The Impact of Information on Modern Humans Elena G. Popkova,2018-03-06 This book features contributions from various spheres of socio-humanitarian sciences presented at the scientific and practical conference on “Humans as an Object of Study by Modern Science,” which took place in Nizhny Novgorod (Russian Federation) on November 23–24, 2017. The conference was organized by Kozma Minin Nizhny Novgorod State Pedagogical University and the non-profit organization “Institute of Scientific Communications.” Presenting the results of multidisciplinary studies as well as new approaches, the target audience of the book includes postgraduates, lecturers at higher educational establishments, and researchers studying socio-humanitarian sciences. The complex study of humans by representatives of various socio-humanitarian sciences (philosophy, pedagogics, jurisprudence, social sciences, and economics) allows a comprehensive concept of the field to be developed. Selecting humans as an object of research opens wide possibilities for studying various issues related to their activities, while considering humans within multiple sciences means that the methods of induction and deduction can be combined to achieve precise results. This book includes the results of leading scientific studies on the following key issues: establishment of an information economy under the influence of scientific and technical progress: new challenges and opportunities; information and communication technologies as a new vector of development of the modern world economy; specifics and experience of using new information and communication technologies in developed and developing countries; problems of implementing new information and communication technologies in the modern economy; and priorities of using new information and communication technologies in the modern economy.

Growth Poles of the Global Economy: Emergence, Changes and Future Perspectives Elena G. Popkova,2019-08-03 The book presents the best contributions from the international scientific conference “Growth Poles of the Global Economy: Emergence, Changes and Future,” which was organized by the Institute of Scientific Communications (Volgograd, Russia) together with the universities of Kyrgyzstan and various other cities in Russia. The 143 papers selected, focus on spatial and sectorial structures of the modern global economy according to the theory of growth poles. It is intended for representatives of the academic community: university and college staff developing study guides on socio-humanitarian disciplines in connection with the theory of growth poles, researchers, and undergraduates, masters, and postgraduates who are interested in the recent inventions and developments in the field. It is also a valuable resource for expert practitioners managing entrepreneurial structures in the existing and prospective growth poles of the global economy as well as those at international institutes that regulate growth poles. The first part of the book investigates the factors and conditions affecting the emergence of the growth poles of the modern global economy. The second part then discusses transformation processes in the traditional growth poles of the global economy under the influence of the technological progress. The third part examines how social factors affect the formation of new growth poles of the modern global economy. Lastly, the fourth part offers perspectives on the future growth of the global economy on the basis of the digital economy and Industry 4.0.

Overcoming Uncertainty of Institutional Environment as a Tool of Global Crisis Management Elena G. Popkova,2017-09-03 This book is the result of recent research by contemporary scientists on topics which were discussed at the conference of the same name in Volgograd, Russia in April 2017. The global economic system is currently in a stage of active formation and development: its boundaries and conditions of existence are constantly changing, which is accompanied by crises that influence the economic systems of its member countries. In order to solve problems emanating from global economic crises, a new direction was formed in modern science – global crisis management. Development of this direction requires the formation of the accompanying categorical apparatus, the development of a corresponding scientific and methodological basis, and the engagement in extensive practical research.

The Soviet Military Experience Roger R. Reese,2002-01-04 The Soviet Military Experience is the first general work to place the Soviet army into its true social, political and international contexts. It focuses on the Bolshevik Party's intention to create an army of a new type, whose aim was both to defend the people and propagate Marxist ideals to the rest of the world. It includes discussion of the: * origins of the Workers and Peasant's Red Army * effects of the Civil War * Bolshevik regime's use of the military as a school of socialism * effects of collectivization and rapid industrialisation of the 1920s and 1930s * Second World War and its profound repercussions * ethnic tensions within the army * effect of Gorbachev's policies of Glasnost and Perestroika

