Thoughtlessness and Decadence in Iran Alireza Shomali, 2019-04-01 Bridges Western and non-Western political thought to address the problem of democracy and political decadence in contemporary Iran and, by implication, similar Islamic societies. Political decay in Islamic societies has for the most part been the subject of structural analyses while philosophical studies have been rare, often speculative and deterministic. Thoughtlessness and Decadence in Iran explores from a theoretical perspective the problem of democracy deficit—or, political decadence—in contemporary Iran and, by implication, in present-day Middle Eastern societies. This decadence, the book argues, is in part a religion-based decadence, and deliverance from it requires collective thoughtfulness about religion. Alireza Shomali conceptualizes the Iranian Reality in terms of a lack of not only good life but also thinking of good living. This thoughtlessness means dissolution of critical consciousness and, as such, it heralds escalating decadence. At this moment of rapid decay, the book argues, thought must become relevant to society: the communicative practice of thinking must emerge to examine the pathologies of a religiously administrated life. Opening a dialogue between Adorno, Strauss, Farabi and Razi, among others, Shomali underlines the critical points of similarity and difference between these thinkers and envisions a “local” emancipatory project that, noting the specifics of the Iranian case, takes lessons from the Western experience without blind imitation. Alireza Shomali is Associate Professor of Political Science at Wheaton College. He is the author of *Politics and the Criteria of Truth*.

Constructing Grounded Theory Kathy Charmaz, 2006-01-13 'Grounded theory is a highly influential way of working with qualitative data and Kathy Charmaz is a major player, both innovative and fluent. This book is a model student text: lively, carefully argued and full of vivid illustrations. Beginning students and professional researchers will find it to be required reading' - David Silverman, Professor Emeritus, Sociology Department, Goldsmiths College and Visiting Professor, Management Department, King's College, University of London Kathy Charmaz is one of the world's leading theorists and exponents of grounded theory. In this important and essential new textbook, she introduces the reader to the craft of using grounded theory in social research, and provides a clear, step-by-step guide for those new to the field. Using worked examples throughout, this book also maps out an

alternative vision of grounded theory to that put forward by its founding thinkers, Glaser and Strauss. To Charmaz, grounded theory must move on from its positivist origins and must incorporate many of the methods and questions posed by constructivists over the past twenty years to become a more nuanced and reflexive practice. Essential reading for students, new researchers and seasoned social scientists alike, this book is one of those rare things, a textbook that is both accessible to those new to the field but also one that has important things to say about the nature of social enquiry itself.

The Thousand and One Borders of Iran Fariba Adelkhah,2015-09-16 A country marked by controversy, Iran's social, cultural and political dynamics are too often reduced to a few misleading clichés. Islamism is widely considered to shape all social relations in Iranian society and, while Iranian society is indeed Islamic, this term's multiple meanings in everyday life and practices go far beyond the naïve and monolithic idea we are used to. The Thousand and One Borders of Iran analyses travel as a social practice, exploring how diasporas, margins and so-called peripheries are central in the construction of a national identity and thus revealing the complexities of Iranian history and society. Written by a leading anthropologist, it draws upon fieldwork carried out in Iran and Iranian migrant communities across Dubai, Tokyo and Los Angeles from 1998 to 2015. While casting new perspectives on the place of transnational relations in an increasingly globalized world, this work also sheds new light on the evolution of Iranian society, countering the explanation furnished by nationalist ideology that has been reproduced by the Islamic Republic itself. Its unique approach to the analysis of Iranian society through the theme of travel and borders considers the links and even the quarrels between the centre of Iranian society and the periphery, and the foreign elements that have contributed to society's development. Travel is key to these interactions and, following the travels of merchants and workers, students or the faithful, elected officials and experts, or exiles and refugees, this book offers an anthropological study of travel that re-thinks Iranian history and national identity. This book would be of interest to students and scholars of Iranian Studies, Middle Eastern Studies and Anthropology.

Following an introduction to the basic parameters and tests in pharmaceutical validation, including specificity, linearity, range, precision, accuracy, detection and quantitation limits, the text focuses on a life-cycle approach to validation and the integration of validation into the whole analytical quality assurance system. The whole is rounded off with a look at future trends. With its first-hand knowledge of the industry as well as regulating bodies, this is an invaluable reference for analytical chemists, the pharmaceutical industry, pharmacutists, QA officers, and public authorities.

Completely revised and updated, the long-awaited second edition of this classic text retains its predecessor's careful balance of theory and practice while incorporating new approaches, more data sets, and a broader scope. Enhancements in the second edition include: A new chapter on bioequivalence Recently developed methods for analyzing longitudinal continuous and categorical data Real-world examples using the SAS system A comprehensive catalog of designs, datasets, and SAS programs available on a companion Web site at www.crcpress.com The authors' exposition gives a clear, unified account of the design and analysis of cross-over trials from a statistical perspective along with their methodological underpinnings.
