The Alter Ego Effect Todd Herman,2019-02-05 Now a Wall Street Journal bestseller. What if the games we played as children were the greatest gift to helping us achieve more today? Before stage fright, impostor syndrome, emotional baggage, and the other dubious gifts of adulthood, everyone pretended to be a superhero, a favorite athlete, an inspiring entertainer, a nurse, a firefighter, a lion, or whatever else captured our imaginations. And yet, that natural creativity is slowly squeezed out of us because we think it's childish or it's "time to grow up." Now Todd Herman-backed by scientific research and countless stories from the real world-will show us how to tap into the human imagination to unleash new versions of ourselves, ready-made to kick ass. Herman has been coaching champions in every field for over twenty years, and he's helped them bring out their Heroic Self to transcend the forces pulling them into the Ordinary World. Anyone attempting ambitious things faces adversity, resistance, and challenges, but Herman confronts these obstacles with a question: Who or what needs to show up to make success inevitable? In The Alter Ego Effect, Herman presents countless stories from salespeople, executives, entertainers, athletes, entrepreneurs, creatives, and historical figures to illustrate how to activate the Heroic Self already nested inside each of us. And he reveals that we may not be using those traits in the moments when we need them the most. From the creative entrepreneur who resisted their craft, to the accomplished military officer who wanted to be a warmer dad at home, Todd Herman's clients have discovered there is no end to the parts of their lives they could improve by using Alter Egos.

*Altar Ego* Craig Groeschel,2013-02-26 You are NOT who you think you are. In fact, according to bestselling author Craig Groeschel in Altar Ego, you need to take your idea of your own identity, lay it down on the altar, and sacrifice it. Give it to God. Offer it up. Why? Because you are who GOD says you are. And until you've sacrificed your broken concept of your identity, you won't become who you are meant to be. When we place our false labels and self-deception on the altar of God's truth, we discover who we really are as his sons and daughters. Instead of an outward-driven, approval-based ego, we learn to live with an "altar" ego, God's vision of who we are becoming. Discover how to trade in your broken ego and unleash your altar ego to become a living sacrifice. Once we know our true identity and are growing in our Christ-like character, then we can behave accordingly, with bold behavior, bold prayers, bold words, and bold obedience. Altar Ego reveals who God says you are, and then calls you to live up to it.

**HUMANISTIC PERSONOLOGY: A HUMANISTIC-ONTOLOGICAL THEORY OF THE PERSON & PERSONALITY. Applications in Therapy, Social Work, Education, Management, and Art (Theater)** **2023 PAPERBACK EXPANDED EDITION** ,2023-10-29 This Expanded 2023 Edition of the book entitled HUMANISTIC PERSONOLOGY: A HUMANISTIC-ONTOLOGICAL THEORY OF THE PERSON & PERSONALITY. Applications in Therapy, Social Work, Education, Management, and Art (Theater), completes the range of domains brought to attention and represented from the perspective of humanistic-ontological orientation with new domains, namely medicine, politics, technology & science, ecology, and economy - work/project which, as stated in previous editions,presents an ontological-humanistic theory/ model for the formation, development, functioning, education, and therapy/ counseling of the

human personality & person, offering a philosophical (ontological) alternative to the prevailing contemporary psychological, biological, and cybernetic models in both literature and practice. To this end, the process of personality/ person formation is described as a successive and simultaneous creation and establishment of internal autonomous BEINGS/ onto-formations. These internal beings/ onto-formations, such as the organism, the self, the soul, the ego, the mind, the consciousness, play a dynamic-ontological and functional specific role in the composition and the functioning of the personality/ person. The personal profile, the personality traits, the behavior, the human being as a whole, are depicted as the outcomes of inner dynamic relationships and ontological confrontations among these internal beings, which are energetically and antagonistically charged. Through this daring project and through these innovative elements, the theory/ model presented in an improved form also in this edition can represent a significant contribution, not only to elucidating and explaining the complex processes of personality/ person formation, development, functioning, and therapy, but also to represent these processes – including by invoking the Aristotelian and Platonic concepts of transubstantiation and body-soul (matter-spirit) dualism – in relation to profound philosophical (ontological and metaphysical) categories such as human being, human essence, human nature, and human condition, bringing the discourse, currently located mainly in the sphere of psychology, in the sphere of philosophy, ontology and ethics as well, the formation and development process not leading – from the perspective of the model adopted in the project – only to the formation of personality and adaptive behavior, but also to the formation, in a holistic view, of the person as a whole, of the person as a HUMAN BEING. Some of the most significant fragments/ ideas: "The essence of the humanistic-ontological conception regarding the person/ the human personality is given by the idea that these are ontological products of some gradual and stadial processes held with the crucial contribution of the concrete/ contextual/ contingent socio-human, cultural and institutional factors where the person grows and lives. Very important are therefore the personal-human factors..." "In our ontological-humanistic model of formation, beingness and functioning of the person/ personality – of the human being – we will speak, therefore, about characteristics, properties, processes, principles such as onto-formatization, persomization and promergerence, emergence and imergerence, transmergerence and telegence, conmergerence and sinmergerence, about stages of evolution, formation, development, establishment of the personal ontological-psychological formations, of the person as a whole, such as of contact, of acquisition/ accumulation, of structuration/ centralization, of constitution/ holistization, of establishing/ networking, and finally of ontification/ fulfillment, and about ontological-subjective humane and spiritual experiences/ feelings that represent "substances, motivational-energetical sources and resorts of forming of the personality/ person's onto-formations and spheres..."

