Wisdom in the Open Air Peter Reed, David Rothenberg, 1993 *Wisdom in the Open Air* traces the Norwegian roots of the strain of thinking called deep ecology - the search for the solutions to environmental problems by examining the fundamental tenets of our culture. Although Arne Naess coined the term in the 1970s, the insights of deep ecology actually reflect a whole tradition of thought that can be seen in the history of Norwegian culture, from ancient mountain myths to the radical ecoactivism of today. Beginning with an introduction to Norway's emphasis on nature and the wild, Reed and Rothenberg explore the birth of the environmental movement in the 1960s and 1970s. What follows is a collection of writings by prominent Norwegian thinkers on humanity and nature, most never before published in English. From Peter Wessel Zapffe, a twentieth-century Kierkegaardian figure, the list goes on to include Arne Naess, activist/critic/artist Sigmund Kvaloy, wilderness educator Nils Faarlund, novelist Finn Alnaes, sociologist Johan Galtung, and social reformer Erik Dammann. Their points of view offer thoughts on the significance of modern life and what it means to be human in the face of deteriorating environmental global trends of the 20th century. *Wisdom in the Open Air* asks and answers a fundamental question concerning the ecomovement: what is the role of deep, often abstract, thinking in the attempt to avert a very real ecological crisis?

The Indigenous Identity of the South Saami Håkon Hermanstrand, Asbjørn Kolberg, Trond Risto Nilssen, Leiv Sem, 2019-02-01 This open access book is a novel contribution in two ways: It is a multi-disciplinary examination of the indigenous South Saami people in Fennoscandia, a social and cultural group that often is overlooked as it is a minority within the Saami minority. Based on both historical material such as archaeological evidence, 20th century newspapers, and postcard motives as well as current sources such as ongoing land-right trials and recent works of historiography, the articles highlight the culture and living conditions of this indigenous group, mapping the negotiations of different identities through the interaction of Saami and non-Saami people through the ages. By illuminating this under-researched field, the volume also enriches the more general debate on global indigenous history, and sheds light on the construction of a Scandinavian identity and the limits of the welfare state and the myth of heterogeneity and equality.

The Inconvenient Indigenous Sidsel Saugestad, 2001 Saugestad examines the relationship between the government of Botswana and its indigenous minority, variously known as Bushmen, San, Basarwa, or more recently Noakwe.

Rethinking Resource Management Richard Howitt, 2002-01-31 This book offers students and practitioners a sophisticated and convincing framework for rethinking the usual approaches to resource management. It uses case studies to argue that professional resource managers do not take responsibility for the social and environmental consequences of their decisions on the often vulnerable indigenous communities they affect. It also discusses the invisibility of indigenous people's values and knowledge within traditional resource management. It offers a new approach to social impact assessment methods which are more participatory and empowering. The book employs a range of case studies from Australia, North America and Norway.

Arctic Human Development Report Joan Nymand Larsen, Gail Fondahl, 2015-02-18 The goals of the second volume of the AHDR – Arctic Human Development Report: Regional Processes and Global Linkages – are to provide an update to the first AHDR (2004) in terms of an assessment of the state of Arctic human development; to highlight the major trends and changes unfolding related to the various issues and thematic areas of human development in the Arctic over the past decade; and, based on this assessment, to identify policy relevant conclusions and key gaps in knowledge, new and emerging Arctic success stories. The production of AHDR-II on the tenth anniversary of the first AHDR makes it possible to move beyond the baseline assessment to make valuable comparisons and contrasts across a decade of persistent and rapid change in the North. It addresses critical issues and emerging challenges in Arctic living conditions, quality of life in the North, global change impacts and adaptation, and Indigenous livelihoods. The assessment contributes to our understanding of the interplay and consequences of physical and social change processes affecting Arctic residents' quality of life, at both the regional and global scales. It shows that the Arctic is not a homogenous region. Impacts of globalization and environmental change differ within and between regions, between Indigenous and non-Indigenous northerners, between genders and along other axes.

Plant Ecology, Herbivory, and Human Impact in Nordic Mountain Birch Forests Frans E. Wielgolaski, 2006-01-12 This work analyzes vegetation and soils, and investigates the influence of climate change, insect pests, grazing pressure by sheep and reindeer, construction of roads and other consequences of increasing tourism in the Nordic mountain birch forests.

