17th International Conference on Soft Computing Models in Industrial and Environmental Applications (SOCO 2022) Pablo García Bringas,Hilde Pérez García,Francisco Javier Martínez-de-Pison,José Ramón Villar Flecha,Alicia Troncoso Lora,Enrique A. de la Cal,Álvaro Herrero,Francisco Martínez Álvarez,Giuseppe Psaila,Héctor Quintián,Emilio S. Corchado Rodríguez,2022-10-11 This book contains accepted papers presented at SOCO 2022 conference held in the beautiful and historic city of Salamanca (Spain), in September 2022. Soft computing represents a collection or set of computational techniques in machine learning, computer science, and some engineering disciplines, which investigate, simulate, and analyze very complex issues and phenomena. After a thorough peer-review process, the 17th SOCO 2022 International Program Committee selected 64 papers which are published in these conference proceedings and represent an acceptance rate of 60%. In this relevant edition, a particular emphasis was put on the organization of special sessions. Seven special sessions were organized related to relevant topics such as machine learning and computer vision in Industry 4.0; time series forecasting in industrial and environmental applications; optimization, modeling, and control by soft computing techniques; soft computing applied to renewable energy systems; preprocessing big data in machine learning; tackling real-world problems with artificial intelligence. The selection of papers was extremely rigorous to maintain the high quality of the conference. We want to thank the members of the program committees for their hard work during the reviewing process. This is a crucial process for creating a high-standard conference; the SOCO conference would not exist without their help.

Commercial Insurgencies in the Networked Era Oscar Palma,2019-03-13 This book examines the Revolutionary Armed Forces of Colombia (FARC) as a commercial insurgency through the network-complex paradigm of insurgency. Countering traditional perspectives of the group, it proposes new and comprehensive explanations for the FARC's presence in Latin America. Existing narratives have portrayed the FARC as a terrorist, narco-terrorist, or criminal organization – a narrative popularized by the government offensive conducted by the Colombian state during the last couple of decades. In contrast, this book goes beyond simplistic perspectives of the FARC and instead studies the group in relation to the network-complex paradigm of insurgency. It explains the organization as a 'commercial insurgency' with three dimensions – political, criminal, and military – and understands the Colombian insurgency not as a monolith, but as a system of individuals with diversified interests ranging from the highly indoctrinated to the profit-motivated. This examination allows for an analysis of some of the insurgency's most unexplored characteristics: an interest in urbanizing its actions and the increased 'invisibility' of combatants, the significance of its political institutions, and the construction of its transnational networks. The volume also discusses the future of FARC in post-conflict Colombia, not only within the country but as an actor in the region. This work will be of much interest to students of insurgencies, military studies, Latin American studies, criminology, security studies, and IR.

Hyperborder Fernando Romero,2008 Roving vigilantes, fear-mongering politicians, hysterical pundits, and the looming shadow of a seven hundred-mile-long fence: the US-Mexican border is one of the most complex and dynamic areas on the planet today. Hyperborder provides the most nuanced portrait yet of this dynamic region. Author Fernando Romero presents a multidisciplinary perspective informed by interviews with numerous academics, researchers, and organizations. Provocatively designed in the style of other kinetic large-scale studies like Rem Koolhaas's Content and Bruce Mau's Massive Change, Hyperborder is an exhaustively researched report from the front lines of the border debate.

Smart City and Informatization Guojun Wang,Abdulmotaleb El Saddik,Xuejia Lai,Gregorio Martinez Perez,Kim-Kwang Raymond Choo,2019-11-05

This book constitutes the refereed proceedings of the 7th International Conference on Smart City and Informatization, iSCI 2019, held in Guangzhou, China, in November 2019. The volume presents 52 full papers, which were carefully reviewed and selected from 139 submissions. The papers are organized in topical sections on Internet of Things (IoT) and smart sensing; urban computing and big data; smart society informatization technologies; cloud/edge/fog computing for smart city; applications for smart city informatization; assistive engineering and information technology; cyberspace security; blockchain and applications.