*Database and Expert Systems Applications* Mohamed Ibrahim,Josef Küng,Norman Revell,2003-05-15 The Database and Expert Systems Applications (DEXA) conferences have established themselves as a platform for bringing together researchers and practitioners from various backgrounds and all regions of the world to exchange ideas, experiences and opinions in a friendly and stimulating environment. The papers presented at the conference represent recent developments in the field and important steps towards shaping the future of applied computer science and information systems. DEXA covers a broad field: all aspects of databases, knowledge based systems, knowledge management, web-based systems, information systems, related technologies and their applications. Once again there were a good number of submissions: out of 183 papers that were submitted, the program committee selected 92 to be presented. In the first year of this new millennium DEXA has come back to the United Kingdom, following events in Vienna, Berlin, Valencia, Prague, Athens, London, Zurich, Toulouse, Vienna and Florence. The past decade has seen several revolutionary developments, one of which was the explosion of Internet-related applications in the areas covered by DEXA, developments in which DEXA has played a role and in which DEXA will continue to play a role in its second decade, starting with this conference.

**On the Move to Meaningful Internet Systems 2004: OTM 2004 Workshops** Zahir Tari,Angelo Corsaro,2004-10-14 A special mention for 2004 is in order for the new Doctoral Symposium Workshop where three young postdoc researchers organized an original setup and formula to bring PhD students together and allow them to submit their research proposals for selection. A limited number of the submissions and their approaches were independently evaluated by a panel of senior experts at the conference, and presented by the students in front of a wider audience. These students also got free access to all other parts of the OTM program, and only paid a heavily discounted fee for the Doctoral Symposium itself. (In fact their attendance was largely sponsored by the other participants!) If evaluated as successful, it is the intention of the General Chairs to expand this model in future editions of the OTM conferences and so draw in an audience of young researchers to the OnTheMove forum. All three main conferences and the associated workshops share the d- tributed aspects of modern computing systems, and the resulting applicati- pull created by the Internet and the so-called Semantic Web. For DOA 2004, the primary emphasis stayed on the distributed object infrastructure; for ODBASE 2004, it was the knowledge bases and methods required for enabling the use of formalsemantics;andforCoopIS2004thema topic wastheinteraction ofsuch technologies and methods with management issues, such as occurs in networked organizations. These subject areas naturally overlap and many submissions in fact alsotreat envisaged mutual impacts among them.

*Virtual Applications* Peter B. Andersen,Lars Qvortrup,2013-03-14 3D Virtual Applications: Applications with Virtual Inhabited 3D Worlds deals with the use of virtual inhabited 3D spaces in different domains of society. (Other volumes deal with interaction, production methodology and space.) From focusing on virtual reality (a reality into which users and objects from the real world should be moved) we are increasingly focusing on augmented reality (i.e. on moving computers out into the reality of real users, objects and activities). This book deals with the use of virtual inhabited 3D spaces in both contexts. Based on the structuring of the application domains, this book looks at the use of VR and augmented reality in the following major application domains: – Production oriented applications – use of VR and augmented reality for control of complex production plants, for navigation support (ships, cars, aeroplanes) and for support of collaborative work processes – Communication support applications – virtual spaces are used for supporting communication in learning environments and for support of organisational communication. Also virtual spaces are used for supporting the navigation of people in public spaces, i.e. as maps, planning tools – Scientific applications – use of 3D models for medical research; use of dynamic models for representation of abstract concepts and ideas (data-mining applications); use of dynamic 3D models for simulating

biological or social processes – Artistic and cultural applications – the construction of stages representing concepts and/or emotions
