Model Driven Engineering Languages and Systems Jon Whittle, Tony Clark, Thomas Kühne, 2011-10-12 This book constitutes the refereed proceedings of the 14th International Conference on Model Driven Engineering Languages and Systems, MODELS 2011, held in Wellington, New Zealand, in October 2011. The papers address a wide range of topics in research (foundations track) and practice (applications track). For the first time a new category of research papers, vision papers, are included presenting outside the box thinking. The foundations track received 167 full paper submissions, of which 34 were selected for presentation. Out of these, 3 papers were vision papers. The application track received 27 submissions, of which 13 papers were selected for presentation. The papers are organized in topical sections on model transformation, model complexity, aspect oriented modeling, analysis and comprehension of models, domain specific modeling, models for embedded systems, model synchronization, model based resource management, analysis of class diagrams, verification and validation, refactoring models, modeling visions, logics and modeling, development methods, and model integration and collaboration.

Nutrition and Cardiovascular Health Paramjit S. Tappia, Heather Blewett, 2020-06-17 There is unequivocal experimental, epidemiological, and clinical evidence demonstrating a correlation between diet and increased risk of cardiovascular disease (CVD). While nutritionally-poor diets can have a significant negative impact on cardiovascular health, dietary interventions with specific nutrients and/or functional foods are considered cost-effective and efficient components of prevention strategies. It has been estimated that nutritional factors may be responsible for approximately 40% of all CVD. Indeed, in one of the seminal studies conducted on modifiable risk factors and heart health (the INTERHEART study), >90% of all myocardial infarctions were attributed to preventable environmental factors with nutrition identified as one of the important determinants of CVD. There is an increasing public interest in and scientific investigation into establishing dietary approaches that can be undertaken for the prevention and treatment of CVD. This Special Issue provides an insight into the influential role of nutrition and dietary habits on cardiovascular health and disease, as well as their mechanisms of therapeutic and preventive action.

Sustainable Intelligent Systems Amit Joshi,Atulya K. Nagar,Gabriela Marín-Raventós,2021-03-06 This book discusses issues related to ICT, intelligent systems, data science, AI, machine learning, sustainable development and overall their impacts on sustainability. It provides an overview of the technologies of future. The book also discusses novel intelligent algorithms and their applications to move from a data-centric world to sustainable world. It includes research paradigms on sustainable development goals and societal impacts. The book provides an overview of cutting-edge

techniques toward sustainability and ideas to help researchers who want to understand the challenges and opportunities of using smart management perspective for sustainable society. It serves as a reference to wide ranges of readers from computer science, data analysts, AI technocrats and management researchers.

Politics, Governance, and Development in Ghana Joseph R a Ayee,2019-10-16 Since it achieved independence in 1957, the West African state of Ghana has become the torchbearer of African liberation, as well as a laboratory for the study of endemic problems facing the African continent. In terms of democratic consolidation, the country holds a unique position on the continent as beacon of stability and democracy. Politics, Governance, and Development in Ghana takes critical stock of the landmark themes that have dominated its history since independence. The contributors address issues such as citizenship, civil society, the military, politicians, chiefs, transnational actors, the public sector and policies, the executive branch, decentralization, the economy, electoral politics, natural resources, and relations with Asia and the diaspora. These themes support mobilizing for Ghana's future, which is the theme for the diamond jubilee celebration of Ghana's independence. Edited by Joseph R.A. Ayee, this book will deepen the literature on studies on Ghana especially in the areas of politics, governance, economy and development; serve as a resource for academics, students, practitioners; and commemorate the diamond jubilee celebration of Ghana's independence.

Degrowth Giacomo D'Alisa,Federico Demaria,Giorgos Kallis,2014-11-13 Degrowth is a rejection of the illusion of growth and a call to repoliticize the public debate colonized by the idiom of economism. It is a project advocating the democratically-led shrinking of production and consumption with the aim of achieving social justice and ecological sustainability. This overview of degrowth offers a comprehensive coverage of the main topics and major challenges of degrowth in a succinct, simple and accessible manner. In addition, it offers a set of keywords useful for intervening in current political debates and for bringing about concrete degrowth-inspired proposals at different levels - local, national and global. The result is the most comprehensive coverage of the topic of degrowth in English and serves as the definitive international reference. Regarding Romantic Rome Richard Wrigley,2007 This volume brings together a collection of essays that explore the cultural history and representation of Rome from the late eighteenth century to the mid-nineteenth century. The essays address diverse aspects of Rome as a subject and site of Romantic experience and commentary, investigating the legacy of the Grand Tour, and the changing face of Rome in the early nineteenth century. The contributions range across various media, genres, and topics - the Roman art market, paintings of contemporary Romans and their interpretation, music in and 'of' Rome, the evolution of nineteenth-century guidebooks, novels which take Rome as their narrative mise-en-scène, the idea of Rome as a setting for creative activity, ruins as polysemic metaphor, women and the reception of antiquity, the aesthetics of urban hygiene, and the mythology of that renowned quarter of Rome, Trastevere. In different ways, all of the contributions to this volume contribute to our understanding of the relationship between Rome's changing identity and the evolving forms of literary and artistic representation employed to record, evoke, commemorate, or make sense of the city, its people, and landscape.

