**Shallow Geothermal Systems** Geotechnik, Deutsche Gesellschaft für Geowissen, 2016-05-13 The recommendations summarise the state of the art. Their aim is the proper exploitation of the ground for geothermal purposes without adversely affecting the ground or the groundwater on the one hand and the operation of the system and nearby buildings on the other. The recommendations should be used during consulting, design, installation and operation in order to achieve optimum and sustainable use of the ground at a specific location. Authorities responsible for supervising and approving projects can use the recommendations as a guide when taking decisions and making stipulations. The Geothermal Energy Study Group was set up in Bochum in 2004 and became the joint DGGV/DGGT study group in 2007. Some 20 specialists from universities, authorities and engineering consultants are active in the group and meet two or three times a year.

*Dave and Nick* Ann Treneman, 2011-10-31 You will not read this story of Dave and Nick anywhere else. Ann Treneman, the sketchwriter for The Times, chronicles all the highlights (and even more of the lowlights) of their extraordinary relationship in a love story that not even Mills & Boon could imagine. Two posh boys who found each other, a bromance to remember, full of love, hate, fratricide, war, riots, bad hair and even worse speeches, not to mention that sexy AV referendum. Through her perceptive sketches, Ann Treneman tells the story of how they dated, flirted with others (including the brooding hulkish Gordon), but eventually came together in a sun-kissed wedding in the Downing Street rose garden. She reveals how Nick struggled to be the perfect political wife while starting a new sub-career as a national hate figure, and chronicles Dave's long and bruising battle with arrogance. She tells the shocking story of their arch rival, the man who killed his brother and got away with it. The nightmare of the grandparents, the mad aunts and uncles, the ambitious kids and the economy that simply would not do as it was told. This is the tale of two men and a screaming baby of a coalition, trying to stay true to each other when surrounded by political mayhem and madness. Laugh? Or cry (with laughter)? How about both?

Born In Huronia Robert Popple, 2020-04-17 On September 28, 1941, the same day that Robert Popple was born in Penetanguishene, Ontario, Ted Williams ended his baseball season with a .406 batting average, a MLB record that still stands today. Patterned after Mark Twain's recently published autobiography, this memoir describes Popple's life growing up in 1950s Huronia and later, making his way in the world. With public confidence in nuclear power declining after the Three Mile Island accident and CANDU reactors supplying the lion's share of Ontario's electric power, Popple acted as the Ontario Hydro nuclear spokesman for five years. An exact transcript of his mother's 53-year Family Log is included, a prized source of detail on early events.

*The Dam Code* Lise Rochon, 2023-04-25 This is a dangerous book to read so the reader is warned to be prepared and read the Introduction first to be more acquainted with that new knowledge. This book is dedicated to women. This book relates how The Code of Words and Letters and other Occult sciences were infiltrated in the general population at all levels for about 2000 years to the very poor, uneducated to the very rich and educated. This book is

inspirational. It is an empirical study therefore its length. This book came to me as only a few clues to eventually become a tsunami of inspiration.

**Computational Modeling of Shallow Geothermal Systems** Rafid Al-Khoury, 2011-09-30 A Step-by-step Guide to Developing Innovative Computational Tools for Shallow Geothermal Systems Geothermal heat is a viable source of energy and its environmental impact in terms of CO2 emissions is significantly lower than conventional fossil fuels. Shallow geothermal systems are increasingly utilized for heating and cooling of buildings and greenhouses. However, their utilization is inconsistent with the enormous amount of energy available underneath the surface of the earth. Projects of this nature are not getting the public support they deserve because of the uncertainties associated with them, and this can primarily be attributed to the lack of appropriate computational tools necessary to carry out effective designs and analyses. For this energy field to have a better competitive position in the renewable energy market, it is vital that engineers acquire computational tools, which are accurate, versatile and efficient. This book aims at attaining such tools. This book addresses computational modeling of shallow geothermal systems in considerable detail, and provides researchers and developers in computational mechanics, geosciences, geology and geothermal engineering with the means to develop computational tools capable of modeling the complicated nature of heat flow in shallow geothermal systems in rather straightforward methodologies. Coupled conduction-convection models for heat flow in borehole heat exchangers and the surrounding soil mass are formulated and solved using analytical, semi-analytical and numerical methods. Background theories, enhanced by numerical examples, necessary for formulating the models and conducting the solutions are thoroughly addressed. The book emphasizes two main aspects: mathematical modeling and computational procedures. In geothermics, both aspects are considerably challenging because of the involved geometry and physical processes. However, they are highly stimulating and inspiring. A good combination of mathematical modeling and computational procedures can greatly reduce the computational efforts. This book thoroughly treats this issue and introduces step-by-step methodologies for developing innovative computational models, which are both rigorous and computationally efficient.

Advances in Ground-Source Heat Pump Systems Simon Rees, 2016-05-13 Advances in Ground-Source Heat Pump Systems relates the latest information on source heat pumps (GSHPs), the types of heating and/or cooling systems that transfer heat from, or to, the ground, or, less commonly, a body of water. As one of the fastest growing renewable energy technologies, they are amongst the most energy efficient systems for space heating, cooling, and hot water production, with significant potential for a reduction in building carbon emissions. The book provides an authoritative overview of developments in closed loop GSHP systems, surface water, open loop systems, and related thermal energy storage systems, addressing the different technologies and component methods of analysis and optimization, among other subjects. Chapters on building integration and hybrid systems complete the volume.

**Key Works in Radical Constructivism** Ernst von Glasersfeld, 2007-01-01 Key Works on Radical Constructivism brings together a number of essays by Ernst von Glasersfeld that illustrate the application of a radical constructivist way of thinking in the areas of education, language, theory of knowledge, and the analysis of a few concepts that are indispensable in almost everything we think and do.

Proceedings of 2021 International Conference on Medical Imaging and Computer-Aided Diagnosis (MICAD 2021) Ruidan Su, Yu-Dong Zhang, Han Liu, 2021-08-14 This book covers virtually all aspects of image formation in medical imaging, including systems based on ionizing radiation (x-rays, gamma rays) and non-ionizing techniques (ultrasound, optical, thermal, magnetic resonance, and magnetic particle imaging) alike. In addition, it discusses the development and application of computer-aided detection and diagnosis (CAD) systems in medical imaging. Also there will be a special track on computer-aided diagnosis on COVID-19 by CT and X-rays images. Given its coverage, the book provides both a forum and valuable resource for researchers involved in image formation, experimental methods, image performance, segmentation, pattern recognition, feature extraction, classifier design, machine learning / deep learning, radiomics, CAD workstation design, human-computer interaction, databases, and performance evaluation.

**Great Singers** Denes Striny, 2012-07-10 This book supplies detailed explanations for young singers, teachers, and professional singers with 'troubled' voices. Striny's previous book, Head First, discussed this process but without specific instructions to accomplish the task. This completely original process was conceived by Striny to correct major problems in his voice.
