Look-Ahead Based Sigma-Delta Modulation Erwin Janssen, Arthur van Roermund, 2011-04-02 The aim of this book is to expand and improve upon the existing knowledge on discrete-time 1-bit look-ahead sigma-delta modulation in general, and to come to a solution for the above mentioned specific issues arising from 1-bit sigma-delta modulation for SA-CD. In order to achieve this objective an analysis is made of the possibilities for improving the performance of digital noise-shaping look-ahead solutions. On the basis of the insights obtained from the analysis, several novel generic 1-bit look-ahead solutions that improve upon the state-of-the-art will be derived and their performance will be evaluated and compared. Finally, all the insights are combined with the knowledge of the SA-CD lossless data compression algorithm to come to a specifically for SA-CD optimized look-ahead design.

Ahead in the Cloud Stephen Orban, 2018-03-27 Cloud computing is the most significant technology development of our lifetimes. It has made countless new businesses possible and presents a massive opportunity for large enterprises to innovate like startups and retire decades of technical debt. But making the most of the cloud requires much more from enterprises than just a technology change. Stephen Orban led Dow Jones's journey toward digital agility as their CIO and now leads AWS's Enterprise Strategy function, where he helps leaders from the largest companies in the world transform their businesses. As he demonstrates in this book, enterprises must re-train their people, evolve their processes, and transform their cultures as they move to the cloud. By bringing together his experiences and those of a number of business leaders, Orban shines a light on what works, what doesn't, and how enterprises can transform themselves using the cloud.

Green Software Defined Radios Liesbet Van der Perre, Jan Craninckx, Antoine Dejonghe, 2008-12-21 Green Software Defined Radios, the title of this book may have originated from a lack of inspiration, and the combination of hard work, jetlag, and drinking green tea.

The message we want to convey however, is that SDRs are a promising technology for the future, providing they are designed for efficient usage of scarce resources: energy and spectrum. In the last years, the R&D teams focusing on wireless communication (around the world and at IMEC specifically), have realized great breakthroughs. It is our honor, building on this knowledge, to bring a comprehensive overview of the essential technologies. We are grateful that Springer is willing to publish in their collection on radio technologies, a book on green SDRs, a weird species still today, yet maybe the baseline for the day after tomorrow. Dear reader, we wish that you find in the following pages, including the references, some interesting insights, and that this book may live more or less up to your expectations (and hopefully more than less). This book's closing state that the quest for Green SDRs has not ended, this is just the beginning. Concerning this book however, we are happy that today the opposite is true. We want to acknowledge our colleagues at IMEC for their great scientific contribution, and even more for the enjoyable cooperation.

16th International Conference on Soft Computing Models in Industrial and Environmental Applications (SOCO 2021) Hugo Sanjurjo González, Iker Pastor López, Pablo García Bringas, Héctor Quintián, Emilio Corchado, 2021-09-22 This book of Advances in Intelligent and Soft Computing contains accepted papers presented at SOCO 2021 conference held in the beautiful and historic city of Bilbao (Spain), in September 2021. Soft computing represents a collection or set of computational techniques in machine learning, computer science, and some engineering disciplines, which investigate, simulate, and analyze very complex issues and phenomena. After a thorough peer-review process, the 16th SOCO 2021 International Program Committee selected 78 papers which are published in these conference proceedings and represents an acceptance rate of 48%. In this relevant edition, a special emphasis is put on the organization of special sessions. Seven special sessions are organized related to relevant topics as follows: applications of machine learning in computer vision; soft computing applied to autonomous robots and renewable energy systems; optimization, modeling, and control by soft computing techniques (OMCS); challenges and new approaches toward artificial intelligence deployments in real-world scenarios; time series forecasting in industrial and environmental applications (TSF); soft computing methods in manufacturing and management systems and applied machine learning. The selection of papers was extremely rigorous in order to maintain the high quality of the conference, and we would like to thank the members of the program committees for their hard work in the reviewing process. This is a crucial process to the creation of a high standard conference, and the SOCO conference would not exist without their help.

The New Sociology of Ageing Martin Slattery, 2021-11-29 The New Sociology of Ageing explores the challenges and opportunities of ageing as a global force. Alongside globalisation, urbanisation, new technology, climate change, and global pandemics, ageing is

transforming life in the twenty-first century. Through the eyes of a young sociology student and her multigenerational family, this book sets out a new sociological framework to interpret ageing societies. It explores how the ‘New Old’ – the baby boomer generation – might be mobilised as an agency of social change in transforming later life. It proposes this generation as the co-architects of a new intergenerational social contract for the era ahead, rather than as the recipients of a post-war twentieth-century social contract that society can no longer support. Taking Britain as a case study and societies across the world as examples, Slattery explores emerging revolutions in work and retirement, potential crises in pensions, healthcare and housing, as well as transformations in family life and in our attitudes to sex and death in later life. This book provides a clear overview of the sociology of ageing. It introduces students to demography as a sociological force of the future, and to the perils and the promises of longevity as societies across the world approach the Hundred-Year Life. This book will be of interest to undergraduate students and early scholars in the social sciences, particularly in sociology, gerontology, social policy, and public health.

These features are followed by a set of independent practice problems. The expanded Making it Real feature showcases topics of current interest relating to the subject at hand such as chemical forensics and more medical related topics. Numerous worked examples in the text now include Analysis and Synthesis sections, which allow engineers to explore concepts in greater depth, and discuss outside relevance.
