Who's Who in the Arab World 2007-2008 Publitec

Publications,2011-12-22 Who's Who in the Arab World 2007-2008 compiles information on the most notable individuals in the Arab world. Additionally, the title provides insight into the historical

background and the present of this influential and often volatile region. Part I sets out precise biographical details on some 6,000 eminent individuals who influence every sphere of public life in politics, culture and society. Part II surveys the 19 Arab Countries, providing detailed information on the geography, history, constitution, economy and culture of the individual countries. Part III provides information on the historical background of the Arab world. Indexes by country and profession supplement the biographical section. A select bibliography of secondary literature on the Middle East is also included.

Writing Muslim Identity Geoffrey Nash,2012-01-26 The relationship between Islam and the West is one of the most urgent and hotly debated issues of our time. This book is the first to offer a comprehensive overview of the way in which Muslims are represented within modern English writing, ranging from the novel, through memoir and travel writing to journalism. Covering a wide range of texts and authors, it scrutinises the identity 'Muslim' by looking at its inscription in recent and contemporary literary writing within the context of significant events like the Rushdie Affair and 9/11. Examining the wide range of writing internationally that takes Islam or Islamic cultures as its focus, the author discusses the representation of Muslim identity in writing by non-Muslim writers, former Muslim 'native informants', and practising Muslims.

The papers are organized in topical sections on software engineering; network; bioinformatics and e-health; biometrics technologies; Web engineering; neural network; parallel and distributed e-learning; ontology; image processing; information and data management; engineering; software security; graphics and multimedia; databases; algorithms; signal processing; software design/testing; e- technology; ad hoc networks; social networks; software process modeling; miscellaneous topics in software engineering and computer systems.

Nostalgia in Anglophone Arab Literature Tasnim

Qutait,2021-04-22 This book offers an in-depth engagement with the growing body of Anglophone Arab fiction in the context of theoretical debates around memory and identity. Against the critical tendency to dismiss nostalgia as a sentimental trope of immigrant narratives, Qutait sheds light on the creative uses to which it is put in the works of Rabi Alameddine, Ahdaf Soueif, Hisham Matar, Leila Aboulela, Randa Jarrar, Rawi Hage, and others. Arguing for the necessity of theorising cultural memory beyond Eurocentric frameworks, the book demonstrates how Arab novelists writing in English draw on nostalgia as a touchstone of Arabic literary tradition from pre-Islamic poetry to the present. Qutait situates Anglophone Arab fiction within contentious debates about the place of the past in the Arab world, tracing how writers have deployed nostalgia as an aesthetic strategy to deal with subject matter ranging from the Islamic golden age, the era of anti-colonial struggle, the failures of the postcolonial state and of pan-Arabism, and the perennial issue of the diaspora's relationship to

the homeland. Making a contribution to the transnational turn in memory studies while focusing on a region underrepresented in this field, this book will be of interest for researchers interested in cultural memory, postcolonial studies and the literatures of the Middle East.

COVID-19 Related Acute Vascular Distress Syndrome: from Physiopathology to Treatment Yazine Mahjoub, Vincent Jounieaux, Daniel Rodenstein, 2023-11-15 The COVID-19 pandemic hit the world at end of 2019. More than a year after, the world is still struggling with three million deaths. From our early experience, we suggested that COVID-19 disease is a vascular disease and that the lung is probably more sensitive than other organs. This hypothesis led us to introduce in April 2020 the acronym “AVDS” for Acute Vascular Distress Syndrome. This acronym seems to be more appropriate for COVID-19 than the usual ARDS (acute respiratory distress syndrome) acronym. At the lung level, the disease seems to be characterized, at any stage, by an increased pulmonary blood flow with an intrapulmonary right-to-left shunt. At the cellular level, vascular endothelialitis has been described. At the organ level, some authors described impairment of microcirculation and neoangiogenesis. These phenomena highly participate to the unusual presentation of COVID-19 pulmonary disease: from the “happy hypoxemia” phenomenon to the heterogenous response to prone positioning. Moreover, intravascular thrombosis due to unexpected alteration of fibrinolysis is responsible for high incidence of pulmonary embolism and impairment of other organs. It also seems that other organ vessels as heart, kidney or brain are targeted by the virus.

Kenaf Fibers and Composites S. M. Sapuan, M.R. Ishak, J. Sahari, Muhammed Lamin Sanyang, 2018-06-14 Kenaf fiber is gaining

attention as an alternative reinforcement for composite products due to low cost, reduced environmental impact, and attractive mechanical properties. *Kenaf Fibers and Composites* covers the breadth of these exciting materials, from raw material preparation to application in a variety of products. It discusses fiber characterization and properties, how to prepare kenaf-based composites, and design, manufacturing, and applications. It also covers hybrid fiber composites, kenaf fiber thermosetting composites, kenaf fiber thermoplastic composites, kenaf fibers in various lengths, and forms and arrangements such as particulates, continuous roving, and woven fabrics. Cellulose-based kenaf composites and kenaf fiber-filled biopolymer composites are presented.

papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Abdulrahman Mahjoub. Some websites may offer pirated or illegally obtained copies of

copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Abdulrahman Mahjoub, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal

information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Abdulrahman Mahjoub has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading

practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.
