Lecture Slides for Programming in C++ (Version

2021-04-01) Michael D. Adams,2021-04-01 This document, which consists of approximately 2900 lecture slides, offers a wealth of information on many topics relevant to programming in C++, including coverage of the C++ language itself, the C++ standard library and a variety of other libraries, numerous software tools, and an assortment of other programming-related topics. The coverage of the C++ language and standard library is current with the C++20 standard. C++ PROGRAMMING LANGUAGE. Many aspects of the C++ language are covered from introductory to more advanced. This material includes: the preprocessor, language basics (objects, types, values, operators, expressions, control-flow constructs, functions, namespaces, and comparison), classes, templates (function, class, variable, and alias templates, variadic templates, template specialization, and SFINAE), concepts, lambda expressions, inheritance (run-time polymorphism and CRTP), exceptions (exception safety and RAII), smart pointers, memory management (new and delete operators and expressions, placement new, and allocators), rvalue references (move semantics and perfect forwarding), coroutines, concurrency (memory models,

and happens-before and synchronizes-with relationships), modules, compile-time computation, and various other topics (e.g., copy elision and initialization).

C++ STANDARD LIBRARY AND VARIOUS OTHER LIBRARIES.

Various aspects of the C++ standard library are covered including: containers, iterators, algorithms, ranges, I/O streams, time measurement, and concurrency support (threads, mutexes, condition variables, promises and futures, atomics, and fences). A number of Boost libraries are discussed, including the Intrusive, Iterator, and Container libraries. The OpenGL library and GLSL are discussed at length, along with several related libraries, including: GLFW, GLUT, and GLM. The CGAL library is also discussed in some detail.

SOFTWARE TOOLS.

A variety of software tools are discussed, including: static analysis tools (e.g., Clang Tidy and Clang Static Analyzer), code sanitizers (e.g., ASan, LSan, MSan, TSan, and UBSan), debugging and testing tools (e.g., Valgrind, LLVM XRay, and Catch2), performance analysis tools (e.g., Perf, PAPI, Gprof, and Valgrind/Callgrind), build tools (e.g., CMake and Make), version control systems (e.g., Git), code coverage analysis tools (e.g., Gcov, LLVM Cov, and Lcov), online C++ compilers (e.g., Compiler Explorer and C++ Insights), and code completion tools

(e.g., YouCompleteMe, and LSP clients/servers). OTHER TOPICS.

An assortment of other programming-related topics are also covered, including: data structures, algorithms, computer arithmetic (e.g., floating-point arithmetic and interval arithmetic), cache-efficient algorithms, vectorization, good programming practices, software documentation, software testing (e.g., static and dynamic testing, and structural coverage analysis), and compilers and linkers (e.g., Itanium C++ ABI).

Queen's University Frederick W. Gibson,1983-10-01 The author emphasizes the role of individuals and yet makes it quite evident that by the time of her centenary in the early days of World War II, Queen's had developed an organic vitality through which the vicissitudes occasioned by external fortunes or by internal tensions could be transcended. Throughout the period covered by this volume Queen's faced a long, hard struggle for adequate resources for research in terms of space, equipment, and most importantly, faculty time; the gradual development of graduate work; and the building of library resources. There was firm and creative leadership through the crises of the war and its aftermath and a renewal of optimism through the final decades of this history.

The Supreme Court in Conference (1940-1985) Del Dickson,2001-07-12 The Supreme Court in Conference offers a fascinating and unprecedented look at the private debates between Justices on nearly 300 landmark cases from 1940-1985. Major decisions such as Roe v. Wade and Brown v. Board of Education are covered and the notes of Justices Felix Frankfurter, William O. Douglas, Frank Murphy, Robert Jackson, Harold Burton, Tom

Clark, Earl Warren and William Brennan are opened to shed light on what goes on behind the closed doors of the secretive conference room. In this unique and revealing work on some of the most profound rulings made at a turbulent time in American history, the reader is given insight into how and why certain decisions were reached. With expert editing by Del Dickson—who provides annotations and an introduction to each case, placing them in legal and historical context—cases on issues such as free speech, the rights of the accused, religion, Presidential power, equal protection, affirmative action and the death penalty are discussed. Dickson also includes a lively and incisive history of the Supreme Court, from its beginning to the present, illuminating how the conference works, how it has evolved, its various animosities, triumphant successes and glaring failures. As the first major reference work on this subject, this easy-to-use book offers the most reliable evidence available on the internal workings of the Supreme Court. It is the ideal source for scholars, law students, historians and anyone interested in how Supreme Court decisions are truly made.

Monk's Tale Edward A. Malloy C.S.C., 2011-08-15 In Monk's

Tale: Way Stations on the Journey, Father Malloy carries forward the story of his professional life from when he joined the Notre Dame faculty in 1974 to his election as president of Notre Dame. His journey in this volume begins with the various administrative responsibilities he undertook on the seminary staff and in the theology department during his early years as an administrator and teacher, and continues through his tenure as vice-president and associate provost, up to the process that led to his selection as Notre Dame's sixteenth president. He reveals his day-to-day responsibilities and the challenges they presented as well as the ways in which his domestic and international travel gave him a broader view of the opportunities and issues facing higher education. Less time-bound than the first volume, this second volume of Father Malloy's memoirs provides an account of his many commitments as a teacher, scholar, and pastor; as a staff person in an undergraduate residence hall; and as a board member in a wide variety of not-for-profit organizations. His account includes a chapter devoted to his fifteen years as a participant in the process that led to *Ex Corde Ecclesiae*, Pope John Paul II's apostolic constitution on Catholic higher education, and its implementation in the United States. Disarming in its

candor, laced with anecdotes, and augmented with photographs, Monk's Tale: Way Stations on the Journey captures the personality and tenacity of a young priest as he assumes ever greater responsibilities on a path toward the presidency of Notre Dame.
