Vehicular ad hoc Networks Claudia Campolo, Antonella Molinaro, Riccardo Scopigno, 2016-10-13 This book presents vehicular ad-hoc networks (VANETs) from their onset, gradually going into technical details, providing a clear understanding of both theoretical foundations and more practical investigation. The editors gathered top-ranking authors to provide comprehensiveness and timely content; the invited authors were carefully selected from a list of who's who in the respective field of interest: there are as many from Academia as from Standardization and Industry sectors from around the world. The covered topics are organized around five Parts starting from an historical overview of vehicular communications and standardization/harmonization activities (Part I), then progressing to the theoretical foundations of VANETs and a description of the day-one standard-compliant solutions (Part II), hence going into details of vehicular networking and security (Part III) and to the tools to study VANETs, from mobility and channel models, to network simulators and field trial methodologies (Part IV), and finally looking into the future of VANETs by investigating alternative, complementary communication technologies, innovative networking paradigms and visionary applications (Part V). The way the content is organized, with a differentiated level of technical details, makes the book a valuable reference for a large pool of target readers ranging from undergraduate, graduate and PhD students, to wireless scientists and engineers, to service providers and stakeholders in the automotive, ITS, ICT sectors.

European-American Relations and the Middle East Daniel Möckli, Victor Mauer, 2010-10-18 This book examines the evolution of European-American relations with the Middle East since 1945. Placing the current transatlantic debates on the Middle East into a broader context, this work analyses how, why, and to what extent European and US roles, interests, threat perceptions, and policy attitudes in the region have changed, relating to both the region as a whole and the two main issues analysed: Gulf Security and the Arab-Israeli Conflict. The contributors then go on to discuss the implications of these developments for Western policymaking. The volume makes four key contributions. First, it examines the subject matter from a truly transatlantic perspective, with all chapters adopting a bi- or multilateral approach, taking into account the views from both the US and individual European countries or the EC/EU collectively. Second, the book takes a long-term view, covering a series of crises and developments over the past six decades. Third, it has a systematic structure, with the predominantly chronological order of the chapters being geared towards depicting trends and evolutions with regard to the key themes of the book. Finally, the book builds bridges between historians and political scientists/analysts, as well as between experts of transatlantic relations and Middle East scholars. This book will be of great interest to students of transatlantic relations,

the Middle East, US foreign policy, European politics, international history and IR in general. Daniel Möckli is a Senior Researcher at the Center for Security Studies (CSS), ETH Zurich. He is also the editor of CSS Analyses in Security Policy. Victor Mauer is Deputy Director and Head of Research of the Center for Security Studies (CSS), ETH Zurich, and Lecturer in the Department of Social Sciences and Humanities at ETH Zurich.

turbomachine is an energy
conversion device converting
mechanical energy to thermal
pressure energy or vice versa
the conversion is done through
the dynamic interaction
between a continuously flowing
