The Open Organization Jim Whitehurst, 2015 This is a story of reinvention. Jim Whitehurst, celebrated president and CEO of one of the world's most revolutionary software companies, tells first-hand his journey from traditional manager (Delta Air Lines, Boston Consulting Group) and "chief" problem solver to CEO of one of the most open organizational environments he'd ever encountered. This challenging transition, and what Whitehurst learned in the interim, has paved the way for a new way of managing—one this modern leader sees as the only way companies will successfully function in the future. Whitehurst says beyond embracing the technology that has so far disrupted entire industries, companies must now adapt their management and organizational design to better fit the Information Age. His mantra? "Adapt or die." Indeed, the successful company Whitehurst leads—the open source giant Red Hat—has become the organizational poster child for how to reboot, redesign, and reinvent an organization for a decentralized, digital age. Based on open source principles of transparency, participation, and collaboration, "open management" challenges conventional business ideas about what companies are, how they run, and how they make money. This book provides the blueprint for putting it into practice in your own firm. He covers challenges that have been missing from the conversation to date, among them: how to scale engagement; how to have healthy debates that net progress; and how to attract and keep the "Social Generation" of workers. Through a mix of vibrant stories, candid lessons, and tested processes, Whitehurst shows how Red Hat has blown the traditional operating model to pieces by emerging out of a pure bottom up culture and learning how to execute it at scale. And he explains what other companies are, and need to be doing to bring this open style into all facets of the organization. By showing how to apply open source methods to everything from structure, management, and strategy to a firm's customer and partner relationships, leaders and teams will now have the tools needed to reach a new level of work. And with that new level of work comes unparalleled success. The Open Organization is your new resource for doing business differently. Get ready to make traditional management thinking obsolete.

Maximizing the Value of Consulting Jack J. Phillips, William D. Trotter, Patricia Pulliam Phillips, 2015-05-19 Provide organized, efficient, relevant consulting with lasting value Maximizing the Value of Consulting is an indispensable, practical guide for managing, measuring, and delivering the results that make internal and external consulting a lasting value to clients and the company. Sponsored by the ROI Institute and the Association of Internal Management Consultants, this book provides a roadmap to relevance for consultants operating in the increasingly fast-paced, changing, dynamic environment. Readers will learn how to use resources properly and manage the investment efficiently, while truly connecting to the business, securing appropriate levels of commitment, and providing adequate levels of support. Detailed coverage includes guidance toward calculating the value of consulting in terms that executives understand, including business impact and ROI, and using the appropriate tools to show how things are working throughout the process. Whether organizations are using internal or external consultants, or both, consultants can provide better value to the company. Consultants are needed to provide advice, support, and insight into the processes undertaken to improve the business, and integrate the input of different functional units into a more streamlined strategy. This book is designed to help consultants provide the utmost value to clients by maximizing organization, efficiency, and ultimately, ROI. Manage for value with better organization and cost control Set objectives at multiple levels to deliver useful results Measure implementation, impact, ROI, and intangibles Use final results to drive appropriate actions, creating lasting value The skyrocketing need for internal and external consultants will continue, in almost every

functional area ranging from HR and technology, to auditing and risk management. *Maximizing the Value of Consulting* provides a manual for relevant, value-driven consulting, with world-renowned expert insight.

Discovery Science Klaus P. Jantke, Ayumi Shinohara, 2001-11-07 These are the conference proceedings of the 4th International Conference on Discovery Science (DS 2001). Although discovery is naturally ubiquitous in science, and scientific discovery itself has been subject to scientific investigation for centuries, the term Discovery Science is comparably new. It came up in connection with the Japanese Discovery Science project (cf. Arikawa's invited lecture on The Discovery Science Project in Japan in the present volume) some time during the last few years. Setsuo Arikawa is the father in spirit of the Discovery Science conference series. He led the above mentioned project, and he is currently serving as the chairman of the international steering committee for the Discovery Science conference series. The other members of this board are currently (in alphabetical order) Klaus P. Jantke, Masahiko Sato, Ayumi Shinohara, Carl H. Smith, and Thomas Zeugmann. Colleagues and friends from all over the world took the opportunity of meeting for this conference to celebrate Arikawa's 60th birthday and to pay tribute to his manifold contributions to science, in general, and to Learning Theory and Discovery Science, in particular. Algorithmic Learning Theory (ALT, for short) is another conference series initiated by Setsuo Arikawa in Japan in 1990. In 1994, it amalgamated with the conference series on Analogical and Inductive Inference (AII), when ALT was held outside of Japan for the first time.

The New Era of Global Services Javier Peña Capobianco, 2023-10-11 The New Era of Global Services is the result of interviews with more than seventy international leaders. The results show that in the coming years, Global Services will tend to grow in business-to-business (B2B), business-to-consumer (B2C), peer-to-peer (P2P), and in particular peer-to-business (P2B) relationships.

