Object-Oriented Technology. ECOOP '98 Workshop Reader Serge Demeyer, Jan Bosch, 2003-07-31 At the time of writing (mid-October 1998) we can look back at what has been a very successful ECOOP'98. Despite the time of the year - in the middle of what is traditionally regarded as a holiday period - ECOOP'98 was a record breaker in terms of number of participants. Over 700 persons found their way to the campus of the Brussels Free University to participate in a wide range of activities. This 3rd ECOOP workshop reader reports on many of these activities. It contains a careful selection of the input and a cautious summary of the outcome for the numerous discussions that happened during the workshops, demonstrations and posters. As such, this book serves as an excellent snapshot of the state of the art in the field of object oriented programming. About the diversity of the submissions A workshop reader is, by its very nature, quite diverse in the topics covered as well as in the form of its contributions. This reader is not an exception to this rule: as editors we have given the respective organizers much freedom in their choice of presentation because we feel form follows content. This explains the diversity in the types of reports as well as in their lay out.

Trends in Enterprise Architecture Research and Practice-Driven Research on Enterprise Transformation Stephan Aier, Mathias Ekstedt, Florian Matthes, Erik Proper, Jorge L. Sanz, 2012-10-06 This volume constitutes the proceedings of the combined 7th International Workshop on Trends in Enterprise Architecture Research (TEAR 2012) and the 5th Working Conference on Practice-Driven Research on Enterprise Transformation (PRET-5), held in Barcelona, Spain, October 23-24, 2012, and co-located with The Open Group's Conference on Enterprise Architecture, Cloud Computing, and Security. Joining the forces of the two events with The Open Group Conference provided the unique opportunity for an intensive exchange between practitioners as well as for discussions on standardization efforts and academic research in the areas of enterprise transformation and enterprise architecture (EA). Based on careful reviews by at least three Program Committee

members, 18 papers were chosen for inclusion in these proceedings. They were presented in six sessions on enterprise architecture management (EAM) effectivity, languages for EA, EAM and the ability to change, advanced topics in EA, governing enterprise transformations, and EA applications.

**Better Embedded System Software** Philip Koopman,2021-01-26 A classic book for professional embedded system designers, now in an affordable paperback edition. This book distills the experience of more than 90 design reviews on real embedded systems into a set of bite-size lessons learned in the areas of software development process, requirements, architecture, design, implementation, verification & validation, and critical system properties. This is a concept book rather than a cut-and-paste the code book.Each chapter describes an area that tends to be a problem in embedded system design, symptoms that tend to indicate you need to make changes, the risks of not fixing problems in this area, and concrete ways to make your embedded system software better. Each of the 29 chapters is self-sufficient, permitting developers with a busy schedule to cherry-pick the best ideas to make their systems better right away.If you are relatively new to the area but have already learned the basics, this book will be an invaluable asset for taking your game to the next level. If you are experienced, this book provides a way to fill in any gaps. **Developing and Managing Innovation in a Fast Changing and Complex World** Stig Ottosson, 2018-06-27 This book provides essential insights into how to rapidly and safely develop new sustainable products, no matter whether it is in the private sector, the public sector or the non-profit sector, and regardless of the specific national or business culture. The principles discussed were distilled from experiences and insights gained in numerous practical innovation endeavors, and from insider action research in connection with ongoing development, change management, and innovation projects in various areas and branches of the business world and non-commercial sector. In short, the practical work and research has revealed that, regardless of the specific product and/or business to be developed, clear advantages can be gained by using dynamic or agile methods based on modern theories. These advantages include: reduced risk of failure, shorter time to market, less money and effort spent, better outcome solutions, etc. than when classical methods are used. Accordingly, the book also highlights the differences between the classical/traditional and dynamic mindset and approaches. It offers suggestions on how to think, organize, lead, and act in order to excel in an increasingly complex and non-linear world. The more you can assimilate the theories, principles and methods - and integrate them in the culture you operate in - the greater the benefits will be for you and your organization.