Artificial Intelligence: Anthropogenic Nature vs. Social Origin Elena G. Popkova,Bruno S. Sergi,2020-02-22 This book presents advanced research studies on the topic of artificial intelligence as a component of social and economic relations and processes. It gathers research papers from the International Research-to-Practice Conference “The 21st Century from the Positions of Modern Science: Intellectual, Digital and Innovative Aspects” (May 23–24, 2019, Nizhny Novgorod, Russia) and the International Research-to-Practice Conference “Economics of Pleasure: a Science of Enjoying Economic Activities” (October 3–5, 2019, Prague, Czech Republic). Both conferences were organized by the Autonomous Non-Profit Organization “Institute of Scientific Communications” (Volgograd). What sets this book apart from other publications on the topic of artificial intelligence is that it approaches AI not as a technological tool, but as an economic entity. Bringing together papers by representatives of various fields of social and human knowledge, it systematically reflects on various economic, social, and legal aspects of the creation, application, and development of artificial intelligence. Given the multidisciplinary nature of its content, the book will appeal to a broad target audience, including those engaged in developing AI (scientific research institutes and universities), and Industry 4.0 enterprises interested in its implementation, as well as state regulators for the digital

economy.

Kursk 1943 Robert Forczyk,2017-03-21 Mauled at Stalingrad, the German army looked to regain the initiative on the Eastern Front with a huge offensive launched near the city of Kursk, 280 miles south-west of Moscow. Armed with the new Panther tank, Hitler and Field Marshal von Manstein were confident that they could inflict another crushing defeat on the Soviet Union. What they did not know is that the Soviets knew about the coming attack, and they were ready. This book focuses on the southern front of this campaign, which featured one of the biggest clash of armour of the war in the battle of Prokhorovka which involved over a thousand tanks. It examines in detail the tactics and mistakes of the army commanders as they orchestrated one of the bloodiest battles in World War II. Using campaign maps, stunning photographs and vivid artwork, this new study, a companion to Campaign 272 Kursk 1943: The Northern Front, examines whether that the German offensive was doomed from the start as it takes the reader through this titanic clash of armour.

The Challenge of Sustainability in Agricultural Systems Aleksei V. Bogoviz,2021-06-02 This book presents a multidisciplinary collection of original contributions made by the leading scholars and practitioners on researching, building, and maintaining sustainable agricultural systems. Being the first of its kind, the book is divided into two volumes. This book presents a comprehensive and informed review of the current state of multidisciplinary knowledge on sustainability in agriculture. The gaps in the scholarly literature are identified and rigorously analyzed, presenting a clear picture of the promising research directions. The authors critically analyze the very concept of sustainable agricultural systems, primarily focusing on the interactions existing between their integral components and with external environments. Relying on the provisions of complex systems science, the scholars then discuss the best approaches and methodologies used to build a comprehensive understanding of agricultural systems, with relation to achieving and maintaining their sustainability. More than that, this book holds two rich sections on (1) agricultural economics and (2) rural sustainability. Understanding sustainable development as a movement toward clearly defined and measurable goals, a set of chapters explore those policies, practices, technologies, and management systems that have an impact on the sustainability of agricultural systems. Agricultural sustainability is an urgent issue to be addressed, and this book makes a unique contribution. Due to its practical focus, the book appeals to practitioners and policymakers working in agricultural economics, governance, and sustainability, not just academics. This is also a valuable resource for graduate students interested in agricultural systems, sustainability, as well as complex systems theory and practice.

Developments in Soviet Politics Stephen White,Alex Pravda,Zvi Gitelman,1990-07-06 Written by a team of leading scholars, this book meets the need for an up-to-date account on the political system and policy progress which is emerging and an analysis of the future prospects of the Gorbachev revolution.

Frontier Information Technology and Systems Research in Cooperative Economics Aleksei V. Bogoviz,Alexander E. Suglobov,Alexandr N. Maloletko,Olga V. Kaurova,Svetlana V. Lobova,2020-09-24 This book is the very first book-length study devoted to the advances in technological development and systems research in cooperative economics. The chapters provide, first of all, a coherent framework for understanding and applying the concepts and approaches of complexity and systems science for the advanced study of cooperative networks and particular cooperative enterprises and communities. Second, the book serves as a unique source of reliable information on the frontier information technologies available for the production, consumer, credit, and agricultural cooperative enterprises, discussing predominant strategies, potential drivers of change, and responses to complex problems. Given the diverse range of backgrounds and advanced research results, researchers, decision-makers, and stakeholders from all fields of cooperative economics in any country of the world will undoubtedly benefit from this book.