Arctic and Alpine Mycology II Gary A. Laursen, Joseph F. Ammirati, Scott A. Redhead, 2013-03-09 During the summer of 1980, the First International symposium on Arctic and Alpine Mycology (ISAM-I) was held at the then extant Naval Arctic Research Laboratory near Barrow, Alaska, U.S.A., well within the Arctic Circle (Laursen and Ammirati, Arctic and Alpine Mycology. The First International symposium on Arcto-Alpine Mycology. Univ. Wash. Press, 1982). The facility is currently owned and operated by the Utkeagvik Inupiat community and is named the National Academic and Research Laboratory, thus retaining its acronym NARL. Twenty-five scientists participated in that historic first meeting. Their interests in the fungi spanned a vast geographic area of cold dominated habitats in both the northern and southern hemispheres that included four continents (N. and S. America, Eurasia, and Antarctica), nine countries, and numerous islands ranging from Greenland to Jan Mayen in the Svalbard group. ISAM-I helped to develop ongoing interests and initiate others. This is what ISAM-I founders hoped would happen. As a result, the organizing committee for ISAM-II was formed. Its mandate was to: involve a maximum of one third new participants in future ISAM meetings: divide the responsibility for organizing future meetings at sites located in areas of interest to research thrusts in Arctic and alpine environments: keep the number of participants small enough to ensure manageability, taking full advantage of field collecting opportunities with minimal complications and cost.

The Atlantic Salmon Eric Verspoor, Lee Stradmeyer, Jennifer L. Nielsen, 2008-04-15 Atlantic Salmon is a cultural icon throughout its North Atlantic range; it is the focus of probably the World's highest profile recreational fishery and is the basis for one of the World's largest aquaculture industries. Despite this, many wild stocks of salmon are in decline and underpinning this is a dearth of information on the nature and extent of population

structuring and adaptive population differentiation, and its implications for species conservation. This important new book will go a long way to rectify this situation by providing a thorough review of the genetics of Atlantic salmon. Sponsored by the European Union and the Atlantic Salmon Trust, this book comprises the work of an international team of scientists, carefully integrated and edited to provide a landmark book of vital interest to all those working with Atlantic salmon.

Atlantic Salmon Ecology Øystein Aas, Anders Klemetsen, Sigurd Einum, Jostein Skurdal, 2011-07-05 The Atlantic salmon is one of the most prized and exploited species worldwide, being at the centre of a massive sports fishing industry and increasingly as the major farmed species in many countries worldwide. Atlantic Salmon Ecology is a landmark publication, both scientifically important and visually attractive. Comprehensively covering all major aspects of the relationship of the Atlantic salmon with its environment, chapters include details of migration and dispersal, reproduction, habitat requirements, feeding, growth rates, competition, predation, parasitism, population dynamics, effects of landscape use, hydro power development, climate change, and exploitation. The book closes with a summary and look at possible future research directions. Backed by the Norwegian Research Council and with editors and contributors widely known and respected, Atlantic Salmon Ecology is an essential purchase for all those working with this species, including fisheries scientists and managers, fish biologists, ecologists, physiologists, environmental biologists and aquatic scientists, fish and wildlife department personnel and regulatory bodies. Libraries in all universities and research establishments where these subjects are studied and taught should have copies of this important publication. Comprehensive and up-to-date coverage of Atlantic Salmon Atlantic Salmon is one of the world's most commercially important species Backed by the Norwegian Research Council Experienced editor and internationally respected contributors

The Power of the Periphery Peder Anker, 2020-05-28 Examines how Norway has positioned itself as an alternative, environmentally-sound nation in a world filled with tension and instability.

Cultural and Linguistic Minorities in the Russian Federation and the European Union Heiko F. Marten, Michael Rießler, Janne Saarikivi, Reetta Toivanen, 2015-01-06 This is the first comprehensive volume to compare the sociolinguistic situations of minorities in Russia and in Western Europe. As such, it provides insight into language policies, the ethnolinguistic vitality and the struggle for reversal of language shift, language revitalization and empowerment of minorities in Russia and the European Union. The volume shows that, even though largely unknown to a broader English-reading audience, the linguistic composition of Russia is by no means less diverse than multilingualism in the EU. It is therefore a valuable introduction into the historical backgrounds and current linguistic, social and legal affairs with regard to Russia's manifold ethnic and linguistic minorities, mirrored on the discussion of recent issues in a number of well-known Western European minority situations.