Giacomo Meyerbeer Robert Ignatius Letellier,2014-07-18 ARSC Awards for Excellence, 2014: Best Historical Research in Classical Music (Certificate of Merit). This book presents a discography of recordings made from the works of Giacomo Meyerbeer (1791–1864) – from the inception of recording techniques in 1889 until the dominance of the long-playing record in 1955. It is a testimony to the once-universal fame of the composer and the esteem in which his works were held. During that period some nearly 2000 artists (at least 1065 of them singers) recorded arias and ensembles from all six of the French operas of Meyerbeer's maturity (Robert le Diable, Les Huguenots, Le Prophète, L'Étoile du Nord, Dinorah, L'Africaine), as well as selections from other works, orchestral pieces, and a variety of arrangements for band and other instruments. Covering more than 150 different pieces, the whole of this recorded legacy makes Meyerbeer one of the most popular classical composers of any age. Many of the legendary names of this Golden Age of Song were devoted to Meyerbeer's compositions (like Aumonier, Amato, Gillion, Rethberg, Lazzari, Barrientos, Delmas, Slezak, Belhomme, Branzell, Lehmann, Hempel, Escalais, Ancona, De Lucia, De Angelis, De Cisneros, Tamagno, Rothier, Pertile, Ruffo, Siems, Kurz, Caruso, Chaliapin). This discography is integral to the history of opera, the nature of lyric recording, and the story of song and vocal technique. It is divided into chapters listing the works recorded, the singers, orchestras, bands and other musicians who recorded pieces from the operas (with details of the labels, places, dates, matrix and record numbers), as well as providing anthologies of modern transfers of some of the old 78 records to modern media (LP, CD, MP3), and also listing a bibliography devoted to vintage records and singers from the early days of recording.

Polyphenols in Human Health and Disease Ronald Ross Watson,Victor R. Preedy,Sherma Zibadi,2013-10-26 Polyphenols in Human Health and Disease documents antioxidant actions of polyphenols in protection of cells and cell organelles, critical for understanding their health-promoting actions to help the dietary supplement industry. The book begins by describing the fundamentals of absorption, metabolism and bioavailability of polyphenols, as well as the effect of microbes on polyphenol structure and function and toxicity. It then examines the role of polyphenols in the treatment of chronic

disease, including vascular and cardiac health, obesity and diabetes therapy, cancer treatment and prevention, and more. Explores neuronal protection by polyphenol metabolites and their application to medical care Defines modulation of enzyme actions to help researchers see and study polyphenols' mechanisms of action, leading to clinical applications Includes insights on polyphenols in brain and neurological functions to apply them to the wide range of aging diseases

Biological Control of Crop Diseases Samuel S. Gnanamanickam,2002-04-03 This volume combines theory with current global practices involved in the biological control of diseases in 12 major crops. It highlights the day-to-day challenges of organic crop management for cost-effective real-world application.

The SAGE Encyclopedia of Alcohol Scott C. Martin,2014-12-16 Alcohol consumption goes to the very roots of nearly all human societies. Different countries and regions have become associated with different sorts of alcohol, for instance, the “beer culture” of Germany, the “wine culture” of France, Japan and saki, Russia and vodka, the Caribbean and rum, or the “moonshine culture” of Appalachia. Wine is used in religious rituals, and toasts are used to seal business deals or to celebrate marriages and state dinners. However, our relation with alcohol is one of love/hate. We also regulate it and tax it, we pass laws about when and where it’s appropriate, we crack down severely on drunk driving, and the United States and other countries tried the failed “Noble Experiment” of Prohibition. While there are many encyclopedias on alcohol, nearly all approach it as a substance of abuse, taking a clinical, medical perspective (alcohol, alcoholism, and treatment). The SAGE Encyclopedia of Alcohol examines the history of alcohol worldwide and goes beyond the historical lens to examine alcohol as a cultural and social phenomenon, as well—both for good and for ill—from the earliest days of humankind.

Biodiversity and Ecosystem Function Ernst-Detlef Schulze,Harold A. Mooney,2012-12-06 The biota of the earth is being altered at an unprecedented rate. We are witnessing wholesale exchanges of organisms among geographic areas that were once totally biologically isolated. We are seeing massive changes in landscape use that are creating even more abundant succes sional patches, reductions in population sizes, and in the worst cases, losses of species. There are many reasons for concern about these trends. One is that we unfortunately do not know in detail the conse quences of these massive alterations in terms of how the biosphere as a whole operates or even, for that matter, the functioning of localized ecosystems. We do know that the biosphere interacts strongly with the atmospheric composition, contributing to potential climate change. We also know that changes in vegetative cover greatly influence the hydrology and biochemistry ofa site or region. Our knowledge is weak in important details, however. How are the many services that ecosystems provide to humanity altered by modifications of ecosystem composition? Stated in another way, what is the role of individual species in ecosystem function? We are observing the selective as well as wholesale alteration in the composition of ecosystems. Do these alterations matter in respect to how ecosystems operate and provide services? This book represents the initial probing of this central ques tion. It will be followed by other volumes in this series examining in depth the functional role of biodiversity in various ecosystems of the world.
