Robotic Surgery in Otolaryngology Head and Neck Surgery Nilesh R Vasan,2015-08-31 Robotic Surgery in Otolaryngology, Head & Neck Surgery demonstrates the advantages of robotic surgery, providing guidance on accessing parts of the head and neck which are difficult to visualise, and are manually inaccessible to the surgeon. The book is divided into thirteen chapters across four sections. The first section covers transoral robotic surgery (TORS), a procedure to remove oral cancers whereby a surgeon uses a sophisticated, computer-enhanced system to guide the surgical tools (mayoclinic.org). The second section provides information on robotic thyroid surgery. The third section covers head and neck reconstruction using TORS and the final section discusses forms of robotic surgery currently in development. Robotic Surgery in Otolaryngology, Head & Neck Surgery is a forward-thinking book, written by leading practitioners and edited by US based specialist Nilesh R Vasan from the University of Oklahoma Health Sciences Centre. With nearly 200 full colour images and illustrations, including many diagrams, this is an invaluable guide to current and future technologies in robotic surgery for otolaryngologists, and head and neck surgeons. Key Points Guide to robotic surgery in head and neck surgery Describes robotic procedures currently in development Nearly 200 full colour images and illustrations Edited by US-based specialist Nilesh R Vasan at the University of Oklahoma Health Sciences Centre

French Destroyers John Jourdan,Jean Moulin,2015-06-22 Between the wars the French produced some of the largest, and certainly the fastest, destroyers in the world. Known as Contre-Torpilleurs, these striking and innovatory super-destroyers form the core of this book, but the more conventional Torpilleurs d'Escadre are also covered. This history combines the technical and service material published in French-language monographs over the past two decades with the authors' own research from primary sources. The structure of the book follows that of the highly successful French Cruisers, with Part I devoted to the design of each of the classes built after 1922. The text is accompanied by detailed data tables and illustrated by a comprehensive set of specially-drawn plans and schemas based on official documents, as well as carefully-selected photographs from French naval sources and from private collections. Coverage runs down to the Le Hardi class, the last pre-war design.. Part II deals with the historical side, covering the eventful careers of these ships before, during and after the war. This section is illustrated by maps specially drawn for the book, and by contemporary photographs. Like its highly successful predecessors, French Battleships and French Cruisers, this beautifully presented book blends technical and historical analysis to produce what must become the standard English-language reference work.

Britain and Tibet 1765-1947 Julie Marshall,2004-11-23 This bibliography is a record of British relations with Tibet in the period from 1765 to 1947. It also provides background information to Tibet's claims to independence, an issue of current importance. The work is divided into a number of sections and subsections, based on chronology, geography and events. The introductions to each of the sections provide a condensed and informative history of the period and place the books and articles in their historical context. This work is both a history and a bibliography of the subject, and provides a rapid entry into a complex area for scholars in the fields of international relations and military history as well as Asian history.
