CEPAT MENGUASAI PEMROGRAMAN WEB Kharisman,2023-10-03 Buku ini diharapkan membantu pembaca untuk cepat memahami pemrograman Web. Salah satu script terpopuler dalam pemrograman Web adalah PHP dengan database MySQL. Tool pendukung lain adalah JQuery untuk script pada sisi klien dan Bootstrap untuk mempercantik tampilan. Pembaca akan diajak berkelana mempelajari masing-masing komponen pemrograman itu secara aplikatif. Buku ini sarat dengan contoh coding aplikatif yang dikemas secara bertahap untuk menguatkan pemahaman pada penggunaan masing-masing tool yang ada. Aplikasi sederhana yang diajarkan pada buku ini adalah seperti menghitung luas persegi panjang, menghitung berat badan ideal, menghitung nilai raport, pemrograman ke database dari CRUD (Create, Read, Update, Delete) hingga Transaksi yang berinteraksi dengan beberapa tabel database. Di bab terakhir, pembaca akan diajak menyusun sebuah aplikasi yang cukup lengkap dengan menu, master, transaksi, dan cetak laporan dengan menggabungkan semua tool yang telah dipelajari sebelumnya. Secara bertahap pembaca akan dikenalkan dengan konsep-konsep pemrograman dasar seperti Pencabangan dan Perulangan, maupun komponen dasar pada sebuah form seperti TextBox, ComboBox, dan Button. Masing-masing akan dikenalkan bagaimana jika desainnya tanpa Bootstrap, bagaimana jika dengan Bootstrap. Bagaimana jika codingnya dengan PHP saja. Bagaimana jika codingnya dengan JQuery saja. Termasuk bagaimana jika semua komponen itu dipadukan, yaitu PHP, Boostrap, dan JQuery menyimpan ke database MySQL. Karena bersifat dasar dan aplikatif, script yang diajarkan adalah menggunakan PHP Native yang belum menggunakan framework apapun seperti CodeIgniter, Laravel, dan semisalnya.

Net Works xtine burrough,2012-05-23 Net Works offers an inside look into the process of successfully developing thoughtful, innovative digital media. In many practice-based art texts and classrooms, technology is divorced from the socio-political concerns of those using it. Although there are many resources for media theorists, practice-based students sometimes find it difficult to

engage with a text that fails to relate theoretical concerns to the act of creating. Net Works strives to fill that gap. Using websites as case studies, each chapter introduces a different style of web project--from formalist play to social activism to data visualization--and then includes the artists' or entrepreneurs' reflections on the particular challenges and outcomes of developing that web project. Scholarly introductions to each section apply a theoretical frame for the projects. A companion website offers further resources for hands-on learning. Combining practical skills for web authoring with critical perspectives on the web, Net Works is ideal for courses in new media design, art, communication, critical studies, media and technology, or popular digital/internet culture.

Internet of Things, Infrastructures and Mobile Applications Michael E. Auer,Thrasyvoulos Tsiatsos,2020-09-10 This book gathers papers on interactive and collaborative mobile learning environments, assessment, evaluation and research methods in mobile learning, mobile learning models, theory and pedagogy, open and distance mobile learning, life-long and informal learning using mobile devices, wearables and the Internet of Things, game-based learning, dynamic learning experiences, mobile systems and services for opening up education, mobile healthcare and training, case studies on mobile learning, and 5G network infrastructure. Today, interactive mobile technologies have become the core of many—if not all—fields of society. Not only do the younger generation of students expect a mobile working and learning environment, but also the new ideas, technologies and solutions introduced on a nearly daily basis also boost this trend. Discussing and assessing key trends in the mobile field were the primary aims of the 13th International Conference on Interactive Mobile Communication Technologies and Learning (IMCL2019), which was held in Thessaloniki, Greece, from 31 October to 01 November 2019. Since being founded in 2006, the conference has been devoted to new approaches in interactive mobile technologies, with a focus on learning. The IMCL conferences have since become a central forum of the exchange of new research results and relevant trends, as well as best practices. The book's intended readership includes policymakers, academics, educators, researchers in pedagogy and learning theory, schoolteachers, further education lecturers, practitioners in the learning industry, etc.

Making Globally Distributed Software Development a Success Story Qing Wang,Dietmar Pfahl,David Raffo,2008-05-06 This volume contains papers presented at the International Conference on Software Process (ICSP 2008) held in Leipzig, Germany, during May 10-11, 2008. ICSP 2008 was the second conference of the ICSP series. The theme of ICSP 2008 was "Making Globally Distributed Software Development a Success Story. " Software developers work in a dynamic context of frequently changing technologies and with limited resources. Globally distributed development teams are under ev- increasing pressure to deliver their products more quickly and with higher levels of qu- ity. At the same time, global competition is forcing software development organizations to cut costs by rationalizing processes, outsourcing part of or all development activities, reusing existing software in new or modified applications, and evolving existing systems to meet new needs, while still minimizing the risk of projects failing to deliver. To address these difficulties, new and modified processes are emerging, including agile methods and plan-based product line development. Open Source, COTS, and com- nity-developed software are becoming more and more popular. Outsourcing coupled with 24/7 development demands well-defined processes to support the coordination of organizationally—and geographically—separated teams. The accepted papers present completed research or advanced work-in-progress in all areas of software and systems development process including: agile software pr- esses, CMMI, novel techniques for software process representation and analysis; process tools and metrics; and the simulation and modeling of software processes. Contributions reflecting real-world experience, or derived directly from industrial or open-source software development and evolution, were particularly welcome.

The conference program presents the state-of-the-art R&D activities in database systems and their applications. It provides a forum for technical presentations and discussions among database researchers, developers and users from academia, business and industry.
