Now you can design homes, therapeutic environments, work environments, and outdoor spaces to encourage growth and learning for the projected 500,000 children with ASD (in the United States alone) who are expected to reach adulthood by 2024. Topics discussed include: -Environmental design theories -Symptoms of ASD -Sensory processing deficits -Design needs of individuals on the spectrum at all ages -Design methods and solutions for spaces, including residential, learning, work, and therapeutic environments encompassing a wide range of budgets -Designing for self-actualization, well-being, and a high quality of life for the duration of an individual's life -Avenues for healthy living and aging in place -Biophilic design -Environmental impact on well-being - Strategies to promote active living as an integral part of the welfare focus.

Building Bridges between Soft and Statistical Methodologies for Data Science Luis A. García-Escudero,Alfonso Gordaliza,Agustín Mayo,María Asunción Lubiano Gomez,Maria Angeles Gil,Przemyslaw Grzegorzewski,Olgierd Hryniewicz,2022-08-24 Nowadays, data analysis is becoming an appealing topic due to the emergence of new data types, dimensions, and sources. This motivates the development of probabilistic/statistical approaches and tools to cope with these data. Different communities of experts, namely statisticians, mathematicians, computer scientists, engineers, econometricians, and psychologists are more and more interested in facing this challenge. As a consequence, there is a clear need to build bridges between all these communities for Data Science. This book contains more than fifty selected recent contributions aiming to establish the above referred bridges. These contributions address very different and relevant aspects such as imprecise probabilities, information theory, random sets and random fuzzy sets, belief functions, possibility theory, dependence modelling and copulas, clustering, depth concepts, dimensionality reduction of complex data and robustness.
