SUBBA RAO

Agastya KAMALA CHANDRAKANT,1971-04-01 He outwitted the Vindhya mountain when, in its pride, it tried to obstruct the natural path of the sun. He drank all the waters of the ocean to expose the wicked Kalkeyas, who hid there after challenging the Gods to battle. Agastya is the most well-known among the Saptarshi. His stories are found not just in the Vedas but are scattered through the Brahmanas and the Puranas as well. These stories are known not only in India but are also a part of S.E. Asian mythology.

Hakka and bukka SUBBA RAO,1971-04-01 In 1310, the armies of Delhi were attacking the Deccan plateau, ransacking and plundering the prosperous temple towns of the South. Two brothers, Hakka and Bukka, fought valiantly against the invaders. Despite being defeated repeatedly they continued to fight, building a skilled armed force of their own. In this, they were helped by the powerful sage, Vidyaranya. With the support of the local people, Hakka and Bukka set up the city of Vijayanagar and Hakka became its first king, Harihara Raya. Their descendants ruled over a vast and powerful kingdom, extending from the west coast to the east, an empire that held sway for almost 300 years.

Transforming the Workforce for Children Birth Through Age 8 National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success,2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children

from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

She could lead armies to victory and yet be a doting wife. She could attend to the problems of a vast empire and at the same time be blissfully happy making perfumes. Emperor Jahangir fell under her spell and aptly named her Noor Jahan, for she lit up his world with her love.
