Three Brothers\' Management Story Sun Seunghoon, Eileen Gibson Funke, 2022-07-22 Almost thirty years have passed since I started managing hospitals. Currently, I am expanding additional lines of business in the medical field, managing businesses such as Corentec and InssTek. Hospital management was a big challenge for me because I started my professional career as a banker. Now I hope to fulfill my second dream as I return to becoming a corporate man. The experience of managing a hospital has helped me a great deal in managing Corentec, as the clients for the business are hospitals. Just as I have felt when managing a hospital, something I realized in managing Corentec was that what matters the most are the employees and colleagues whom you work with. At Corentec, we make artificial joints that are inserted in bones. Therefore, we have to deliver perfect quality and result through continuous advancements. The key factor in getting great results is the technology that comes from 'people.' That is why I always think about the happiness of our employees. Our employees spend a significant portion of their lives at the company. Therefore, they cannot live a happy life if they are not happy at the company. The pride our employees have in the fact that our products are the best in the world becomes the origin of happiness that cannot be exchanged with anything. We will continue to nurture many future CEO candidates who are going to lead the organization focusing on the happiness of our employees. The updated business management story of the three brothers contains stories from both the first and second books as well as some new stories. I hope this revised version becomes a book which our employees can turn to when looking for life lessons. Lastly, I would like to thank everyone in our hospital, all the employees at our companies, and my family for all their hard work and support. I hope the sharing of my experience can be a little help for anyone who is reading this book. Seung Hoon Sun

Tiger Management Martin Hemmert, 2012-10-02 Throughout the last several decades, Korean companies have entered the world markets in a wide range of manufacturing industries with great success. How did they achieve this exceptional performance? This book uncovers the secret of their performance through a comprehensive analysis of the Korean management system. It explains to an international audience how it has developed, why it works so well, and what non-Koreans can learn from it. The book analyzes the management of Korean firms from three different perspectives. First, a historical perspective is applied by showing how Tiger Management has emerged and how it has been continuously advanced over the last 50 years. The breathtaking stories of how Korean companies, seemingly coming from nowhere, have challenged their Western and Japanese competitors on the world markets are told. Second, the cornerstones of Tiger Management are analyzed from a functional viewpoint, showing that the success of Korean companies rests on a smart combination of business strategy, leadership, and human resource management practices. Finally, the present and future of Tiger Management is discussed by showing how Korean companies have adapted to changes in their business environment at home and abroad, and what non-Korean companies can learn from their Korean rivals. The book gives an up-to-date analysis of Korean management practices from a global perspective. It identifies the success factors of Korean companies: long term, aggressive and persisting business planning, speed, flexibility, strong leadership, strong teamwork, and high investment into human skills and capabilities. It illustrates how these management practices complement each other and provides non-Korean companies with signposts how they can adopt them.
