Inventing Abstraction, 1910-1925 Leah Dickerman,Matthew Affron,2012 This book explores the development of abstraction from the moment of its declaration around 1912 to its establishment as the foundation of avant-garde practice in the mid-1920s. The book brings together many of the most influential works in abstractions early history to draw a cross-media portrait of this watershed moment in which traditional art was reinvented in a wholesale way. Works are presented in groups that serve as case studies, each engaging a key topic in abstractions first years: an artist, a movement, an exhibition or thematic concern. Key focal points include Vasily Kandinskys ambitious Compositions V, VI and VII; a selection of Piet Mondrians work that offers a distilled narrative of his trajectory to Neo-plasticism; and all the extant Suprematist pictures that Kazimir Malevich showed in the landmark 0.10 exhibition in 1915.0Exhibition: MoMA, New York, USA (23.12.2012-15.4.2013).

Drug-like Properties: Concepts, Structure Design and Methods Li Di,Edward H Kerns,2010-07-26 Of the thousands of novel compounds that a drug discovery project team invents and that bind to the therapeutic target, typically only a fraction of these have sufficient ADME/Tox properties to become a drug product. Understanding ADME/Tox is critical for all drug researchers, owing to its increasing importance in advancing high quality candidates to clinical studies and the processes of drug discovery. If the properties are weak, the candidate will have a high risk of failure or be less desirable as a drug product. This book is a tool and resource for scientists engaged in, or preparing for, the selection and optimization process. The authors describe how properties affect in vivo pharmacological activity and impact in vitro assays. Individual drug-like properties are discussed from a practical point of view, such as solubility, permeability and metabolic stability, with regard to fundamental understanding, applications of property data in drug discovery and examples of structural modifications that have achieved improved property performance. The authors also review various methods for the screening (high throughput), diagnosis (medium throughput) and in-depth (low throughput) analysis of drug properties. Serves as an essential working handbook aimed at scientists and students in medicinal chemistry Provides practical, step-by-step guidance on property fundamentals, effects, structure-property relationships, and structure modification strategies Discusses improvements in pharmacokinetics from a practical chemist's standpoint

An Early Self Susanne Zepp,2014-11-19 What role has Jewish intellectual culture played in the development of modern Romance literature? Susanne Zepp seeks to answer this question through an examination of five influential early modern texts written between 1499 and 1627: Fernando de Rojas's La Celestina, Leone Ebreo's Dialoghi d'amore, the anonymous tale Lazarillo de Tormes (the first picaresque novel), Montaigne's Essais, and the poetical renditions of the Bible by João Pinto Delgado. Forced to straddle two cultures and religions, these Iberian conversos (Jews who converted to Catholicism) prefigured the subjectivity which would come to characterize modernity. As New Christians in an intolerant world, these thinkers worked within the tensions of their historical context to question norms and dogmas. In the past, scholars have focused on the Jewish origins of such major figures in literature and philosophy. Through close readings of these texts, Zepp moves the debate away from the narrow question of the authors' origins to focus on the innovative ways these authors subverted and transcended traditional genres. She interprets the changes that took place in various literary genres and works of the period within the broader historical context of the sixteenth and seventeenth centuries, demonstrating the extent to which the development of early modern subjective consciousness and its expression in literary works can be explained in part as a universalization of originally Jewish experiences.

Working Detroit Steve Babson,1986 Babson recounts Detroit's odyssey from a bulwark of the open shop to the nation's foremost union town. Through words and pictures, Working Detroit documents the events in the city's ongoing struggle to build an industrial society that is both prosperous and humane. Babson begins his account in 1848 when Detroit has just entered the

industrial era. He weaves the broader historical realties, such as Red Scare, World War, and economic depression into his account, tracing the ebb and flow of the working class activity and organization in Detroit -- from the rise of the Knights of Labor and the American Federation of Labor in the 19th century, through the Congress of Industrial Organizations and the sitdown strike of the 1930s, to the civil rights and women's movements of the 1960s and 1970s. The book concludes with an examination of the present day crisis facing the labor movement.
