*Currency Conflicts on the International Scene* John Driffill, 2012-07-12 There has been discussion of 'currency wars' for a number of years. The longest-running recent issue has been the persistent US current account deficit and the matching surpluses elsewhere in the world, particularly China. These 'global imbalances' surfaced before 2000, and look set to continue for many years more, with little sign of the US deficit or Chinese surplus closing, despite some movement in the real exchange rate. The issue is wider than this. In 2011 Japan took steps to limit the rise of the yen. There was concerted action by several central banks after the major earthquake in north-east Japan on 11th March 2011, and late in October 2011 Japan took unilateral action to prevent the Yen from rising further. In September 2011, the Swiss Central Bank imposed a ceiling on the value of the Swiss franc and a number of emerging economies whose exchange rates float freely, or relatively freely, and whose capital markets are fairly open, have complained that their currencies have become overvalued because international capital, looking for returns, has flowed into their economies. Brazil has taken steps to limit the rise of the Real. Other South American countries, including Chile and Peru, have been intervening in the last year to prevent what they see as excessive appreciation. Global imbalances and currency wars are the subject of frequent analysis by the International Monetary Fund and they attract a great deal of attention in the financial press. Currency conflicts cover two different phenomena: one is disagreement about the level of a managed or pegged exchange rate, like the Chinese Yuan; another is the inappropriate level to which floating exchange rates are driven by market forces, as in the case of the Brazilian Real, the Japanese Yen, and the Swiss Franc. A different analysis of how exchange rates come about is required for each case. It reflects the fact that the international monetary system comprises a variety of different ways of determining exchange rates and carrying out monetary policy. Some countries float, some peg, and others are in between. The current international monetary system is not really a 'system' in the sense that the Gold Standard or the Bretton Woods regime was a system. Instead, it is an ad hoc, patchwork affair. This paper reviews the causes and consequences of these currency conflicts, the way they are likely to develop in the coming years, and some possible solutions.

**Rising Powers and South-South Cooperation** Kevin Gray, Barry K Gills, 2018-10-11 This book examines the extent to which a space has opened up in recent years for the so-called rising powers of the global South to offer an alternative to contemporary global economic and political governance through emergent forms of South-South cooperation. In contrast to the Third Worldism of the past, the contemporary rising powers share in common the fact that their recent growth owes much to their extensive and increasingly international engagement, rather than partial withdrawal from the global economy. However, they are nonetheless openly critical of the perceived bias towards the global North in the dominant institutions of global governance, and seek to alter the global status quo to enhance the influence of the global South. Contributions to this volume address the question of whether such engagement, particularly on a South-South basis, can be categorised as a win-win relationship, or whether we are already seeing the emergence of new forms of competitive rivalry and neo-dependency in action. What kind of theoretical approaches and conceptual tools do we need to best answer such questions? To what extent do new groupings such as BRICS suggest a real alternative to the dominance of the West and of the neoliberal economic globalization paradigm? What possible alternatives exist within contemporary forms of South-South cooperation? This book was originally published as a special edition of Third World Quarterly.

China's New Retail Economy Shuguang Wang, 2014-01-10 Retail is the essential link between production and consumption. The dynamics of a nation's economy cannot be fully understood without a good understanding of its retail sector. This book is written to achieve three broad objectives. First, it provides a comprehensive assessment of the changes in consumption patterns in China, the current size of the Chinese consumer market, and the regional variations. Second, it presents an interpretation of the changes in the country's regulatory system and the corresponding policy initiatives, including the new state spatial strategies devised after its admission to the WTO. Third, it delivers a systematic analysis of the transformation of China's retail sector. This includes the entry and expansion of foreign retailers, the development of indigenous retail chains as a national strategy to modernize China's retail industry, and the changing retailer-supplier relations. This book is a useful reference not only for university students and faculty researchers, but also for international retailers and commercial real estate developers who contemplate business and investment opportunities in China.

Advanced Introduction to Russian Politics Richard Sakwa,2023-12-11 This perceptive Advanced Introduction provides a contemporary analysis of Russia’s political system, political institutions and its place on the global stage. Richard Sakwa deftly explores Russia’s emergence as an independent state, examining the structure of its existing political and economic system, its transformation following the constitutional reform of 2020, and the immediate and long-term consequences of the Russia-Ukraine war.

Forbidden City William Bell,2010-10-15 Seventeen-year-old Alex Jackson comes home from school to find that his father, a CBC news cameraman, wants to take him to China's capital, Beijing. Once there, Alex finds himself on his own in Tian An Men Square as desperate students fight the Chinese army for their freedom. Separated from his father and carrying illegal videotapes, Alex must trust the students to help him escape. Closely based on eyewitness accounts of the massacre in Beijing, Forbidden City is a powerful and frightening story.

Ghost Cities of China Wade Shepard,2015-04-09 Featuring everything from sports stadiums to shopping malls, hundreds of new cities in China stand empty, with hundreds more set to be built by 2030. Between now and then, the country's urban population will leap to over one billion, as the central government kicks its urbanization initiative into overdrive. In the process, traditional social structures are being torn apart, and a rootless, semi-displaced, consumption orientated culture rapidly taking their place. Ghost Cities of China is an enthralling dialogue driven, on-location search for an understanding of China's new cities and the reasons why many currently stand empty.

Wardrobe Crisis Clare Press,2018-02-20 Who makes your clothes? This used to be an easy question to answer it was the seamstress next door, or the tailor on the high street—or you made them yourself. Today, we rarely know the origins of the clothes hanging in our closets. The local shoemaker, dressmaker, and milliner are long gone, replaced a globalized fashion industry worth \$1.5 trillion a year. In Wardrobe Crisis, fashion journalist Clare Press explores the history and ethics behind what we wear. Putting her insider status to good use, Press examines the entire fashion ecosystem, from sweatshops to haute couture, unearthing the roots of today’s buy-and-discard culture. She traces the origins of icons like Chanel, Dior, and Hermès; charts the rise and fall of the department store; and follows the thread that led us from Marie Antoinette to Carrie Bradshaw. Wardrobe Crisis is a witty and persuasive argument for a fashion revolution that will empower you to feel good about your wardrobe again.
