everyone has experienced a moment where a scent changed their mood and brought up memories. In this book monitoring of the effect of aromas on consumer emotions is described. It starts with a general overview of the role of scents in marketing and the use of neuroscience tools in monitoring the impact of the stimuli on consumer emotions. Tools used by the authors are a consumer neuroscience tool - electroencephalography (EEG), a biometric method that monitors the galvanic skin response or skin perspiration (GSR), and a traditional data collection method - a questionnaire. With these tools, consumer response to three selected scents were monitored. One of the initial scents was selected and tested under 'normal' restaurant conditions. The authors describe how the information was obtained, and how the effect on consumer emotions was determined. 'The use of consumer neuroscience in aroma marketing' concludes with recommendations to improve the effectiveness of aromatisation in practice.
