Passages Ivan Jurakic,2007

Christianity and Critical Realism Andrew Wright,2013-05-07 One of the key achievements of critical realism has been to expose the modernist myth of universal reason, which holds that authentic knowledge claims must be objectively 'pure', uncontaminated by the subjectivity of local place, specific time and particular culture. Wright aims to address the lack of any substantial and sustained engagement between critical realism and theological critical realism with particular regard to: (a) the distinctive ontological claims of Christianity; (b) their epistemic warrant and intellectual legitimacy; and (c) scrutiny of the primary source of the ontological claims of Christianity, namely the historical figure of Jesus of Nazareth. As such, it functions as a prolegomena to a much needed wider debate, guided by the under-labouring services of critical realism, between Christianity and various other religious and secular worldviews. This important new text will help stimulate a debate that has yet to get out of first gear. This book will appeal to academics, graduate and post-graduate students especially, but also Christian clergy, ministers and informed laity, and members of the general public concerned with the nature of religion and its place in contemporary society.

Spirituality and Education Andrew Wright,2003-09-02 Spirituality and Education introduces the basic contours of current debate in a form accessible to both classroom teachers across the curriculum range, and to school managers. It covers all key areas, including: * problems of defining spirituality * government legislation and supporting documentation * relevant empirical research * the social dimension of spirituality * secular and religious manifestations of spirituality in contemporary society * theories of childhood spiritual development * contemporary approaches to spiritual education, including collective worship and cross-curricular teaching. A variety of different perspectives and approaches will be offered, and readers are encouraged to be reflective through a number of tasks which relate all issues raised directly back to their own specific circumstances. The author includes questions, quotes and lists of further reading.

The Return of Jazz Andrew Wright Hurley,2011-02 Jazz has had a peculiar and fascinating history in Germany. The influential but controversial German writer, broadcaster, and record producer, Joachim-Ernst Berendt (1922-2000), author of the world's best-selling jazz book, labored to legitimize jazz in West Germany after its ideological renunciation during the Nazi era. German musicians began, in a highly productive way, to question their all-too-eager adoption of American culture and how they sought to make valid artistic statements reflecting their identity as Europeans. This book explores the significance of some of Berendt's most important writings and record productions. Particular attention is given to the "Jazz Meets the World" encounters that he engineered with musicians from Japan, Tunisia, Brazil, Indonesia, and India. This proto-"world music" demonstrates how some West Germans went about creating a post-nationalist identity after the Third Reich. Berendt's powerful role as the West German "Jazz Pope" is explored, as is the groundswell of criticism directed at him in the wake of 1968.

Religious Education and Critical Realism Andrew Wright,2015-11-19 Religious Education and Critical Realism: Knowledge, Reality and Religious Literacy seeks to bring the enterprise of religious education in schools, colleges and universities into conversation with the philosophy of Critical Realism. This book addresses the problem, not of the substance of our primal beliefs about the ultimate nature of reality and our place in the ultimate order-of-things, but of the process through which we might attend to questions of substance in more attentive, reasonable, responsible and intelligent ways. This book unpacks the impact of modern and post-modern thought on key topics whilst also generating a new critically realistic vision. Offering an account of the relationship between Religious Education and Critical Realism, this book is essential reading for students, scholars and practitioners interested in philosophy, theology and education.