Bridging Cultural Concepts of Nature Rani-Henrik Andersson, Boyd Cothran, Saara Kekki, 2021-12-16 National parks and other preserved spaces of nature have become iconic symbols of nature protection around the world. However, the worldviews of Indigenous peoples have been marginalized in discourses of nature preservation and conservation. As a result, for generations of Indigenous peoples, these protected spaces of nature have meant dispossession, treaty violations of hunting and fishing rights, and the loss of sacred places. Bridging Cultural Concepts of Nature brings together anthropologists and archaeologists, historians, linguists, policy experts, and communications scholars to discuss differing views and presents a compelling case for the possibility of more productive discussions on the environment, sustainability, and nature protection. Drawing on case studies from Scandinavia to Latin America and from North America to New Zealand, the volume challenges the old paradigm where Indigenous peoples are not included in the conservation and protection of natural areas and instead calls for the incorporation of Indigenous voices into this debate. This original and timely edited collection offers a global perspective on the social, cultural, economic, and environmental challenges facing Indigenous peoples and their governmental and NGO counterparts in the co-management of the planet's vital and precious preserved spaces of nature.

Encyclopedia of the Arctic Mark Nuttall, 2005-09-23 With detailed essays on the Arctic's environment, wildlife, climate, history, exploration, resources, economics, politics, indigenous cultures and languages, conservation initiatives and more, this Encyclopedia is the only major work and comprehensive reference on this vast, complex, changing, and increasingly important part of the globe. Including 305 maps. This Encyclopedia is not only an interdisciplinary work of reference for all those involved in teaching or researching Arctic issues, but a fascinating and comprehensive resource for residents of the Arctic, and all those concerned with global environmental issues, sustainability, science, and human interactions with the environment.

The Pennsylvania Sportsman, 1984

Lords of the Fly Monte Burke, 2020-09-01 From the bestselling author of Saban, 4th and Goal, and Sowbelly comes the thrilling, untold story of the quest for the world record tarpon on a fly rod—a tale that reveals as much about Man as it does about the fish. In the late 1970s and early 1980s, something unique happened in the quiet little town on the west coast of Florida known as Homosassa. The best fly anglers in the world—Lefty Kreh, Stu Apte, Ted Williams, Tom Evans, Billy Pate and others—all gathered together to chase the same Holy Grail: The world record for the world's most glamorous and sought-after fly rod species, the tarpon. The anglers would meet each morning for breakfast. They would compete out on the water during the day, eat dinner together at night, socialize and party. Some harder than others. The world record fell nearly every year. But records weren't the only things that were broken. Hooks, lines, rods, reels, hearts and marriages didn't survive, either. The egos involved made the atmosphere electric. The difficulty of the quest made it legitimate. The drugs and romantic entanglements that were swept in with the tide would finally make it all veer out of control. It was a confluence of people and place that had never happened before in the world of fishing and will never happen again. It was a collision of the top anglers and the top species of fish which would lead to smashed lives for nearly all involved, man and fish alike. In Lords of the Fly, Burke, an obsessed tarpon fly angler himself, delves into this incredible moment. He examines the growing popularity of the tarpon, an amazing fish has been around for 50 million years, can live to 80 years old and can grow to 300 pounds in weight. It is a massive, leaping, bullet train of a fish. When hooked in shallow water, it produces "immediate unreality," as the late poet and tarpon obsessive, Richard Brautigan, once described it. Burke also chronicles the heartbreaking destruction that exists as a result—brought on by greed, environmental degradation and the shenanigans of a notorious Miami gangster—and how all of it has shaped our contemporary fishery. Filled with larger-than-life characters and vivid prose, Lords of the Fly is not only a must read for anglers of all stripes, but also for those interested in the desperate yearning of the human condition.

The Ocean Life of Atlantic Salmon Derek Mills,1999-12-16 There is disturbing evidence of high mortality of salmon at sea. The need for a multidisciplinary study of contributing factors and appropriate action has been advocated for some time. As a result, the Atlantic Salmon Trust, organised a workshop under the chairmanship of Derek Mills to redress this situation, bringing together climatologists, oceanographers, planktonologists and marine and salmon biologists to clarify and discuss the environmental and biological issues affecting survival. Proposals are put forward for further research and collaboration.