Nonprofit Consulting Essentials Penelope Cagney, Alliance for Nonprofit Management, 2010-08-13 Consultants are playing an increasingly important role in the challenging world of nonprofits. Yet despite the demand for consulting services, nonprofit professionals often lack the necessary insight into how best to choose and work with a consultant. *Nonprofit Consulting Essentials* is a vital resource both for nonprofit leaders selecting and working with a consultant to guarantee the best use of their agency's resources, as well as consultants seeking a clear understanding of the more subtle dynamics that define a successful consulting practice working with social sector organizations. Drawing on Penelope Cagney's years of experience as a top-level nonprofit consultant, *Nonprofit Consulting Essentials* is filled with keen insights and in-depth interviews with the founders and leaders of influential consulting firms. Throughout the book, Cagney outlines a number of concrete consulting strategies that can serve as additional tools for managers seeking to resolve complex organizational development issues. *Nonprofit Consulting Essentials* also offers recommendations to nonprofit leaders and consultants to make their relationship the best it can be. Once a solid alliance is formed, they can tackle complex organizational challenges together, such as fundraising and marketing, governance and management, and organizational development. Cagney explores what it takes to make the consulting experience a success and covers vital topics such as: the key differences between consulting with nonprofits versus for-profit organizations, the primary areas of nonprofit consultation, making the consulting relationship work, the special ethical considerations of consulting in the sector, and understanding emerging trends in consulting. *Nonprofit Consulting Essentials* reviews the best practices and thinking in the nonprofit consulting practice, providing leaders and consultants a way to ensure a robust organization in the future.

Rise and Decline of Industry in Central and Eastern Europe Bernhard Müller,2005 In the course of the tremendous political and economic upheaval starting in 1989/1990 many industrial cities and regions in Central and Eastern Europe have been confronted with profound problems. This book presents eleven detailed national reports which describe the situation in such cities and regions as well as the strategies which have been employed to cope with structural change. The country reports are complemented by short case studies of selected cities and regions. An introduction gives background to such topics as structural change and the ramifications of EU enlargement. Finally some conclusions are drawn and recommendations offered for future policy.

Social, Economic and Cultural Aspects in the Dynamic Changing Process of Old Industrial Regions Karl Eckart,2003 In the old industrial regions of the Ruhr District (Germany), Upper Silesia (Poland) and the Ostrava Region (Czech Republic), coal as well as iron and steel have been the economic basis for many decades. In the Ruhr District important changes already started at the end of the 1950s. In Upper Silesia and in the Ostrava Region, however, these processes started at the end of the 1980s together with the transformation of the economic and social system in these countries. Because of high unemployment, steps are taken to modernize the economy and to retrain employees. All three regions cannot develop out of their own strength, but there are programmes in order to support this process.

Student Transfers from White to Black Colleges Narendra H. Patel,1988 The source of transfer-in students is a statistical abstract derived from a survey conducted among the Historically Black Colleges and Universities (HBCUs). According to data recently collected from 2,600 institutions of higher education it was found that a year after enrolling in college approximately one in three students was no longer enrolled in the institution of first entrance. Those students who move to other institutions of higher education are referred to as transfer students. These transfer students are a potential source of enrollment for institutions of higher education a source HBCUs must value in enrollment management. Therefore, the main objective of this study was to collect and analyze data concerning the institutional source of transfer students who enter HBCUs. Co-published by the National Association for Equal Opportunity in Higher Education.

Handbook of Research on the Regulation of the Modern Global Migration and Economic Crisis Alaverdov, Emilia, Bari, Muhammad Waseem, 2023-02-17 Migration is not a new phenomenon; it has a centuries-long history since the world's population has been characterized by the desire to relocate not only from one country to another, but from one continent to another as well. However, there is a significant difference between the migrations of the past and the current one. Today's migration is complicated by the strong emotional reaction and hostile attitude from society. The study of migration processes needs interdisciplinary approaches. The Handbook of Research on the Regulation of the Modern Global Migration and Economic Crisis presents emerging research and case studies on global migration in the modern world. Through interdisciplinary approaches, it further showcases the current challenges and approaches in regulation. Covering topics such as forced migration, human trafficking, and national identity, this major reference work is an excellent resource for migration specialists, government officials, politicians, sociologists, economists, students and educators of higher education, researchers, and academicians.

Linking Industry and Ecology Ann Dale, James Tansey, 2007-11-01 The contributors to this volume draw on their experience in a variety of disciplines to explore the origins, promise, and relevance of the emerging field of industrial ecology. They situate industrial ecology within the broader range of environmental management strategies and concepts, from the practices of pollution prevention through life cycle management, to the more fundamental shift toward dematerialization and ecological design. Their work not only affirms what has been learned to date in this nascent field but also provides new insight by demonstrating that technologies are socially and politically embedded. This book makes a compelling argument for the need to think ecologically to develop innovative and competitive industrial policy.
