Human Issues in Translation Technology Dorothy Kenny,2017-01-12 Translation technologies are moulded by and impact upon humans in all sorts of ways. This state-of-the-art volume looks at translation technologies from the point of view of the human users – as trainee, professional or volunteer translators, or as end users of translations produced by machines. Covering technologies from machine translation to online collaborative platforms, and practices from ‘traditional’ translation to crowdsourced translation and subtitling, this volume takes a critical stance, questioning both utopian and dystopian visions of translation technology. In eight chapters, the authors propose ideas on how technologies can better serve translators and end users of translations. The first four chapters explore how translators – in various contexts and with widely differing profiles – use and feel about translation technologies as they currently stand, while the second four chapters focus on the future: on anticipating needs, identifying emerging possibilities, and defining interventions that can help to shape translation practice and research. Drawing on a range of theories from cognitive to social and

psychological, and with empirical evidence of what the technologization of the workplace means to translators, *Human Issues in Translation Technology* is key reading for all those involved in translation and technology, translation theory and translation research methods.

The Power of Design-Build Sherif Hashem,2014-09-05 Design-build is a powerful project delivery approach. But how to actuate such power and deliver the design-build promise? This is what this book is all about. It provides the reader with cutting-edge knowledge, know-how, techniques, trade secrets, and best practices to deliver design-build projects in a safe and controlled manner. It covers the entire design-build process— from building the design-build team and winning the designbuild tender competition, to project management, selecting the best design-build solution, and the sound planning of designbuild activities. To this end, the book introduces a totally new and innovative design-build planning methodology, namely, the SAFEDB-methodology. The SAFEDB-methodology consists of three key components: develop design-build solutions, fast-tack design-build activities, and control design-build work progress. The first component is concerned with evaluating candidate design-build options and selecting the most effective design-build solution. The second component looks deep into overlapping design and construction activities and introduces an effective overlapping strategy enabling maximum safe schedule compression. The last methodology component focuses on enhancing the design-build schedule reliability by taking into account potential schedule branching and rework loops in a structured and proactive manner. A range of real-world practical examples of the methodology application are provided for clarity and immediate use by the readers. The book is meant for the design-build contractors, designers, and owners; for the professionals and the academics, those new to the design-build arena or the seasoned design-builders.

A Bike Like Sergio's Maribeth Boelts, 2022-02-01 "Boelts lays out Ruben's ethical dilemma and emotional turmoil without preaching, and his struggle toward the moral choice . . . is both dramatic and genuine." — Publishers Weekly (starred review) Ruben feels like he is the only kid without a bike. His friend Sergio reminds him that his birthday is coming, but Ruben knows his family can't afford that. So when Ruben sees a dollar bill fall out of someone's purse, he picks it up and puts it in his pocket. But when he gets home, he discovers it's not one dollar or even five or ten — it's a hundred-dollar bill, more than enough for a new bike just like Sergio's! Finders keepers, right? Presenting a relatable story with subtlety and heart, the creative team behind *Those Shoes* pairs up again for a story about how hard it can be to do the right thing.

Socrates in the Cave Paul J. Diduch, Michael P. Harding, 2019-01-24 This book addresses the problem of fully explaining Socrates' motives for philosophic interlocution in Plato's dialogues. Why, for instance, does Socrates talk to many philosophically immature and seemingly incapable interlocutors? Are his motives in these cases moral, prudential, erotic, pedagogic, or intellectual? In any one case, can Socrates' reasons for engaging an unlikely interlocutor be explained fully on the grounds of intellectual self-interest (i.e., the promise of advancing his own wisdom)? Or does his activity, including his self-presentation and staging of his death, require additional motives for adequate explanation? Finally, how, if at all, does our conception of Socrates' motives help illuminate our understanding of the life of reason as Plato presents it? By inviting a multitude of authors to contribute their thoughts on these questions—all of whom share a commitment to close reading, but

by no means agree on the meaning of Plato's dialogues—this book provides the reader with an excellent map of the terrain of these problems and aims to help the student of Plato clarify the tensions involved, showing especially how each major stance on Socrates entails problematic assumptions that prompt further critical reflection.

For the Love of Physics Walter Lewin, Warren Goldstein, 2011-05-03 “YOU HAVE CHANGED MY LIFE” is a common refrain in the emails Walter Lewin receives daily from fans who have been enthralled by his world-famous video lectures about the wonders of physics. “I walk with a new spring in my step and I look at life through physics-colored eyes,” wrote one such fan. When Lewin’s lectures were made available online, he became an instant YouTube celebrity, and The New York Times declared, “Walter Lewin delivers his lectures with the panache of Julia Child bringing French cooking to amateurs and the zany theatricality of YouTube’s greatest hits.” For more than thirty years as a

beloved professor at the Massachusetts Institute of Technology, Lewin honed his singular craft of making physics not only accessible but truly fun, whether putting his head in the path of a wrecking ball, supercharging himself with three hundred thousand volts of electricity, or demonstrating why the sky is blue and why clouds are white. Now, as Carl Sagan did for astronomy and Brian Green did for cosmology, Lewin takes readers on a marvelous journey in *For the Love of Physics*, opening our eyes as never before to the amazing beauty and power with which physics can reveal the hidden workings of the world all around us. “I introduce people to their own world,” writes Lewin, “the world they live in and are familiar with but don’t approach like a physicist—yet.” Could it be true that we are shorter standing up than lying down? Why can we snorkel no deeper than about one foot below the surface? Why are the colors of a rainbow always in the same order, and would it be possible to put our hand out and touch one? Whether introducing why the air smells so fresh after a lightning storm, why we briefly lose (and gain) weight when we ride in an elevator, or what the big bang would have sounded like had anyone existed to hear it, Lewin never ceases to surprise and delight with the extraordinary ability of physics to answer even the most elusive questions. Recounting his own exciting discoveries as a pioneer in the field of X-ray astronomy—arriving at MIT right at the start of an astonishing revolution in astronomy—he also brings to life the power of physics to reach into the vastness of space and unveil exotic uncharted territories, from the marvels of a supernova explosion in the Large Magellanic Cloud to the unseeable depths of black holes. “For me,” Lewin writes, “physics is a way of seeing—the spectacular and the mundane, the immense and the minute—as a beautiful, thrillingly interwoven whole.” His wonderfully inventive and vivid ways of introducing us to the revelations of physics impart to us a new appreciation of the remarkable beauty and intricate harmonies of the forces that govern our lives.
