Access Controlled Ronald Deibert, John Palfrey, Rafal Rohozinski, Jonathan Zittrain, 2010-04-02 Reports on a new generation of Internet controls that establish a new normative terrain in which surveillance and censorship are routine. Internet filtering, censorship of Web content, and online surveillance are increasing in scale, scope, and sophistication around the world, in democratic countries as well as in authoritarian states. The first generation of Internet controls consisted largely of building firewalls at key Internet gateways; China's famous "Great Firewall of China" is one of the first national Internet filtering systems. Today the new tools for Internet controls that are emerging go beyond mere denial of information. These new techniques, which aim to normalize (or even legalize) Internet control, include targeted viruses and the strategically timed deployment of distributed denial-of-service (DDoS) attacks, surveillance at key points of the Internet's infrastructure, take-down notices, stringent terms of usage policies, and national information shaping strategies. Access Controlled reports on this new normative terrain. The book, a project from the OpenNet Initiative (ONI), a collaboration of the Citizen Lab at the University of Toronto's Munk Centre for International Studies, Harvard's Berkman Center for Internet and Society, and the SecDev Group, offers six substantial chapters that analyze Internet control in both Western and Eastern Europe and a section of shorter regional reports and country profiles drawn from material gathered by the ONI around the world through a combination of technical interrogation and field research methods.

Devotional Ventures Corey Cleek, 2007-02-05 What would Jesus do--on the job? Here, sixty businessmen and women offer professionals fresh insights on how to practically apply biblical principles to their jobs. From maintaining personal integrity, defending your faith, persevering through difficult situations, and dealing honestly and fairly with others, each devotional topic

directly applies to a challenge encountered in the workplace. A relevant Scripture and question for application helps readers reflect on and apply the pertinent truths they find in that day's devotion. Rather than compartmentalizing their work life and their church life, business professionals will be inspired to surrender all parts of their lives fully to the Lord. Readers will come away with a better understanding of how their work matters to God and how their faith can influence every aspect of their professional life.

Computer Vision - ECCV 2022 Shai Avidan, Gabriel Brostow, Moustapha Cissé, Giovanni Maria Farinella, Tal Hassner, 2022-11-03 The 39-volume set, comprising the LNCS books 13661 until 13699, constitutes the refereed proceedings of the 17th European Conference on Computer Vision, ECCV 2022, held in Tel Aviv, Israel, during October 23-27, 2022. The 1645 papers presented in these proceedings were carefully reviewed and selected from a total of 5804 submissions. The papers deal with topics such as computer vision; machine learning; deep neural networks; reinforcement learning; object recognition; image classification; image processing; object detection; semantic segmentation; human pose estimation; 3d reconstruction; stereo vision; computational photography; neural networks; image coding; image reconstruction; object recognition; motion estimation.

Internet Security and You Sherri Mabry Gordon, 2019-07-15 Nothing people do online is ever completely private or anonymous. With each technological advance in the connectivity of the internet comes additional opportunities for cybercriminals to have immediate access to an individual's life. This volume explains how personal and private information is at risk for theft and what people can do to keep it secure from hackers who want to steal information, money, and even their identity. Teens discover not only what tools and strategies these hackers are using to get to their information but what steps they can take to stay safe. Readers will understand password protection and learn how to use

Wi-Fi safely.

Strategic Cyber Defense A.V. Gheorghe,U. Tatar,Y.

Gokce,2017-07-20 With the increased dependence on digital and internet technologies, cyber security has come to be regarded as a national security issue, and the number of countries with a published cyber security strategy continues to rise. But these national cyber security strategies often run the risk of failing to address all the cyber security requirements of the many institutions within a given country, and the complex nature of the stakeholders involved and the networks formed by them means that the problem requires an interdisciplinary approach. This book presents papers from the NATO Advanced Research Workshop (ARW) entitled “A Framework for a Military Cyber Defense Strategy”, held in Norfolk, Virginia, USA, in April 2016. The workshop focused on key priority areas for cyber defense along with NATO’s cyber defense policy implementation and brought together experts with an eclectic mix of backgrounds and specialties from a group of NATO member states and partner countries. The participants considered not only the technical implications of cyber security efforts, but also the legal, strategic, educational and organizational aspects, and the book reflects this wide view of the field and its intricacies, highlighting the complexity of cyber security and the many challenges it presents. This overview of cyber security offers state-of-the-art approaches from a multidisciplinary standpoint, and will be of interest to all those working in the field.

Image and Graphics Yuxin Peng,Shi-Min Hu,Moncef Gabbouj,Kun Zhou,Michael Elad,Kun Xu,2021-09-30 This three-volume set LNCS 12888, 12898, and 12890 constitutes the refereed conference proceedings of the 11th International Conference on Image and Graphics, ICIG 2021, held in Haikou, China, in August 2021.* The 198 full papers presented were

selected from 421 submissions and focus on advances of theory, techniques and algorithms as well as innovative technologies of image, video and graphics processing and fostering innovation, entrepreneurship, and networking. *The conference was postponed due to the COVID-19 pandemic.

Distributed Computing in Sensor Systems James

Aspnes,Christian Scheideler,Anish Arora,Samuel Madden,2007-07-05 This book constitutes the refereed proceedings of the Third International Conference on Distributed

Computing in Sensor Systems, DCOSS 2007, held in Sante Fe, NM, USA in June 2007. It covers algorithms, applications, and systems. It bridges the gap between theory and practice and between the broader field of distributed computing and the specific issues arising in sensor networks and related systems.
